Engineering The Revolution Arms And Enlightenment In France 1763 1815:

Engineering the Revolution Ken Alder, 2010-04-15 *Engineering the Revolution* documents the forging of a new relationship between technology and politics in Revolutionary France and the inauguration of a distinctively modern form of the technological life Here Ken Alder rewrites the history of the eighteenth century as the total history of one particular artifact the gun by offering a novel and historical account of how material artifacts emerge as the outcome of political struggle By expanding the political to include conflict over material objects this volume rethinks the nature of engineering rationality the origins of mass production the rise of meritocracy and our interpretation of the Enlightenment and the French Revolution

Engineering the Revolution Ken Alder, 1997 Recent historical revisionists have divorced 18th century material conditions from concurrent political struggles This book explores the forging of a new relationship between technology and politics in Revolutionary France

The Technical Corps Between France and Italy, 1750-1814 Lorenzo Cuccoli, 2024-10-04 This book provides the first comprehensive study of the technical corps during the Napoleonic Era both in France and in Italy These corps which possessed advanced schooling and nurtured meritocratic practices even in the Ancien Regime came to the forefront with the French Revolution due to the increase in prestige of both scientists and the military Notwithstanding the key roles played by well known figures such as Lazare Carnot and Napoleon Bonaparte the historiography has not fully explored either the culture that produced them or the impact this had in France and in Napoleonic Europe or their far reaching legacy The modern paradigms of technocracy and meritocracy in fact have their origin in these corps

Cerf Berr of Médelsheim 1726-1793 Margaret R. O'Leary, MD, 2014-07-31 On December 7 1793 an old man lay motionless at last surrounded by his family rabbis and members of the society who would prepare his body for Jewish burial Sixteen days after he was sentenced to jail his family would go to extraordinary efforts to bury him in a Jewish cemetery ordered destroyed by the French government just two weeks earlier The old man was Cerf Berr of Mdelsheim the tenacious eighteenth century Ashkenazi emancipator of the French Jews Margaret R OLeary MD presents Cerf Berr's life story recognizing his profound contributions to the liberation of the Jews of France While chronicling his incredible journey OLeary not only highlights Cerf Berr's scrupulous honesty and reliability that earned him the deep appreciation of the French Crown but also details how he besieged authorities in both Strasbourg and Versailles to grant political social and economic equality for all of his coreligionists in France Cerf Berr achieved that milestone on September 27 1791 only to die two years later after imprisonment by sadistic French revolutionaries Cerf Berr of Mdelsheim is the biography of a man who was faithful to his people sought the good for the community and cherished justice all while making a momentous contribution to the history of France and the Jews

The Invisible Emperor Mark Braude, 2018-10-09 A suspenseful fast paced account Braude's prose glints with humor and humanity *Seattle Times* A gripping narrative history of Napoleon Bonaparte's ten month exile on the Mediterranean island of Elba In the spring of 1814 Napoleon Bonaparte was

defeated Having overseen an empire spanning half the European continent and governed the lives of some eighty million people he suddenly found himself exiled to Elba less than a hundred square miles of territory This would have been the end of him if Europe's rulers had had their way But soon enough Napoleon imposed his preternatural charisma and historic ambition on both his captors and the very island itself plotting his return to France and to power After ten months of exile he escaped Elba with just of over a thousand supporters in tow marched to Paris and retook the Tuileries Palace all without firing a shot Not long after tens of thousands of people would die fighting for and against him at Waterloo Braude dramatizes this strange exile and improbable escape in granular detail and with novelistic relish offering sharp new insights into a largely overlooked moment He details a terrific cast of secondary characters including Napoleon's tragically noble official British minder on Elba Neil Campbell forever disgraced for having let Boney slip away and his young second wife Marie Louise who was twenty two to Napoleon's forty four at the time of his abdication What emerges is a surprising new perspective on one of history's most consequential figures which both subverts and celebrates his legendary persona

The Evolution of Operational Art, 1740-1813 Claus Telp, 2004-08-02 This book is a new look at the evolution of operational art and its complex roots in history

The Frankenstein of 1790 and Other Lost Chapters from Revolutionary France Julia V. Douthwaite, 2012-09-27 The French Revolution brings to mind violent mobs the guillotine and Madame Defarge but it was also a publishing revolution more than 1 200 novels were published between 1789 and 1804 when Napoleon declared the Revolution at an end In this book Julia V Douthwaite explores how the works within this enormous corpus announced the new shapes of literature to come and reveals that vestiges of these stories can be found in novels by the likes of Mary Shelley E T A Hoffmann Honor de Balzac Charles Dickens Gustave Flaubert and L Frank Baum Deploying political history archival research and textual analysis with eye opening results Douthwaite focuses on five major events between 1789 and 1794 first in newspapers then in fiction and shows how the symbolic stories generated by Louis XVI Robespierre the market women who stormed Versailles and others were transformed into new tales with ongoing appeal She uncovers a 1790 story of an automaton builder named Frank nste n links Baum to the suffrage campaign going back to 1789 and discovers a royalist anthem's power to undo Balzac's P re Goriot Bringing to light the missing links between the ancien r gime and modernity

The Frankenstein of 1790 and Other Lost Chapters from Revolutionary France is an ambitious account of a remarkable politico literary moment and its aftermath

The Oxford Handbook of the Ancien Régime William Doyle, 2012 An exploration of current scholarly thinking about the wide and surprisingly complex range of historical problems associated with the study of Ancien R gime Europe

Walled Towns and the Shaping of France M. Wolfe, 2009-08-31 This book focuses on the development of towns in France taking into account military technology physical geography shifting regional networks tying urban communities together and the emergence of

new forms of public authority and civic life A Culture of Improvement Robert Friedel, 2010-02-26 How technological change in the West has been driven by the pursuit of improvement a history of technology from plows and printing presses to penicillin the atomic bomb and the computer Why does technology change over time how does it change and what difference does it make In this sweeping ambitious look at a thousand years of Western experience Robert Friedel argues that technological change comes largely through the pursuit of improvement the deep rooted belief that things could be done in a better way What Friedel calls the culture of improvement is manifested every day in the ways people carry out their tasks in life from tilling fields and raising children to waging war Improvements can be ephemeral or lasting and one person's improvement may not always be viewed as such by others Friedel stresses the social processes by which we define what improvements are and decide which improvements will last and which will not These processes he emphasizes have created both winners and losers in history Friedel presents a series of narratives of Western technology that begin in the eleventh century and stretch into the twenty first Familiar figures from the history of invention are joined by others the Italian preacher who described the first eyeglasses the dairywomen displaced from their control over cheesemaking and the little known engineer who first suggested a grand tower to Gustav Eiffel Friedel traces technology from the plow and the printing press to the internal combustion engine the transistor and the space shuttle Friedel also reminds us that faith in improvement can sometimes have horrific consequences as improved weaponry makes warfare ever more deadly and the drive for improving human beings can lead to eugenics and even genocide The most comprehensive attempt to tell the story of Western technology in many years engagingly written and lavishly illustrated A Culture of Improvement documents the ways in which the drive for improvement has shaped our modern world **Compound Histories** , 2017-11-13 Compound Histories Materials Governance and Production 1760-1840 offers a new view of the period during which Europe took on its modern character and globally dominant position By exploring the intertwined realms of production governance and materials it places chemists and chemistry at the center of processes most closely identified with the construction of the modern world This includes the interactive intensification of material and knowledge production the growth and management of consumption environmental changes regulation of materials markets landscapes and societies and practices embodied in political economy Rather than emphasize revolutionary breaks and the primacy of innovation driven change the volume highlights the continuities and accumulation of incremental changes that framed historical development Contributors are Robert G W Anderson Bernadette Bensaude Vincent Jos Ramon Bertomeu Sanchez John R R Christie Joppe van Driel Frank A J L James Christine Lehman Lissa L Roberts Thomas le Roux Elena Serrano Anna Simmons Marie Thibaud Sorger Sacha Tomic Andreas Weber Simon Werrett *Science and Technology in World History* William E. Arming the World Geoffrey S. Stewart, 2024-05-31 Arming the World tells the story of the American small arms industry from the early 1800s through the post Civil War era Almost from the beginning the United States produced arms in new and radically different ways relying upon machinery to mass produce guns when others still made them by hand Leveraging their technological advantage American gun makers produced guns with interchangeable parts and perfected new types of small arms ranging from revolvers to repeating rifles The federal government's staggering purchases of arms during the Civil War stimulated the development of fast firing breech loading rifles and metal cased ammunition When in 1865 it became clear that every country in the world had to equip itself with modern weapons the Americans had an overwhelming head start Salesmen from Remington Winchester Colt and Smith Wesson and from lesser known firms too traveled the world marketing their guns dominating or perhaps even inventing the international arms business American gun makers sold rifles and side arms by the millions and cartridges by the billions to great powers restive colonies and fading empires alike Adding a new element to the unstable global balance of power American gun makers affected the course of history

Science and Ideology Mark Walker, 2013-10-11 Does science work best in a democracy Were Soviet or Nazi science fundamentally different from science in the USA These questions have been passionately debated in the recent past Particular developments in science took place under particular political regimes but they may or may not have been directly determined by them Science and Ideology brings together a number of comparative case studies to examine the relationship between science and the dominant ideology of a state Cybernetics in the USA is compared to France and the Soviet Union Postwar Allied science policy in occupied Germany is juxtaposed to that in Japan The essays are narrowly focussed yet cover a wide range of countries and ideologies The collection provides a unique comparative history of scientific policies and practices in the 20th century

Staging Authority Eva Giloi, Martin Kohlrausch, Heikki Lempa, Heidi Mehrkens, Philipp Nielsen, Kevin Rogan, 2022-10-24 Staging Authority Presentation and Power in Nineteenth Century Europe is a comprehensive handbook on how the presentation embodiment and performance of authority changed in the long nineteenth century It focuses on the diversification of authority what new forms and expressions of authority arose in that

critical century how traditional authority figures responded and adapted to those changes and how the public increasingly participated in constructing and validating authority It pays particular attention to how spaces were transformed to offer new possibilities for the presentation of authority and how the mediatization of presence affected traditional authority The handbook's fourteen chapters draw on innovative methodologies in cultural history and the aligned fields of the history of emotions urban geography persona studies gender studies media studies and sound studies The Shortest and Most Convenient Route Robert S. Cox, 2004 Based on papers delivered at the Bicentennial Conference for Lewis Clark held in Philadelphia in Aug 2003 these essays grapple in different ways with the motives underlying the Corps of Discovery the impact on American culture The question of failure is used by the authors as a means of interrogating the intellectual cultural context in which the expedition was framed in which its results were distributed Contributors include Robert S Cox also the Ed of the vol Domenic Vitiello S D Kimmel John W Jengo Brett Mizelle Andrew J Lewis Illus *The Great Nation: France from Louis XV to Napoleon* Colin Jones, 2003-05-29 There can be few more mesmerising historical narratives than the story of how the dazzlingly confident and secure monarchy Louis XIV the Sun King left to his successors in 1715 became the discredited debt ridden failure toppled by Revolution in 1789 The further story of the bloody unravelling of the Revolution until its seizure by Napoleon is equally astounding Colin Jones brilliant new book is the first in 40 years to describe the whole period Jones key point in this gripping narrative is that France was NOT doomed to Revolution and that the ancien regime DID remain dynamic and innovatory twisting and turning until finally stoven in by the intolerable costs and humiliation of its wars with Britain **History of Technology Volume 27** Ian Inkster, 2016-09-30 The technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays It deals with the history of technical discovery and change and explores the relationship of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred Volume 27 includes a special issue on The Professional Identity of Engineers Historical and Contemporary Issues
