New Mexico and the Pimería Alta John G. Douglass, William Graves, 2017-03-01 Focusing on the two major areas of the Southwest that witnessed the most intensive and sustained colonial encounters New Mexico and the Pimería Alta compares how different forms of colonialism and indigenous political economies resulted in diverse outcomes for colonists and Native peoples Taking a holistic approach and studying both colonist and indigenous perspectives through archaeological ethnohistoric historic and landscape data contributors examine how the processes of colonialism played out in the American Southwest Although these broad areas New Mexico and southern Arizona northern Sonora share a similar early colonial history the particular combination of players sociohistorical trajectories and social relations within each area led to and were transformed by markedly diverse colonial encounters Understanding these different mixes of players history and social relations provides the foundation for conceptualizing the enormous changes wrought by colonialism throughout the region The presentations of different cultural trajectories also offer important avenues for future thought and discussion on the strategies for missionization and colonialism The case studies tackle how cultures evolved in the light of radical transformations in cultural traits or traditions and how different groups reconciled to this change A much needed up to date examination of the colonial era in the Southwest New Mexico and the Pimería Alta demonstrates the intertwined relationships between cultural continuity and transformation during a time of immense change and highlights contemporary

Rock Art Studies: News of the World V Paul Bahn, Natalie Franklin, Matthias Strecker, 2016-05-31 This is the fifth volume in the series Rock Art Studies News of the World Like the previous editions it covers rock art research and management across the globe over a five year period in this case the years 2010 to 2014 inclusive **Violence and Warfare among**

Hunter-Gatherers Mark W Allen, Terry L Jones, 2016-07-01 How did warfare originate Was it human genetics Social competition The rise of complexity Intensive study of the long term hunter gatherer past brings us closer to an answer The original chapters in this volume examine cultural areas on five continents where there is archaeological ethnographic and historical evidence for hunter gatherer conflict despite high degrees of mobility small populations and relatively egalitarian social structures Their controversial conclusions will elicit interest among anthropologists archaeologists and those in conflict studies **California Mission Landscapes** Elizabeth Kryder-Reid, 2016-11-30 Nothing defines California and our nation's heritage as significantly or emotionally says the California Mission Foundation as do the twenty one missions that

were founded along the coast from San Diego to Sonoma Indeed the missions collectively represent the state's most iconic tourist destinations and are touchstones for interpreting its history Elementary school students today still make model missions evoking the romanticized versions of the 1930s Does it occur to them or to the tourists that the missions have a dark history California Mission Landscapes is an unprecedented and fascinating history of California mission landscapes from colonial outposts to their reinvention as heritage sites through the late nineteenth and twentieth centuries Illuminating the deeply political nature of this transformation Elizabeth Kryder Reid argues that the designed landscapes have long recast the missions from sites of colonial oppression to aestheticized and nostalgia drenched monasteries She investigates how such landscapes have been appropriated in social and political power struggles particularly in the perpetuation of social inequalities across boundaries of gender race class ethnicity and religion California Mission Landscapes demonstrates how the gardens planted in mission courtyards over the past 150 years are not merely anachronistic but have become potent ideological spaces The transformation of these sites of conquest into physical and metaphoric gardens has reinforced the marginalization of indigenous agency and diminished the contemporary consequences of colonialism And yet importantly this book also points to the potential to create very different visitor experiences than these landscapes currently do Despite the wealth of scholarship on California history until now no book has explored the mission landscapes as an avenue into understanding the politics of the past tracing the continuum between the Spanish colonial period emerging American nationalism and the contemporary heritage industry **Fisher-Hunter-Gatherer Complexity in North America** Christina

The Human Swarm Mark W. Moffett,2019-04-16 The epic story and ultimate big history of how human society evolved from intimate chimp communities into the sprawling civilizations of a world dominating species If a chimpanzee ventures into the territory of a different group it will almost certainly be killed But a New Yorker can fly to Los Angeles or Borneo with very little fear Psychologists have done little to explain this for years they have held that our biology puts a hard upper limit about 150 people on the size of our social groups But human societies are in fact vastly larger How do we manage by and large to get along with each other In this paradigm shattering book biologist Mark W. Moffett draws on findings in psychology sociology and anthropology to explain the social adaptations that bind societies He explores how the tension between identity and anonymity defines how societies develop function and fail Surpassing Guns Germs and Steel and Sapiens The Human Swarm reveals how mankind created sprawling civilizations of unrivaled complexity and what it will take to sustain them

McGovern,2019-06-21 Communal level resource management successes and failures comprise complex interactions that involve local regional and increasingly global scale political economic and environmental changes shown to have recurring patterns and trajectories The human past provides examples of long term millennial and century scale successes followed by undesired transitions collapse and rapid failure of collaborative management cooperation on the decadal scale Management of scarce resources and common properties presents a critical challenge for planners attempting to avoid the tragedy of the commons in this century Here anthropologists human ecologists archaeologists and environmental scientists discuss strategies for social well being in the context of diminishing resources and increasing competition The contributors in this volume revisit tragedy of the commons also referred to as drama or comedy of the commons and examine new data and theories to mitigate pressures and devise models for sustainable communal welfare and development They present twelve archaeological historic and ethnographic cases of user

managed resources to demonstrate that very basic community level participatory governance can be a successful strategy to manage short term risk and benefits The book connects past present future by presenting geographically and chronologically spaced out examples of communal level governance strategies and overviews of the current cutting edge research The lesson we learn from studying past responses to various ecological stresses is that we must not wait for a disaster to happen to react but must react to mitigate conditions for emerging disasters Forensic Psychology David A.
