Party Government in 48 Democracies (1945-1998) J.J. Woldendorp, Hans Keman, I. Budge, 2013-04-17 Since the 1980s political scientists have developed a renewed interest in the study of political institutions based on the assumption that institutions matter that is that formal governmental institutions and constitutional legal rules as well as informal institutions like parties and interest groups are crucial determinants of the shape of politics and policy outcomes In this respect the new institutionalism resembles the old institutionalism of pre behaviorist days but the crucial difference between the two is that the new institutionalists are committed to systematic empirical testing of their hypotheses at least in principle In practice however especially in comparative analyses this goal has often been frustrated by the lack of reliable data for a large number of countries Researchers have therefore usually been limited to testing their hypotheses with modest data sets collected for their own particular purposes Of all of the political institutions the executive branch of the government is by far the most important it can be regarded as the irreducible core of government and the principal embodiment of political authority with specific powers that are not lodged elsewhere in the political system Almost all countries in the world and certainly all modern democracies have an executive body called government cabinet or administration as in the term the Clinton administration that has the main responsibility for running the country's public affairs

Research Methods in Politics Wyn Grant, 2008-06-17

Community Radio Policies in

South Asia Preeti Raghunath,2020-08-07 The book draws on critical media policy studies to study the principles and performances of policies and policymaking for community radio in four countries of South Asia Sri Lanka Nepal India and Bangladesh It focuses on the processes and practices of deliberation that go into policymaking across space and time and the global local spectrum It stitches together a critical media policy ethnography drawing on over a 100 formal interviews and informal conversations with policy actors from South Asia in a bid to present a deliberative policy analysis of policymaking for community radio in the region Drawing on Grounded Theory the book fleshes out the Deliberative Policy Ecology Approach as an inclusive heuristic to study media policies

Twenty Years of Studying Democratization Aurel Croissant,Jeffrey Haynes,2015-06-05 Democratization emerged at a time of epochal change in global politics the twin impacts of the end of the Soviet Union and the speeding up and deepening of globalisation in the early 1990s meant a whole new ball game in terms of global political developments The journal's first issue appeared in early 1994 Over time the editorial position has been consistently to focus on the third wave of democracy and its aftermath The third wave is the most recent exemplar of a long term historical trend towards more democratically viable regimes and away from authoritarian systems and leaders In short the journal wants to promote a better understanding of democratization defined as the way democratic norms institutions and practices evolve and are disseminated both within and across national and cultural boundaries Over the years the many excellent articles that we have featured in the journal have shared our focus on democratization viewed as a process The journal has sought and continues to seek to build on the enduring scholarly and of course popular interest in democracy how and why it emerges develops and becomes consolidated Our emphasis over the last 20 years has been contemporary and the approach comparative with a strong desire to be both topical and authoritative We include special reference to democratization in the developing world and in post communist societies In sum just as 20 years ago the journal today aims to encourage debate on the many aspects of democratization that are of interest to policy makers administrators and journalists aid and development personnel those involved in education and perhaps above all the tens of millions of ordinary people around the world who do not yet enjoy the benefits of living under democratic rule The two dozen articles collected in this virtual special issue are emphatic proof of the power of the written word to induce debate uncertainty and ultimately progress towards better forms of politics focused on the achievement of the democratic aspirations of men and women everywhere
