Fighting the Forever War Lisa M. Munday, 2022-02-21 During two decades of fighting in Afghanistan U S service members confronted numerous challenges in their mission to secure the country from the threat of al Qaeda and the Taliban and assist in rebuilding efforts Because the wars in Iraq and Afghanistan occurred simultaneously much of the American public conflated them or failed to notice the Afghanistan War and most of the war's archival material remains classified and closed to civilian researchers Drawing on interviews and letters home this book relates the Afghanistan War through the experiences of American troops with firsthand accounts of both combat and humanitarian operations the environment living conditions and interactions with the locals

Proxy Wars Eli Berman, David A. Lake, 2019-03-15 The most common image of world politics involves states negotiating cooperating or sometimes fighting with one another billiard balls in motion on a global pool table Yet working through local proxies or agents through what Eli Berman and David A Lake call a strategy of indirect control has always been a central tool of foreign policy Understanding how countries motivate local allies to act in sometimes costly ways and when and how that strategy succeeds is essential to effective foreign policy in today's world In this splendid collection Berman and Lake apply a variant of principal agent theory in which the alignment of interests or objectives between a powerful state and a local proxy is central Through analysis of nine detailed cases Proxy Wars finds that when principals use rewards and punishments tailored to the agent's domestic politics proxies typically comply with their wishes when the threat to the principal or the costs to the agent increase the principal responds with higher powered incentives and the proxy responds with greater effort if interests diverge too much the principal must either take direct action or admit that indirect control is unworkable Covering events from Denmark under the Nazis to the Korean War to contemporary Afghanistan and much in between the chapters in Proxy Wars engage many disciplines and will suit classes taught in political science economics international relations security studies and much more

Teaching and Learning at a Distance Michael Simonson, Susan Zvacek, 2024-01-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of

distance education programs The teacher or trainer who uses this book will be able to design courses evaluate programs and identify issues and trends affecting the field In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research asserting that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more Equivalency theory is the fourth theme of the book Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It can serve as a stand alone source of information
