Tilley, 2006-01-26 Provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things This handbook charts an interdisciplinary field of studies that makes a fundamental contribution to an understanding of what it means to be human

Asian Heritage Management Kapila Silva, Neel Kamal Chapagain, 2013-03-05 The prevalent global heritage discourse has been primarily Euro centric in its origin premise and praxis Diverse cultural historical and geographical contexts such as that of Asia call for more context specific approaches to heritage management This book explores this complexity of managing the cultural heritage in Asia Case studies include sites of Angkor Himeji Castle Kathmandu Valley Luang Prabang Lumbini and Malacca and the book uses these to explore the religious worldviews heritage policies intangible heritage dimensions traditional preservation practices cultural tourism and the notion of cultural landscape that are crucial in understanding the cultural heritage in Asia It critiques the contemporary regulatory frameworks in operation and focuses on the issues of global impact on the local cultures in the region The book goes on to emphasize the need for integrated heritage management approaches that encompass the plurality of heritage conservation concerns in Asian countries Themes are discussed from the vantage point of heritage scholars and practitioners in the South Southeast and East Asia This book thus presents a distinctive Asian perspective which is a valuable source for students and practitioners of heritage within and beyond the Asian context

Keep It Moving? Rachel Rivenc, Reinhard Bek, 2018-03-13 Kinetic art not only includes movement but often depends on it to produce an intended effect and therefore fully realize its nature as art It can take a multiplicity of forms and include a wide range of motion from motorized and electrically driven

movement to motion as the result of wind light or other sources of energy Kinetic art emerged throughout the twentieth century and had its major developments in the 1950s and 1960s Professionals responsible for conserving contemporary art are in the midst of rethinking the concept of authenticity and solving the dichotomy often felt between original materials and functionality of the work of art The contrast is especially acute with kinetic art when a compromise between the two often seems impossible Also to be considered are issues of technological obsolescence and the fact that an artist's chosen technology often carries with it strong sociological and historical information and meanings

Dictionary of Museology

François Mairesse, 2023-04-05 The internationally focused Dictionary of Museology reflects the diversity of cultural and disciplinary approaches to theory and practice in the museum field today The museum world is changing rapidly and the characteristics and social roles of the world's approximately 100 000 existing museums are constantly evolving In addition to their traditional functions of preservation research and communication museums are increasingly addressing issues related to social inclusion human rights sustainable development and finances all of which are explored in this dictionary Drawing on the support of an international editorial committee including influential figures from the US Canada Brazil Japan Spain Germany France and the UK this collaborative work produced by over 100 researchers from around the world provides an overview of this unique field by defining over 1 000 terms relating to museology The Dictionary of Museology is intended for a broad spectrum of museum professionals academics researchers and students The book will be especially useful to those working with international partners since a common lexicon that conveys the complex reality of current social and cultural values is particularly vital for those working across borders

The State and Nation-Building Processes in Kenya since Independence

Waiyego Mwangi, Omondi Opongo, 2019-06-25 Kenya's nationalism during the colonial period was marked by two main characteristics that feature in this book First the struggle for independence that was mainly characterized by the claim for land that had been taken away by the colonizers Second was the struggle for autonomy and self-determination mainly through political resistance The authors in this book analyse historical trajectories of Kenya's nationalism trends while highlighting the role of political leaders large as well as small ethnic groups perennial conflicts community as well as religious leaders among others The discussions demonstrate that quest for a national identity that is inclusive at all levels whether politically economically religiously and ethnically has marked Kenya's struggle for nationalism sometimes leading to violence especially during election periods national unity through political coalitions and reconciliation as well as institutional reforms In conclusion the authors demonstrate that while Kenya is gradually advancing towards national cohesion there are still many challenges yet to be surmounted

Landscape Ecology for Sustainable Society

Sun-Kee Hong, Nobukazu Nakagoshi, 2018-03-23 The research category of the landscape ecology which researches the structure functions and the spatio-temporal changes of the ecological landscapes has now been contributing to the human life and the shifts of the socio-economic paradigm Global warming has been influencing the universal life patterns of the

mankind which have been maintained in the past several hundreds of years And it has been having the influences on the international social problems and economic problems Although the diverse plans for adapting to the climate changes have been the topics of the conservations among the ecologists internationally it is the reality that the speed of the changes of the environment has been quicker than the time it takes to complete the solutions In order to maintain the sustainable earth and the sustainable society the role of the landscape ecology has been coming to the fore Especially the theories and the methodologies of the landscape ecology have been applied to the multidisciplinary researches by going beyond the research category of ecology including the maximization of the efficiencies of the land spaces the management of the ecological space habitats in which the biological diversity can be maintained the utilization of the resources that are absolutely needed by the human beings Here it is compressed to water energy and food etc and until reaching the human society It is considered that to that extent the utilizations and the applications of the landscape ecology are very much needed for the diagnoses and the evaluations of the global environmental problems which have been proceeded with rapidly in the modernity This book is not comprised of any general remarks that explain the theories and the methods of the landscape ecology Already based on the basic theories of the landscape ecology the writers have conducted the investigations on the farm villages the cities and the coastal ecosystems And through the space analyses and interpretations the structure and functions of the landscapes were analyzed Of course in this book too the diverse ecosystems and the landscape ecological methodologies regarding the land use have been presented However the core of this book focuses more on what role the landscape ecology must play for the materialization of a sustainable society in the future At the farm villages the sustainable agriculture will be presented and at the cities the discussions on the green networks and the energies will be proceeded with Also regarding the coasts and the seas a thesis on the safety of the life zones of the residents adjacent to the sea and on the conservation of the island ecosystems will be presented The sustainable society is a system that is formed by having the sustainable development as a basis It is considered to be one aspect within a kind of a sustainable process with regard to which the natural world and the human world coexist and are in a symbiotic relationship harmoniously In order to maintain the biodiversity the reasonable adjustments of the human activities like the use of the resources are absolutely needed Without the biological resources the cultural diversity of the human beings too cannot exist Consequentially recently and internationally there are a lot of the case examples that express the biocultural diversity by linking the biological diversity with the cultural diversity In this book the role of the landscape ecology as an academic link which can connect the two possible if possible is highly expected It is indeed the biocultural landscape It can be said that this concept also is the interconnection of the multidisciplinary spaces that must be dealt with in the modern landscape ecology Through this book it is intended to present a new directionality which can contribute to the sustainable society at the same time as the organization of the theories and the methods of the landscape ecology

Ancient West Asian Civilization Akira Tsuneki, Shigeo Yamada, Ken-ichiro Hisada, 2016-08-19 This book

explores aspects of the ancient civilization in West Asia which has had a great impact on modern human society agriculture metallurgy cities writing regional states and monotheism all of which appeared first in West Asia during the tenth to first millennia BC The editors specifically use the term West Asia since the Middle East is seen as an Eurocentric term By using this term the book hopes to mitigate potential bias i e historical and Western by using a pure geographical term However the West Asia region is identical to that of the narrower Middle East which encompasses modern Iran and Turkey from east to west and Turkey and the Arabian Peninsula from north to south This volume assembles research from different disciplines such as the natural sciences archaeology and philology linguistics in order to tackle the question of which circumstances and processes these significant cultural phenomena occurred in West Asia Scrutinizing subjects such as the relations between climate geology and human activities the origins of wheat cultivation and animal domestication the development of metallurgy the birth of urbanization and writing ancient religious traditions as well as the treatment of cultural heritage the book undertakes a comprehensive analysis of West Asian Civilization that provided the common background to cultures in various areas of the globe including Europe and Asia These contributions will attempt to demonstrate a fresh vision which emphasizes the common cultural origin between Europe and West Asia standing in opposition to the global antagonism symbolized by the theory of Clash of Civilizations

Preservation Education Barry L. Stiefel, Jeremy C. Wells, 2014-09-02 Over the past twenty years there has been a fundamental shift in the institutional organization of historic preservation education Historic preservation is the most recent arrival in the collection of built environment disciplines and therefore lacks the pedagogical depth and breadth found in allied endeavors such as architecture and planning As the first degree programs in preservation only date to the 1970s and the first doctoral programs to the 1990s new faculty are confronted with pedagogical challenges that are unique to this relatively nascent field Based on a conference that included educators from around the world Barry L

Stiefel and Jeremy C Wells now present a collection that seeks to address fundamental issues of preservation pedagogy outcome based education and assessment and global issues of authenticity and significance in historic preservation The editors argue that the subject of the analysis has shifted from What is the best way to fix a historic building to What are the best ways for teaching people how to preserve historic properties and why according to the various standards that have been established This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines

Game After Raiford Guins, 2014-01-24 A cultural study of video game afterlife whether as emulation or artifact in an archival box or at the bottom of a landfill We purchase video games to play them not to save them What happens to video games when they are out of date broken nonfunctional or obsolete Should a game be considered an ex game if it exists only as emulation as an artifact in museum displays in an archival box or at the bottom of a landfill In *Game After* Raiford Guins focuses on video games not as hermetically sealed within time capsules of the past but on their material remains how and where video games persist in the present Guins meticulously investigates the complex life cycles of video games to show how their meanings uses and values shift in an afterlife of disposal ruins and remains museums archives and private collections Guins looks closely at video games as museum objects discussing the recontextualization of the Pong and Brown Box prototypes and engaging with curatorial and archival practices across a range of cultural institutions aging coin op arcade cabinets the documentation role of game cartridge artwork and packaging the journey of a game from flawed product to trash to memorialized relic as seen in the history of Atari s infamous E T The Extra Terrestrial and conservation restoration and re creation stories told by experts including Van Burnham Gene Lewin and Peter Takacs The afterlife of video games whether behind glass in display cases or recreated as an iPad app offers a new way to explore the diverse topography of game history

Archaeology in Society Marcy Rockman, Joe Flatman, 2011-11-17 The practice of archaeology has many different facets from academia to government to cultural resource management to public media Considering the place of archaeology in society means understanding the role that archaeology has in the present day and a sense of the contributions that it can make in each of these areas both now and in the future Archaeologists come to the field to pursue a variety of interests teaching examining history preserving the environment or studying a specialized time period or interest The outside world has a number of other expectations of archaeology preservation tourism and education to name but a few From a broad and varied background the editors have compiled a rare group of contributors uniquely qualified to address questions about the current state of archaeology and its relevance in society There is no single answer to the question of how the field of archaeology should develop and what it can do for society Instead the authors in this volume lay out the many ways in which archaeology is relevant to the present day considering for example climate change energy exploration warfare national identity the importance of stories and how they are told and how and why opportunities to engage with the past through museums digs television classes and the print media have the form they currently do creating a

state of the art tool for archaeologists policymakers and the public alike to understand the work of many in the field and address the challenges we all face Adaptive Reuse of the Built Heritage Bie Plevoets, Koenraad Van Cleempoel, 2019-04-18 Adaptive reuse the process of repairing and restoring existing buildings for new or continued use is becoming an essential part of architectural practice As mounting demographic economic and ecological challenges limit opportunities for new construction architects increasingly focus on transforming and adapting existing buildings This book introduces adaptive reuse as a new discipline It provides students and professionals with the understanding and the tools they need to develop innovative and creative approaches helping them to rethink and redesign existing buildings a skill which is becoming more and more important Part I outlines the history of adaptive reuse and explains the concepts and methods that lie behind new design processes and contemporary practice Part II consists of a wide range of case studies representing different time periods and strategies for intervention Iconic adaptive reuse projects such as the Caixa Forum in Madrid and the Rijksmuseum in Amsterdam are discussed alongside less famous and spontaneous transformations such as the Kunsthaus Tacheles in Berlin in addition to projects from Italy Spain Croatia Belgium Poland and the USA Featuring over 100 high quality color illustrations Adaptive Reuse of the Built Heritage is essential reading for students and professionals in architecture interior design heritage conservation and urban planning *The Ethics of Emerging Media* Bruce E. Drushel, Kathleen German, 2011-03-17 The Ethics of Emerging Media engages with enduring ethical questions while addressing critical questions concerning ethical boundaries at the forefront of new media development This collection provides a rare opportunity to ask how emerging media affect the ethical choices in our lives and the lives of people across the globe Centering on different new media forms from eBay to Wikipedia each chapter raises questions about how changing media formats affect current theoretical understanding of ethics By interrogating traditional ethical theory we can better understand the challenges to ethical decision making in an age of rapidly evolving media Each chapter focuses on a specific case within the broader conceptual fabric of ethical theory The case studies ground the discussion of ethics in practical applications while at the same time addressing moral dilemmas that have plagued us for generations The specific applications will undoubtedly continue to unfold but the ethical questions will endure **Trends in Architecture and Design** Hare KILIÇASLAN, Güneş MUTLU AVINÇ, 2025-07-11
