Continuity And Change In Roman Religion Oxford University Press Academic Monograph Reprints:

Continuity and Change in Roman Religion John Hugo Wolfgang Gideon Liebeschuetz, 1979 This is a survey of the religious attitudes reflected in Latin literature from the late Republic to the time of Constantine Its main theme is the development of the Roman public religion in that period Within this theme the most pervasive issue is the relationship between Roman religion and morality Though the link between the two is shown to be closer than is often supposed it was also the case that the rise of such systems as Stoicism and Christianity contributed to a sense of morality more detached from traditional conceptions of the collective well being of the Roman state Nevertheless the old religion continued to flourish and to contribute in numerous ways to the working of Roman society until it was fatally weakened by the political and social crisis of the third century This crisis and the tendency of the Roman Empire to depend upon and encourage new sources of support prepared the way for the emergence of Christianity first as the religion of the Emperor and then after a period in which Christians and pagans were able to co operate by emphasizing their common beliefs as the official religion of the Empire

London in the Roman World Dominic Perring, 2022-01-27 incAn original authoritative survey of the archaeology and history of Roman London London in the Roman World draws on the results of latest archaeological discoveries to describe London s Roman origins It presents a wealth of new information from one of the world s richest and most intensively studied archaeological sites and a host of original ideas concerning its economic and political history This original study follows a narrative approach setting archaeological data firmly within its historical context London was perhaps converted from a fort built at the time of the Roman conquest where the emperor Claudius arrived to celebrate his victory in AD 43 to become the commanding city from which Rome supported its military occupation of Britain London grew to support Rome s campaigning forces and the book makes a close study of the political and economic consequences of London s role as a supply base Rapid growth generated a new urban landscape and this study provides a comprehensive guide to the industry and architecture of the city The story traced from new archaeological research shows how the city was twice destroyed in war and suffered more lastingly from plagues of the second and third centuries These events had a critical bearing on the reforms of late antiquity from which London emerged as a defended administrative enclave only to be deserted when Rome failed to maintain political control This ground breaking study brings new information and arguments to our study of the way in which Rome ruled and how the empire failed

Serve the Community of the Church Andrew D. Clarke, 2000 Serve the Community of the Church the second volume in the First Century Christians in the Graeco Roman World series explores the nature of organization and leadership roles in the first century Christian community especially as they were variously taught by Paul and practiced in the earliest congregations Drawing from ancient source material as well as from the New Testament Andrew Clarke describes the theories and practices of organization and leadership in key areas of first century Graeco Roman society the city the colony voluntary associations Jewish synagogues the family and discusses the extent to which these models

influenced the first Christians in defining their own communities Clarke then turns to the Christian community itself discussing how Paul through correspondence with a number of congregations laid out important parameters for leadership that he considered appropriate to the new Christian context Some of these parameters Clarke shows were defined in express contrast to the patterns of leadership widely practiced in Graeco Roman society and occasionally also in the early Christian communities Providing a fascinating look at the social and historical background of the New Testament this volume is also important for its discussion of a subject that has implications for the organization of church life in our own time

Christology in the Making James D. G. Dunn, 1996 This excellent study of the origins and early development of Christology by James D G Dunn clarifies in rich detail the beginnings of the full Christian belief in Christ as the Son of God and incarnate Word By employing the exegetical methods of historical context of meaning and conceptuality in transition Dunn illumines the first century meaning of key titles and passages within the New Testament that bear directly on the development of the Christian understanding of Jesus

Temple Purity in 1-2 Corinthians Yulin Liu, 2013 Paul's view of the church as the temple and his concern about its purity in 1 2 Corinthians has traditionally been interpreted from the perspective of a Jewish background However Yulin Liu reveals that the pagans were very aware of temple purity when visiting some temples in the Greco Roman world and the purification concerns of three pagan temples in Corinth are documented in his work The author affirms that the Gentile believers among the Corinthian community were able to grasp Paul's message because of it Also Liu investigates Paul's use of temple purity to address the necessity of unity holiness and faithfulness of the Corinthian Christians in an eschatological sense The separation of God's people from profane matters actually points to a new exodus and a progressive consummation of the construction of the eschatological temple community

Hidden Criticism? Christoph Heilig, 2015-04-01 Is there a counter imperial message beneath the surface of the text in Paul Christoph Heilig analyzes the letters of the apostle and concludes that the hypothesis that we can identify critical echoes of the Roman Empire in Paul's letters needs to be modified for it to be maintained

The Oxford Handbook of the European Iron Age Colin Haselgrove, Katharina

Rebay-Salisbury, Peter S. Wells, 2023 The Oxford Handbook of the European Iron Age presents to students scholars and interested general readers a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods **Old World Archaeology Newsletter** ,1995 **Times of Transition** Sylvie Honigman, Christophe Nihan, Oded Lipschits, 2021-06-30 This multidisciplinary study takes a fresh look at Judean history and biblical literature in the late fourth and third centuries BCE In a major reappraisal of this era the contributions to this volume depict it as one in which critical changes took place Until recently the period from Alexander s conquest in 332 BCE to the early years of Seleucid domination following Antiochus III s conquest in 198 BCE was reputed to be poorly documented in material evidence and textual production buttressing the view that the era from late Persian to Hasmonean times was one of seamless continuity Biblical scholars believed that no literary activity belonged to the Hellenistic age and archaeologists were unable to refine their understanding because of a lack of secure chronological markers However recent studies are revealing this period as one of major social changes and intense literary activity Historians have shed new light on the nature of the Hellenistic empires and the relationship between the central power and local entities in ancient imperial settings and the redating of several biblical texts to the third century BCE challenges the traditional periodization of Judean history Bringing together Hellenistic history the archaeology of Judea and biblical studies this volume appraises the early Hellenistic period anew as a time of great transition and change and situates Judea within its broader regional and transregional imperial contexts A History of Civilization Robin W. Winks, 1996 Current Research in Britain ,1995 *TRAC 2008* Mark Driessen, 2009 Many papers were given during the annual conference covering the breadth and length of the Roman world This volume contains a selection of the papers from all of the sessions *Archaeology* ,1983 *Religious Books and Serials in Print, 1980-1981* ,1980 **Religion, Community and Territory** Stephen James Yeates, 2006 These volumes examine what is known about the development of religion in the area of the Severn Valley and the adjacent hills from the late Bronze Age to the foundation of the minsters in the early medieval period Roman sources attribute the area to the tribal group the Dobunni while in the Anglo Saxon period it is attributed to the Hwicce The relationship and possible commonality between the two peoples and their territory will be explored here together with any relationship which may appertain between religious sites and the natural world topography geology and hydrology New types of religious site will be encountered and defined and an attempt made to associate these both with nature and with social actions The second part of the survey is concerned with the association of religion community and territory and consequently deals with the ways in which these aspects were interrelated A framework is proposed for explaining the long term development of communities in the region from late prehistory into the historical period An important discovery has been the identification of a goddess associated with a sacred vessel shown in a number of Roman reliefs who seems to be a territorial deity directly associated with the Dobunni Aspects of her cult can be recognised in the Iron Age and even in the early medieval periods It is apparent

on so many levels that there was no opposition between the deification of the natural world and the use of deities as representations of community but that they were in reality two aspects of the same paradigm The divinities of the pre Christian religion in the region were not expunged at once with the advent of Christianity but continue to survive in genealogies folk tradition and myth The strong implication of my thesis is that the Dobunni and the Hwicce are in fact the same people This volume is part of a three volume set ISBN 9781407359373 Volume I ISBN 9781407359380 Volume II ISBN 9781407359397 Volume III ISBN 9781841717456 Volume set Churches in Early Medieval Ireland Tomás Ó Carragáin, 2010 This is the first book devoted to churches in Ireland dating from the arrival of Christianity in the fifth century to the early stages of the Romanesque around 1100 including those built to house treasures of the golden age of Irish art such as the Book of Kells and the Ardagh chalice Carragáin's comprehensive survey of the surviving examples forms the basis for a far reaching analysis of why these buildings looked as they did and what they meant in the context of early Irish society Carragáin also identifies a clear political and ideological context for the first Romanesque churches in Ireland and shows that to a considerable extent the Irish Romanesque represents the perpetuation of a long established architectural tradition
