Claiming Knowledge Claiming Knowledge:

The Micropolitics of Knowledge Emmanuel Lazega, 2024-11-01 For many years Emmanuel Lazega has explored communication behavior and decision making processes of small workgroups within larger organizations To account for the knowledge claims of members of those groups and for the ways in which such claims are legitimated collectively and translated into action he presents a theory of the interactive elaboration of information on which decisions are based

From Belief to Knowledge Neil Douglas, Terry Wykowski, 2010-10-18 Belief is not knowledge but we tend to hold our beliefs as if they represent knowledge selecting whatever evidence is required to justify them And because humans tend to cling to their beliefs as truths organizations often ignore the need for change no matter how urgent that need From Belief to Knowledge Achieving and Sustaining an Adaptive Culture in Organizations offers potential change agents an integrative analysis and treatment of the problem of organizational learning It demonstrates the importance of looking beneath beliefs and assumptions to find the roots and persistent influences that preserve them It gives us a much broader definition of organizational knowledge than that associated with information technology and the currently popular idea of knowledge as an asset Furthermore it provides an alternative view of culture and change one that is defined by the ability to continually align collective beliefs with reality Douglas and Wykowski answer the question that lingers in the minds of many managers What does organizational learning mean and how does it influence ongoing organizational success Lee Newick Shell Downstream Rather than offer simple recipes this book shows how good leaders can evolve and sustain an adaptive culture that develops knowledge through purposeful human interaction It explores key dynamics of learning considers the diversity of beliefs present in any group and demonstrates ways that those leaders can explore and encourage the potential of both the group and individuals within the group Although this book is geared to organizational change it has the potential to change all areas of human endeavor David Julian Hodges City University of New York

Key Issues in the New Knowledge Management Joseph M. Firestone, Mark W. McElroy, 2012-06-25 In Key Issues in the New Knowledge Management Firestone and McElroy the architects of the New Knowledge Management TNKM provide an in depth analysis of the most important issues in the field of Knowledge Management The issues the book addresses are central in the field today The Knowledge Wars or the issue of how you define knowledge determines how you manage it The nature of knowledge processing Information management or knowledge management Three views on the evolution of knowledge management The role of knowledge claim evaluation in knowledge processing or the difference between opinion judgements information data and real knowledge in knowledge management systems Is culture a barrier in knowledge management The Open Enterprise and accelerated sustainable innovation Portals How should one evaluate KM software Intellectual Capital Measuring the impact of KM initiatives on the organization and the bottom line KM and terrorism

Intelligence Integration in Distributed Knowledge Management Król, Dariusz, Nguyen, Ngoc Thanh, 2008-07-31 This book covers a broad range of

intelligence integration approaches in distributed knowledge systems from Web based systems through multi agent and grid systems ontology management to fuzzy approaches Provided by publisher *Enterprise Information Portals and Knowledge Management* Joseph M. Firestone,2003 Practical and comprehensive approach to enterprise portals and their relationship to knowledge management Anonymous Skeptics Lance Ashdown,2002 At its deepest philosophical skepticism questions the sense of language Skepticism manifests itself in different forms three of the most powerful being logical external world and religious skepticism How has philosophy of religion addressed these challenges The attempt to answer this question leads Lance Ashdown to a consideration of three prominent contemporary philosophers of religion Richard Swinburne John Hick and William Alston The author shows that these philosophers are indeed open to the criticisms of the three types of skepticism mentioned above According to Ashdown they are rightly to be considered as anonymous skeptics Readers familiar with the work of the theologian Karl Rahner will recognize an echo of his famous doctrine that non Christian religious believers are really anonymous Christians i e Christian believers who do not recognize themselves as such In a similar way the philosophers of religion under consideration are skeptics who most certainly would not identify themselves as such They are anonymous skeptics in the sense that their epistemologies create the very conditions that allow for the severe and on their own terms unanswerable challenges of skepticism At the same time none of these philosophers thinks that skeptical objections pose a devastating or unanswerable threat to their epistemologies For example each of them is an avowed believer in God and is fully aware of the challenge of religious skepticism yet none believes that skepticism need cause a rational Christian to abandon his or her beliefs Nevertheless each of the three philosophers adheres to a philosophical theory that remains open to the devastating critique of Philo in David Hume s essay Dialogue Concerning Natural Religion who argues at his deepest that talk of God is meaningless The Broadview Introduction to Philosophy Volume I: Knowledge and Reality Andrew Bailey,2019-06-18 This volume of The Broadview Introduction to Philosophy offers a thoughtful selection of readings in epistemology metaphysics and the philosophy of religion Substantial selections from important historical texts are provided including the entirety of Descartes s Meditations as are a number of contemporary readings on each topic Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms

Concept Of The Knowledge Of God Brian Haymes,2016-01-03 **Knowledge by Agreement** Martin Kusch,2004 Martin Kusch puts forth two controversial ideas that knowledge is a social status like money or marriage and that knowledge is primarily the possession of groups rather than individuals He defends the radical implications of his views that knowledge is political and that it varies with communities This bold approach to epistemology is a challenge to philosophy and the wider academic world **The Argumentative Turn in Policy Analysis and Planning** Frank Fischer,John Forester,1993

Drawing upon the work of such theorists as Foucault Habermas Toulmin and Wittgenstein this book brings recent work on language and argumentation to bear on the practical concerns of policy analysis and planning The European and US contributors to the book examine the interplay of language action and power in terms of both applied policy and theoretical debates Emphasizing the political nature of the work of planners and policy makers the book stresses the role of persuasive arguments in practical decision contexts Recognizing the rhetorical communicative character of planning and policy deliberations the writers demonstrate that policy arguments are necessarily selective both shaping and being shaped by power relations

Contextualisms in Epistemology Elke Brendel, Christoph Jäger, 2005-03-02 Contextualism has become one of the leading paradigms in contemporary epistemology According to this view there is no context independent standard of knowledge and as a result all knowledge ascriptions are context sensitive Contextualists contend that their account of this analysis allows us to resolve some major epistemological problems such as skeptical paradoxes and the lottery paradox and that it helps us explain various other linguistic data about knowledge ascriptions The apparent ease with which contextualism seems to solve numerous epistemological quandaries has inspired the burgeoning interest in it This comprehensive anthology collects twenty original essays and critical commentaries on different aspects of contextualism written by leading philosophers on the topic The editors introduction sketches the historical development of the contextualist movement and provides a survey and analysis of its arguments and major positions The papers explore inter alia the central problems and prospects of semantic or conversational contextualism and its main alternative approaches such as inferential or issue contextualism epistemic contextualism and virtue contextualism They also investigate the connections between contextualism and epistemic particularism and between contextualism and stability accounts of knowledge Elke Brendel is Professor of Philosophy at the Johannes Gutenberg University in Mainz Germany She has published numerous articles on logic epistemology the philosophy of science and the philosophy of language She is the author of *Die Wahrheit über den Lügner* The Truth About the Liar 1992 *Grundzüge der Logik II Klassen Relationen Zahlen Foundations of Logic II Sets Relations Numbers* with Wilhelm K Essler 1993 and *Wahrheit und Wissen Truth and Knowledge* 1999 Christoph Jäger is Lecturer in Philosophy at Aberdeen University United Kingdom and Privatdozent of Philosophy honorary office at the University of Leipzig Germany He has published numerous articles on epistemology the philosophy of mind and the philosophy of religion Books *Selbstreferenz und Selbstbewusstsein Self reference and Self knowledge* 1999 *Analytische Religionsphilosophie Analytic Philosophy of Religion* ed 1998 *Kunst und Erkenntnis Art and Knowledge* ed with Georg Meggle 2004 *Religion und Rationalität Religion and Rationality* forthcoming

Analytical Philosophy of Knowledge , **A Teacher, His Students, and the Great Questions of Life, Second Edition** John C. Morgan,2017-01-13 Throughout history philosophers have attempted to unravel the mystery of life People from many diverse traditions have been invited to sit face to face at the table of philosophy to engage in analytical and critical reflection in what Dr John Morgan calls the great questions of life This book invites students to explore the meaning of life in an easy and understandable manner through the infamous character Professor Plotinus The antics of Professor Plotinus make philosophy interesting uncomplicated and easy to grasp while deeply compelling It allows our minds to wonder and listen to the wisdom of the ages that life has meaning and purpose if we only loosen the chains of dogma and venture out of our caves as we attempt to see life in a fresh way from the Preface by Linda Lewis Riccardi Adjunct Professor of Humanities and Philosophy Reading Area Community College Mystics and Scholars Harold Coward,Terence Penelhum,1977-03 In September of 1976 a group of some fifty scholars and practising mystics gathered at the University of Calgary The chief objective of the Conference was to ponder and assess the nature of mysticism in its Eastern Western and North American Indian forms The method the Conference followed was somewhat unusual in that it aimed at a dialogue between the practising mystics and the scholars What this book presents to the reader is not the outcome of the dialogue but the personal statements and papers from which the dialogue began Of course there is a degree to which the dialogue is already present in that the papers of the scholars were written with the statements of the mystics in hand Among some of the philosophers present a set of more formal comments on each others presentations was recorded and these have been included The Knowledge Base in Educational Administration Robert Donmoyer,Michael Imber,James Joseph Scheurich,1995-07-01 For scholars and practitioners who are interested in or are concerned about knowledge based issues this book provides a needed antidote to narrow discussions of foundational issues The editors of this book maintain that discussions of a knowledge base in educational administration have typically been limited to a fairly traditional range of scholarly commentary reflective of the status quo within departments of educational administration over the past several decades Other views such as feminist views race ethnic based orientations those that dispute the very idea of a knowledge base and those that simply expand the traditional range have been given little attention within the knowledge base discourse The purpose of this book is thus to open up this discourse by broadening the range of viewpoints being considered **Epistemic Luck** Duncan Pritchard,2005 Offering a philosophical examination of the concept of luck and its relationship to knowledge this text demonstrates how a more nuanced understanding of the relationship between knowledge and luck can enable us to see past some of the most intractable disputes in the contemporary theory of knowledge *Knowledge from Non-Knowledge* Federico Luzzi,2019-08

Challenges the idea that knowledge of a conclusion requires knowledge of essential premises a widely accepted concept in epistemology The Theory of the Knowledge Square: The Fuzzy Rational Foundations of the Knowledge-Production Systems Kofi Kissi Dompere, 2012-08-28 The monograph is about a meta theory of knowledge production process and the logical pathway that connects the epistemic possibility to the epistemic reality It examines the general conditions of paradigms for information processing and isolates the classical and fuzzy paradigms for comparative analysis The sets of conditions that give rise to them are defined stated and analyzed to abstract the corresponding sets of laws of thought The fuzzy paradigm with its corresponding logic and mathematics is related to inexact symbolism for the defective information structure where the results of the knowledge production must satisfy the epistemic conditionality composed of fuzzy conditionality and fuzzy stochastic conditionality under the principle of logical duality with continuum The classical paradigm with its corresponding logic and mathematics is related to exact symbolism for exact information structure where the vagueness component of the defectiveness is assumed away and where the results of the knowledge production must satisfy no epistemic conditionality or at the maximum only the stochastic conditionality under the principle of logical dualism with excluded middle It is argued that the epistemic path that links ontological space to the epistemological space is information The ontological space is taken as the primary category of reality while the epistemological space is shown to be a derivative Such information is universally defective and together with assumptions imposed guides the development of paradigms with their laws of thought logic of reasoning mathematics and computational techniques The relational structure is seen in terms of logical trinity with a given example as matter information energy transformational trinity which is supported by the time trinity of past present future relationality The book is written for professionals researchers and students working in philosophy of science decision choice theories economies sciences computer science engineering cognitive psychology and researchers working on or interested in fuzzy paradigm fuzzy logic fuzzy decisions and phenomena of vagueness and ambiguities fuzzy mathematics fuzzy stochastic processes and theory of knowledge It is further aimed at research institutions and libraries The subject matter belongs to extensive research and development taking place on fuzzy phenomena and the debate between the fuzzy paradigm and the classical paradigm relative to informatics synergetic science and complexity theory The book will have a global appeal and across disciplines Its strength besides the contents is the special effort that is undertaken to make it relevant and accessible to different areas of sciences and knowledge production
