W. Higman,2017-06-15 There are few truths about the modern world that are more self evident than this it is flat We write on flat paper laid atop flat desks We look at flat images on flat screens mounted on flat walls or we press flat icons on flat phones while we navigate flat streets Everywhere we go it seems the structures around us at one time or another had a level placed upon them to ensure they were perfectly flat Yet such engineered planar surfaces have become so pervasive and fundamental to our lives that we barely notice their existence In this highly original study B W Higman employs a wide variety of approaches to better understand flatness that level platform upon which the dramas of modern life have played out Higman looks at the ways that humans have perceived the natural world around them moving from Flat Earth theories to abstract geometric concepts to the flatness problem of modern cosmology Along the way he shows that we have simultaneously sought flatness in our everyday lives and also disparaged it as a featureless empty and monotonous quality He discusses the ways flatness figures as a metaphor for those things or people who are boring dull or lacking energy or inspiration and he shows how the construction of flat surfaces has contributed to a degradation of visual diversity At the same time he also shows how we have pursued flatness as an engineering ideal and how we have used it conceptually in art music and literature Written with wit and wisdom and splendidly illustrated throughout this book will appeal to all those who are interested in the topography of the modern world to anyone who has ever marveled at the feel of its smooth surfaces or felt oppressed by the tyranny of its featurelessness     **Old Buildings, New Forms** Francoise Bollack,2013-11-12 It is clear that working with historic structures is both more environmentally sustainable and cost effective than new architecture and construction and many believe that the best design occurs at the intersection of old and new Fran oise Astorg Bollack presents 28 examples gathered in the United States and throughout Europe and the Middle East Some are well known Mass MOCA Market Santa Caterina in Barcelona Neues Museum in Berlin and others are almost anonymous But all demonstrate a unique and appropriate solution to the problem of adapting historic structures to contemporary uses This survey of contemporary additions to older buildings is an essential addition to the architectural

literature I have always loved old buildings An old building is not an obstacle but instead a foundation for continued action Designing with them is an exhilarating enterprise adding to them grafting inserting knitting new pieces into the existing built fabric is endlessly stimulating Fran oise Astorg Bollack     **Time Frames** Ugo Carughi,Massimo Visone,2017-04-28 Time

Junjie Xi,2018-04-09 This book investigates the design operation and use of contemporary transportable buildings and explores how functional performance can be assessed in small scale examples for public use alongside their relationship to other design elements The research focuses on three case studies Chengdu Hualin Elementary School Exxopolis and Kreod that do not require a high technology building environment or complex construction skills Transportable buildings are defined as those that are transported in a number of parts for assembly on site Contemporary transportable buildings respond to ecological issues social impacts technological innovation and economic demands They can be used to measure a society s development in environmental sustainability innovation and economic growth through various forms Small scale transportable buildings fulfil many temporary habitation needs in diverse roles such as non emergency transitional housing ephemeral exhibition buildings and seasonal entertainment facilities Small Scale Public Transportable and Pre Fabricated Buildings will be a useful research text for academics and students in architecture design and sustainable building performance     **Cidade sustentável: um conceito em construção , Cahiers nouveaux - 81 , American Book Publishing Record** ,1984-04
