## **Class Dynamics Of Agrarian Change Chinese Edition:**

**Class Dynamics of Agrarian Change** Henry Bernstein, 2010 Henry Bernstein argues that class dynamics should be the starting point of any analysis of agrarian change. Providing an accessible introduction to agrarian political economy, he shows clearly how the argument for bringing class back in provides an alternative to inherited conceptions of the agrarian question. He also ably illustrates what is at stake in different ways of thinking about class dynamics and the effects of agrarian change in today's globalized world.

**Transforming Rural China** Guy M. Robinson, 2024-02-12 Over the last four decades China has witnessed dramatic economic growth transforming into an economic powerhouse with considerable consequences for its rural regions. In this timely book, Guy M. Robinson adeptly navigates the principal elements, key events, and significant changes of the transformation of China's countryside.

**Critical Perspectives on Food Sovereignty** Marc Edelman, 2017-10-02 This volume is a pioneering contribution to the study of food politics and critical agrarian studies where food sovereignty has emerged as a pivotal concept over the past few decades with a wide variety of social movements on the ground, experiments and policy innovations flying under its broad banner. Despite its large and growing popularity, the history, theoretical foundations, and political program of food sovereignty have only occasionally received in-depth analysis and critical scrutiny. This collection brings together both longstanding scholars in critical agrarian studies such as Philip McMichael, Bina Agarwal, Henry Bernstein, Jan Douwe van der Ploeg, and Marc Edelman, as well as a dynamic roster of early and mid-career researchers. The ultimate aim is to advance this important frontier of research and organizing and put food sovereignty on stronger footing as a mobilizing frame, a policy objective, and a plan of action for the human future. This volume was published as part one of the special double issue celebrating the 40th anniversary of the *Journal of Peasant Studies*.

**The US-China Rift and Its Impact on Globalisation** Raffaele Sciortino, 2024-02-12 Today, globalisation has entered a critical phase of slowdown. The asymmetrical US-China relationship that has been the fundamental axis up to now has entered into crisis. The financial imperialism of the dollar proves to be increasingly burdensome and destabilizing. The rise of capitalist China is questioning US imperialist levy. This book offers a comprehensive analysis of the looming confrontation while identifying potential points of no return in the intertwined dynamics of the world market, geopolitical configurations, and class relationships. Neither contender can give up the game. Will there be a de-globalisation? Is a multipolar order realistic? Are we facing a Chinese hegemonic challenge or rather first signs that hint at the potential for systemic disintegration?

**Peasants, Capitalism, and Imperialism in an Age of Politico-Ecological Crisis** Mark Tilzey, Fraser Sugden, 2023-09-27 This book utilises a new theoretical approach to understand the dynamics of the peasantry and peasant resistance in relation to capitalism, state, class, and

imperialism in the global South In this companion volume to *Peasants Capitalism and the Work* of Eric R Wolf the authors further develop their thinking on agrarian transitions to capitalism the development of imperialism and the place of the peasantry in these dynamics with special reference to the global South in an era of politico ecological crisis Focusing on the political role of the peasantry in contested transitions to capitalism and to modes of production outside of and beyond capitalism the book contends that an understanding of these dynamics requires an analysis of class struggle and of the resources material and discursive that different classes can bring to bear on this struggle The book focuses on the rise of capitalism in the global South within the context of imperial subordination to the global North and the place of the peasantry in shaping and resisting these dynamics The book presents case studies of contested transitions to agrarian capitalism in Bolivia Ecuador Guatemala Mexico Peru and South Asia It also examines the case of transition to a post capitalist mode of production in Cuba The book concludes with an assessment of the nature of capitalism and imperialism within the context of the contemporary politico ecological crisis and the potential role of the peasantry as agent of emancipatory change towards social and environmental sustainability This book will be of great interest to students and researchers in the areas of peasant studies rural politics agrarian studies development and political ecology

**Developmentalism** Graham Harrison,2020-06-19 Why do so few countries achieve development success Achieving development requires many changes over a short period of time generating instability and risk It is a deep and integrated economy of change involving force strategic thinking and ideological conviction it emerges when successful development is seen as necessary for the survival of a political order Developmentalism engages with the moral issues that this raises Developmentalism The Normative and Transformative within Capitalism uses a historical comparative approach to understand development as a transformation which involves a deep and integrated political economy of change a shift from a state of capital ascendance to capital dominance It is only through a transformation towards capital dominance that mass poverty reduction and the construction of a commonwealth are possible However capitalist development is extremely difficult and requires a highly exacting political endeavour The politics of development is conceptualized as developmentalism a strategy and ideology in which governments

exercise heavy directive power endure instability and crisis and secure a rudimentary legitimacy for their efforts This book argues that developmentalism requires a conflation of successful capitalist transformation with some form of existential insecurity of the state itself It flourishes when capitalist transformation connects to profound questions of sovereignty statehood nation building and elite survival Developmentalism shows deep contextualisation of capitalist transformation as well as the massive improvements in material life that it has generated

[Marx in the Field](#) Alessandra Mezzadri, 2021-02-15 Marx in the Field is a unique edited collection illustrating the relevance of the Marxian method to study contemporary capitalism and the global development process Essays in the collection bring Marx to the field in three ways They illustrate how Marxian categories can be concretely deployed for field research in the global economy they analyse how these categories may be adapted during fieldwork and they discuss data collection methods supporting Marxian analysis Crucially many of the contributions expand the scope of Marxian analysis by combining its insights with those of other intellectual traditions including radical feminisms critical realism and postcolonial studies The book defines the possibilities and challenges of fieldwork guided by Marxian analysis including those emerging from the COVID 19 pandemic The collection takes a global approach to the study of development and of contemporary capitalism While some essays focus on themes and geographical areas of long term concern for international development like informal or rural poverty and work across South Asia Southern and West Africa or South America others focus instead on actors benefitting from the development process like regional exporters larger farmers and traders or on unequal socio economic outcomes across richer and emerging economies and regions including Gulf countries North America Southern Europe or Post Soviet Central and Eastern Europe Some essays explore global processes cutting across the world economy connecting multiple regions actors and inequalities While some of the contributions focus on classic Marxian tropes in the study of contemporary capitalism like class labour and working conditions agrarian change or global commodity chains and prices others aim at demonstrating the

relevance of the Marxian method beyond its traditional boundaries for instance for exploring the interplays between food nutrition and poverty the links between social reproduction gender and homework the features of migration and refugees regimes tribal chieftaincy structures or prison labour or the dynamics structuring global surrogacy Overall through the analysis of an extremely varied set of concrete settings and cases this book illustrates the extraordinary insights we can gain by bringing Marx in the field

**Rural Wage Employment in Developing Countries** Carlos Oya,Nicola Pontara,2015-05-22 There is a striking scarcity of work conducted on rural labour markets in the developing world particularly in Africa This book aims to fill this gap by bringing together a group of contributors who boast substantial field experience researching rural wage employment in various developing countries It provides critical perspectives on mainstream approaches to rural agrarian development and analysis of agrarian change and rural transformations from a long term perspective This book challenges the notion that rural areas in low and middle income countries are dominated by self employment It purports that this conventional view is largely due to the application of conceptual frameworks and statistical conventions that are ill equipped to capture labour market participation The contributions in this book offer a variety of methodological lessons for the study of rural labour markets focusing in particular on the use of mixed methods in micro level field research and more emphasis on capturing occupation multiplicity The emphasis on context history and specific configurations of power relations affecting rural labour market outcomes are key and reoccurring features of this book This analysis will help readers think about policy options to improve the quantity and quality of rural wage employment their impact on the poorest rural people and their political feasibility in each context
