But almost all advisors are assembling their practices using the wrong tools—tools borrowed from historically successful but vastly different models including wirehouses, broker-dealers, and even OSJs and branch managers. Revenue sharing, commission splitting, and other eat-what-you-kill compensation methods dominate the independent sector and virtually ensure that today's independent practices, if left unchanged, will not survive the end of their founder's career. It is time to change course, and this book provides the map and the details to help you do just that. For independent practice owners and staff members, advisors who want to transition to independence, as well as accountants, attorneys, coaches, and others involved in the financial services space, there are invaluable lessons to be learned from *Succession Planning for Financial Advisors*.
