WHEEL ALIGNMENT (Continued)

CAUTION: ALWAYS raise the vehicle to the correct suspension height. NEVER lower the vehicle to obtain the correct suspension height. If the vehicle suspension height is too high, lower the vehicle below the height specification. Then raise the vehicle to the correct suspension height specification. This will insure the vehicle maintains the proper suspension height.

NOTE: If a height adjustment has been made, perform height measurement again on both sides of the vehicle.

STANDARD PROCEDURE - CAMBER AND CASTER ADJUSTMENT

NOTE: Ask suspension height measurement must be performed before alignment.

Camber and caster angle adjustments involve changing the position of the upper suspension arms.

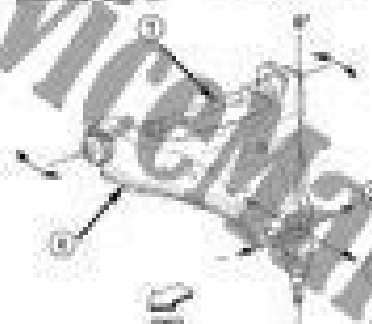

Fig. 4 Caster & Camber Adjustment System

- 1 - FRONT END
- 2 - CASTER
- 3 - CAMBER
- 4 - UPPER BALL JOINT SUSPENSION

NOTE: On 4x2 vehicles use Alignment Tool 6083 for alignment. The tool attaches to the pivot bar on the upper control arm.

STANDARD PROCEDURE - CASTER

NOTE: Ask suspension height measurement must be performed before alignment.

Moving the rear position of the pivot bar in or out, will change the caster angle significantly and corner angle only slightly. To maintain the corner angle while adjusting caster, move the rear of the pivot bar in or out. Then move the front of the pivot bar slightly in the opposite direction.

For example, to increase a positive caster angle, move the rear position of the pivot bar toward toward the signal. Move the front of pivot bar outward away from the signal slightly until the original corner angle is obtained.

STANDARD PROCEDURE - CAMBER

NOTE: Ask suspension height measurement must be performed before alignment.

Move the front of the pivot bar in or out. This will change the camber angle significantly and corner angle slightly.

After adjustment is made tighten the pivot bar nuts to proper torque specification.

STANDARD PROCEDURE - TOE ADJUSTMENT

NOTE: Ask suspension height measurement must be performed before alignment.

The wheel toe position adjustment is the final adjustment.

(1) Start the engine and turn wheels both ways before straightening the wheels. Secure the steering wheel with the front wheels in the straight ahead position.

(2) Turn the tie rod pin ends.

NOTE: Each front wheel should be adjusted for amount of the total toe position specification. This will ensure the steering wheel will be centered when the wheels are positioned straight ahead.

Dodge Nitro 2007 2008 Workshop Service Repair Manual

D Keegan

Dodge Nitro 2007 2008 Workshop Service Repair Manual:

Decoding **Dodge Nitro 2007 2008 Workshop Service Repair Manual**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its capability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Dodge Nitro 2007 2008 Workshop Service Repair Manual**," a mesmerizing literary creation penned with a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring impact on our lives. In this appraisal, we shall explore the book is central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
