Literacy remains a contentious and polarized educational media and political issue What has emerged from the continuing debate is a recognition that literacy in education is allied closely with matters of language and culture ideology and discourse knowledge and power Drawing perspectives variously from critical social theory and cultural studies poststructuralism and feminisms sociolinguistics and the ethnography of communication social history and comparative education the contributors begin a critical interrogation of

taken for granted assumptions which have guided educational policy research and practice      **Acts, Reports, Etc** ,1859

School & Society ,1921      *Threshold Concepts and Transformational Learning* ,2010-01-01 Over the last decade the notion of threshold concepts has proved influential around the world as a powerful means of exploring and discussing the key points of transformation that students experience in their higher education courses and the troublesome knowledge that these often present Threshold concepts provoke in the learner a state of liminality in which transformation takes place requiring the integration of new understanding and the letting go of previous learning stances Insights gained by learners as they cross thresholds can be exhilarating but might also be unsettling requiring an uncomfortable shift in identity or paradoxically a sense of loss The liminal space can be a suspended state of partial understanding or stuck place in which understanding approximates to a kind of mimicry Threshold Concepts and Transformational Learning substantially increases the empirical evidence for threshold concepts across a large number of disciplinary contexts and from the higher education sectors of many countries This new volume develops further theoretical perspectives and provides fresh pedagogical directions It will be of interest to teachers practitioners and managers in all disciplines as well as to educational researchers
