### REFRIGERATION SYSTEM

The self-contained refrigeration system is rear mounted, concealed behind a removable louvered cover. Full-length front air grille allows for even air circulation to condensing unit. A "Performance Rated", air-cooled, hermetically sealed, capillary type refrigeration system is installed in each model. Plasticized finned coil and air circulating fans are contained within an easily accessible rear mounted housing. Our unique airflow design allows the cabinet to be enclosed on both sides or to be mounted flush against a wall. Our refrigeration system, fully charged with R-404A refrigerant, is designed to maintain 0° Fahrenheit while operating with an unrestricted air supply in an ambient temperature of 100° Fahrenheit. All condensate water is directed to a non-electric condensate vaporizer located in the compressor compartment, thus no plumbing is required. A strict quality assurance team inspects all materials and components to certify that each model conforms to the most exacting standards. All models are performance tested for a minimum of 16 hours prior to crating.

### CABINET CONSTRUCTION

All materials are of top quality and are assembled under rigid supervision conforming to strict quality assurance requirements. Case is of all metal welded construction and is internally supported and braced for rigid unit construction. Exterior cabinet back and bottom are heavy gauge galvanized steel.

Cabinet design eliminates overlapping panels with raw edges. Interior corners are rounded with a 1/4" radius for cleaning ease. All cabinet joints and seams are vapor-tight sealed. An easily removable anti-sweat door heater, concealed by a non-metallic, non-conductive, high impact thermal breaker strip, eliminates condensation build-up on case front.

### INSULATION

All cabinet walls, top, and bottom have high density, foamed-in-place, non-CFC polyurethane insulation.
