 This book shows how the unique characteristics of traditionally differentiated media continue to determine narrative despite
 the recent digital convergence of media technologies The author argues that media are now each largely defined by
 distinctive industrial practices that continue to preserve their identities and condition narrative production Furthermore the
 book demonstrates how a given medium's variability in institutional and technological contexts influences diverse approaches
 to storytelling By connecting US film television comic book and video game industries to their popular fictional characters
 and universes including Star Wars Batman Game of Thrones and Grand Theft Auto the book identifies how differences in
 industrial practice between media inform narrative production This book is a must read for students and scholars interested
