## **Dangerous Games The Uses And Abuses Of History Modern Library Chronicles:**

**Dangerous Games** Margaret MacMillan, 2010-07-13 Acclaimed historian Margaret MacMillan explores here the many ways in which history affects us all She shows how a deeper engagement with history both as individuals and in the sphere of public debate can help us understand ourselves and the world better But she also warns that history can be misused and lead to misunderstanding History is used to justify religious movements and political campaigns alike Dictators may suppress history because it undermines their ideas agendas or claims to absolute authority Nationalists may tell false one sided or misleading stories about the past Political leaders might mobilize their people by telling lies It is imperative that we have an understanding of the past and avoid these and other common traps in thinking to which many fall prey This brilliantly reasoned work alive with incident and figures both great and infamous will compel us to examine history anew and skillfully illuminates why it is important to treat the past with care *The Uses and Abuses of History* Margaret MacMillan, 2008 History is useful when it is used properly to understand why we and those we must deal with think and react in certain ways It can offer examples to inform our decisions and guesses about the consequences of our actions But we should be wary of looking to history for dogmatic lessons We should distrust those who abuse history when they call on it to justify unreasonable claims to land for example or restitution MacMillan illustrates how dangerous history can be in the hands of nationalistic or religious or ethnic leaders who use it to foster a sense of grievance and a desire for revenge **Echoes of Harbin** Dan Ben-Canaan, 2024-03-06 This book examines and reflects on the Jewish community of Harbin a Chinese city that was established by Russians in 1898 *Dismantling Orientalist Representations in US Education* Daniel Osborn, 2024-09-30 This book examines the evolving role played by the social studies classroom in shaping national identity and contributing to Orientalism which depicts the peoples of the Middle East as the Other relative to those of the United States and Europe Building upon the momentum of critical approaches to examining the nature of knowledge the role of schools in society and the trends within social studies education and its hidden curriculum the volume crucially shifts the focus toward a more global emphasis examining the nature of Orientalism and the school as a setting where Orientalist logic and assumptions about the Middle East and its inhabitants are reified Focusing on the ecosystem of social studies knowledge production and working within the sociology of knowledge it traces this evolution across the 19th 20th and 21st centuries A novel and unique exploration of knowledge construction and presenting a vision for a more nuanced and multifaceted portrayal of the Middle East that corrects for the deleterious aspects of Orientalism while avoiding a romanticized apologetic it will appeal to scholars researchers and educators with interests in decolonizing education social studies education the history of education and race and ethnicity studies **Controversial History Education in Asian Contexts** Mark Baildon, Kah Seng Loh, Ivy Maria Lim, Gül İnanc, Junaidah Jaffar, 2013-08-22 This book examines both history textbook controversies AND teaching historical controversy in Asian contexts The different perspectives provided by the book's authors offer numerous insights

examples and approaches for understanding historical controversy to provide a practical gold mine for scholars and practitioners The book provides case studies of history textbook controversies ranging from treatments of the Nanjing Massacre to a comparative treatment of Japanese occupation in Vietnamese and Singaporean textbooks to the differences in history textbooks published by secular and Hindu nationalist governments in India It also offers a range of approaches for teaching historical controversy in classrooms These include Structured Academic Controversy the use of Japanese manga teaching controversy through case studies student facilitated discussion processes and discipline based approaches that can be used in history classrooms The book s chapters will help educational researchers and curricularists consider new approaches for curriculum design curriculum study and classroom research

Representing the Middle East and Africa in Social Studies Education Daniel Osborn, 2018-01-19 Representing the Middle East and Africa in Social Studies Education examines the lived classroom experiences of six social studies teachers and the relevance of their discourse in framing the knowledge students receive about populations in the Middle East and Africa With a focus on the socialization processes of schooling this book deconstructs the classroom experience and investigates the ways in which a macro societal phenomenon otherness is reified in micro societal interactions Through the methodological lens of Critical Discourse Analysis this work illuminates the importance of teachers language in challenging and reinforcing portrayals that cast the diverse populations of the Middle East and Africa in the role of the other

*Open Conversations* David Carr, 2011-09-19 Cultural institutions must reimagine their roles as education facilities for their communities and address the public need for conversations in safe and fair places thereby renewing their essential place in democratic society This book explains how Open Conversations Public Learning in Libraries and Museums is a provocative book one that is designed to offer courage to cultural institution administrators and staff even as it opens their eyes to the possibility that their facilities can offer more than they are Rather than offering prescriptive answers the author invites readers to consider museums and libraries in fresh ways Author David Carr believes professionals in libraries and museums need to think more broadly He challenges them to address communities national social change psychology and learning and to think about ways to frame their institutions not as repositories or research chambers but as instruments for human thinking Now is the time for these institutions to recover their integrity and purpose as fundamental informing structures in a struggling democracy Based on lectures and previously published writings by the author and
