

Installation

Installation is the reverse of removal. Also refer to removal procedures noted above.

CAUTION

Make sure truck is correctly raised and safely blocked using hardwood blocks under the frame. Be sure the blocking will permit installation of the axle without disturbing the blocking.

Note - Bushing must be pressed into silent block to [0.2 mm] .322 minimum depth from end of casting.

1. If silent blocks have been removed from axle, install new silent block assemblies and thrust washers (or spacers, as applicable, depending on steer axle model). See Page 9.7-2 (see Page 9.5-4 for Type 2 axle).
2. Make sure that the silent blocks are positioned correctly front and rear on the steer axle trunnions at the start of installation. Align the silent blocks square with the axle.

3. Use a fork lift truck or mobile floor jack to temporarily support and raise the axle into place under the truck. If another lift truck is used to handle axle, center the forks with about 12 inches spread between them. Place steer axle assembly in secure position on fork tips.

If hydraulic jack is used, be sure axle is securely supported on jack pad.

CAUTION

Heavy components can fall and cause severe injury. Keep your body clear at all times.

4. Install axle assembly into frame by slowly raising it up while guiding silent block bushings into frame sockets.
