, 1988 **There's No Such Thing As Free Speech** Stanley Fish, 1994-12-15 In an era when much of what passes for debate is merely moral posturing traditional family values versus the cultural elite free speech versus censorship or reflexive name calling the terms liberal and politically correct are used with as much dismissive scorn by the right as reactionary and fascist are by the left Stanley Fish would seem an unlikely lightning rod for controversy A renowned scholar of Milton head of the English Department of Duke University Fish has emerged as a brilliantly original critic of the culture at large praised and pilloried as a vigorous debunker of the pieties of both the left and right His mission is not to win the cultural wars that preoccupy the nation's attention but rather to redefine the terms of battle In *There's No Such Thing as Free Speech* Fish takes aim at the ideological gridlock paralyzing academic and political exchange in the nineties In his witty accessible dissections of the swirling controversies over multiculturalism affirmative action canon revision hate speech and legal reform he neatly eviscerates both the conservatives' claim to possession of timeless transcendent values the timeless transcendence of which they themselves have conveniently identified and the intellectual left's icons of equality tolerance and non discrimination He argues that while conservative ideologues and liberal stalwarts might disagree vehemently on what is essential to a culture or to a curriculum both mistakenly believe that what is essential can be identified apart from the accidental circumstances of time and history to which the essential is ritually opposed In the book's first section which

includes the five essays written for Fish's celebrated debates with Dinesh D Souza the author and former Reagan White House policy analyst Fish turns his attention to the neoconservative backlash In his introduction Fish writes Terms that come to us wearing the label apolitical common values fairness merit color blind free speech reason are in fact the ideologically charged constructions of a decidedly political agenda I make the point not in order to level an accusation but to remove the sting of accusation from the world politics and redefine it as a synonym for what everyone inevitably does Fish maintains that the debate over political correctness is an artificial one because it is simply not possible for any party or individual to occupy a position above or beyond politics Regarding the controversy over the revision of the college curriculum Fish argues that the point is not to try to insist that inclusion of ethnic and gender studies is not a political decision but to point out that any alternative curriculum say a diet of exclusively Western or European texts would be no less politically invested In Part Two Fish follows the implications of his arguments to a surprising rejection of the optimistic claims of the intellectual left that awareness of the historical roots of our beliefs and biases can allow us as individuals or as a society to escape or transcend them Specifically he turns to the movement for reform of legal studies and insists that a dream of a legal culture in which no one's values are slighted or declared peripheral can no more be realized than the dream of a concept of fairness that answers to everyone's notions of equality and justice or a yardstick of merit that is true to everyone's notions of worth and substance Similarly he argues that attempts to politicize the study of literature are ultimately misguided because recharacterizations of literary works have absolutely no impact on the mainstream of political life He concludes his critique of the academy with *The Unbearable Ugliness of Volvos* an extraordinary look at some of the more puzzling if not out and out masochistic characteristics of a life in academia Penetrating fearless and brilliantly argued *There's No Such Thing as Free Speech* captures the essential Fish It is must reading for anyone who cares about the outcome of America's cultural wars *The Air Force Law Review*, 1979 Recommendations and Reports Administrative Conference of the United States, 1994

Drafting Successful Access and Benefit-sharing Contracts Tomme Rosanne Young, Morten Walløe Tvedt, 2017-10-23 In *Drafting Successful Access and Benefit sharing Contracts* Young and Tvedt offer an insightful and profound analysis of how ABS can be made truly functional through the use of legally binding and enforceable contracts Contracts are foreseen as the main legal tool for making access and benefit sharing work thus realizing the third objective of the Convention on Biological Diversity Many years have gone by since contracts were first suggested as a solution to resolve the challenges of ABS but so far few successful benefit sharing cases have been presented This volume explores the possibilities and limits of contract law which both practitioners and stakeholders need in order for ABS contracts to become an effective solution for sustainable use of biological diversity
