Enzyme Handbook 12 Dietmar Schomburg,Dörte Stephan,2013-06-29 Recent progress on enzyme immobilisation
enzyme production coenzyme re generation and enzyme engineering has opened up fascinating new fields for the potential
application of enzymes in a large range of different areas As more progress in research and application of enzymes has been
made the lack of an up to date overview of enzyme molecular properties has become more appar ent Therefore we started
the development of an enzyme data information sys tem as part of protein design activities at GBF The present book Enzyme
Hand book represents the printed vers ion of this data bank In future a computer searchable version will be also available
The enzymes in this Handbook are arranged according to the Enzyme Com mission list of enzymes Some 3000 different
enzymes will be covered Fre quently enzymes with very different properties are included under the same EC number
Although we intend to give a representative overview on the char acteristics and variability of each enzyme the Handbook is
not a compendium The reader will have to go to the primary literature for more detailed information Naturally it is not
possible to cover all the numerous literature references for each enzyme for special enzymes up to 40000 if the data
representation is to be concise as is intended **Systems Management** United States. Air Force. Systems Command,1966
