## **Doing Practice Based Research In Therapy A Reflexive Approach:**

*Doing Practice-based Research in Therapy* Sofie Bager-Charleson, 2014 Learning how to use critical self reflection creatively when practising therapy is an important component of training This level of self awareness is however often neglected in research despite the centrality of the researcher to their work *Doing Practice based Research in Therapy A Reflexive Approach* makes the vital link between practical research skills and self awareness critical reflection and personal development in practice based research Starting with a clear introduction to the theory practice and debates surrounding this type of research the book then guides the reader step by step through the practicalities of the research process encouraging them to reflect upon and evaluate their practice at each stage The book incorporates case studies throughout to illustrate different methodological approaches uses real life examples from students conducting practice based psychotherapy research includes exercises chapter objectives end of chapter questions and suggestions for further reading to help consolidate learning encourages ongoing personal development by introducing personal development planning PDP and lifelong learning in the field of research By demystifying the reflexive approach this highly practical guide ensures that trainees and qualified therapists get the most both professionally and personally from their practice based research

*The Trainee Handbook* Robert Bor, Mary Watts, 2016-11-08 Written by a team of leading trainers practitioners and supervisors this bestselling classic is the trainee therapist s best friend It identifies and guides trainees through the practical skills and knowledge they ll need to make a success of their training from writing essays through to case formulation and on to preparing for their first meeting with a client Along the way it addresses and allays the concerns which are common to all students Now in its fourth edition the book has been fully updated to take account of the significant changes in the therapy professions in recent years It now includes new and important chapters on Evidence based practice Working with diversity Reflective practice Using social media technology and online therapy *The Trainee Handbook* is an invaluable companion and source of information and guidance for all trainees in counselling psychotherapy and counselling psychology and newly qualified therapists entering into practice

**Introduction to Countertransference in Therapeutic Practice** Paola Valerio, 2017-11-08 While transference has been fully described in the literature countertransference has been viewed as its ugly sibling and hence there are still not as many reflective accounts or guidance for trainees about how to handle difficult emotions such as shame and envy and conflict

in the consulting room As a counterpoint this book provides an integrative guide for therapists on the concept of countertransference and takes a critical stance on the phenomenon and theorising about the so called countertransference viewing it as a framework to explore the transformative potential in managing strong emotions and difficult transactions With an explicit focus on teaching this book informs therapeutic practice by mixing theories and case studies from the authors own clinical and teaching experiences which involves the reader in case studies reflection and action points Countertransference is explored in a wide range of clinical settings including in reflective practice and in research in the field of therapy as well as in art therapy and in the school setting It also considers countertransference in dream interpretation in the supervision and teaching environment and in work with groups and organisations Introduction to Countertransference in Therapeutic Practice offers psychotherapists and counsellors both practicing and in training a comprehensive overview of this important concept from its roots in Freud s work to its place today in a global transcultural society Being a Researcher Nollaig Frost,2024-11-12 The book covers what it is to be a researcher in that being a researcher is different to carrying out research The book s aim is to inform and support researchers at all stages of their research practice to understand what of themselves is important to research and how recognition of personal characteristics skills motivations and experiences can enhance both the quality of the research and its enjoyment It does this by showing the techniques of research practice and discussing that these form only part of what is necessary for research to be good research and that these aspects can be better understood and cultivated to aid becoming and maintain being a good researcher The work highlights the value and importance of the person people carrying out the research showing that whilst there are tasks and systematic approaches that must be used research quality is elevated and enhanced by understanding that it is not only what a researcher does but who a researcher is that is just as important The book will be multidisciplinary in its approach by demonstrating that this is the case whatever approach to research is employed As such the text will be useful to objective researchers seeking a neutral observational stance subjective researchers regarding themselves as central to and often an instrument of the research and to researchers who strive to be both subjective and objective as in mixed methods research By exploring characteristics values and practices of researchers across different research approaches and in different settings the book will consider researchers who are successful in their research and who enjoy doing it researchers doing research as a requirement of their institution and researchers who learn to love research against their expectations Its emphasis throughout is on the person rather than the methods of research with the aim of equipping readers to nurture and encourage the researcher within them Each chapter takes as its focus an aspect of being a researcher and considers it first in general and then in more detail across different approaches Each chapter will include reflections and insights from researchers in different fields gathered from interviews with them and salient points will be highlighted in and summarised with a Key Points section at the end of each chapter
