Engineering Magnetohydrodynamics:

Engineering Magnetohydrodynamics George W. Sutton, Arthur Sherman, 2006-07-07 Suitable for advanced undergraduates and graduate students in engineering this text introduces the concepts of plasma physics and magnetohydrodynamics from a physical viewpoint The first section of the three part treatment deals mainly with the properties of ionized gases in magnetic and electric fields essentially following the microscopic viewpoint An introduction surveys the concepts of ionized gases and plasmas together with a variety of magnetohydrodynamic regimes A review of electromagnetic field theory follows including motion of an individual charged particle and derivations of drift motions and adiabatic invariants Additional topics include kinetic theory derivation of electrical conductivity development of statistical mechanics radiation from plasma and plasma wave motion Part II addresses the macroscopic motion of electrically conducting compressible fluids magnetohydrodynamic approximations description of macroscopic fluid motions magnetohydrodynamic channel flow methods of estimating channel flow behavior and treatment of magnetohydrodynamic boundary layers Part III draws upon the material developed in previous sections to explore applications of magnetohydrodynamics The text concludes with a series of problems that reinforce the teachings of all three parts

Magnetoplasdynamic Arc Thrusters J. Marlin Smith, 1972 Fluctuations in electron density and temperature coupled through Ohm's Law are studied for MHD power generator and MPD arc thruster applications The dispersion relation based on linear theory is derived and the two limiting cases of infinite ionization rate and frozen flow are examined The nonlinear effects of the frozen flow case are then studied in the quasilinear limit Equations are derived for the amplitude of the fluctuation and its effect upon Ohm's Law and the electron temperature equation Conditions under which a steady state can exist in the presence of the fluctuation are examined and effective transport properties are determined *Nuclear Science Abstracts*, 1973-04 *Energy*, 1980 Energy: a Continuing Bibliography with Indexes, 1974 **Experimental Investigations of an Open-cycle, Vortex MHD Generator**, 1972 Energy Research Abstracts, 1986 Aeronautical Engineering Review, 1957 **NASA Technical Note**, 1976
