Ethology and Behavioral Ecology of Odontocetes Bernd Würsig, 2019-08-02 This book concentrates on the marine mammalian group of Odontocetes the toothed whales dolphins and porpoises In 23 chapters a total of 40 authors describe general patterns of ethological concepts of odontocetes in their natural environments with a strong bent towards behavioral ecology Examples are given of particularly well studied species and species groups for which enough data exist especially from the past 15 years The aim is to give a modern flavor of present knowledge of ethology and behavior of generally large brained behaviorally flexible mammals that have evolved quite separately from social mammals on land As well the plight of populations and species due to humans is described in multiple chapters with the goal that an understanding of behavior can help to solve or alleviate at least some human made problems

Studying Animal Languages Without Translation: An Insight from Ants Zhanna Reznikova, 2016-12-14 The Author of this new volume on ant communication demonstrates that information theory is a valuable tool for studying the natural communication of animals To do so she pursues a fundamentally new approach to studying animal communication and linguistic capacities on the basis

of measuring the rate of information transmission and the complexity of transmitted messages Animals communication systems and cognitive abilities have long since been a topic of particular interest to biologists psychologists linguists and many others including researchers in the fields of robotics and artificial intelligence The main difficulties in the analysis of animal language have to date been predominantly methodological in nature Addressing this perennial problem the elaborated experimental paradigm presented here has been applied to ants and can be extended to other social species of animals that have the need to memorize and relay complex messages Accordingly the method opens exciting new dimensions in the study of natural communications in the wild

Marine Mammals: the Evolving Human Factor Giuseppe Notarbartolo di Sciara, Bernd Würsig, 2022-06-08 The seventh volume in the series Ethology and Behavioral Ecology of Marine Mammals describes aspects of the often complex relationship between humans and marine mammals From a primeval condition of occasional predators during the last century humans have become a major factor negatively affecting the status of most marine mammals through over hunting habitat encroachment and environmental degradation This has led to the extirpation of many marine mammal populations and even to the extinction of species However in parallel to this destructive drive since antiquity humanity has been influenced by a strong fascination for marine mammals which contributes today to an increased human appreciation of the natural world admixed with widespread concern for its degrading condition The special status occupied by marine mammals in human imagination and affection stands in stark contrast with the current predicament of many populations still threatened by the doings of Homo sapiens a condition emblematic of the relationship of humanity with nature and key to understanding where humanity is heading

The Comparative Psychology of Intelligence: Macphail Revisited Michael Colombo, Damian Scarf, Thomas Zentall, 2021-03-15 *In Praise of Floods* James C. Scott, 2025-02-25 James C Scott reframes rivers as alive and dynamic revealing the consequences of treating them as resources for our profit Rivers on a long view are alive They are born they

change they shift their channels they forge new routes to the sea they move both gradually and violently they can teem usually with life they may die a quasi natural death they are frequently maimed and even murdered It is the annual flood pulse the brief time when the river occupies the floodplain that gives a river its vitality but it is human engineering that kills it suppressing the flood pulse with dams irrigation siltation dikes and levees In demonstrating these threats to the riverine world award winning author James C Scott examines the life history of a particular river the Ayeyarwady Irrawaddy of Burma the heartland and superhighway of Burman culture Scott opens our understanding of rivers to encompass their entirety tributaries wetlands floodplains backwaters eddies periodic marshlands and the assemblage of life forms dependent on rivers for their existence and well being For anyone interested in the Anthropocene and the Great Acceleration rivers offer a striking example of the consequences of human intervention in trying to control and domesticate a natural process the complexity and variability of which we barely understand

Solving Fermi's Paradox Duncan H. Forgan, 2019-05-02 The search for extra terrestrial intelligence SETI has for sixty years attempted to solve Fermi's paradox if intelligent life is relatively common in the universe where is everybody Examining SETI through this lens this volume summarises current thinking on the prevalence of intelligent life in the universe and discusses sixty six distinct solutions to the so called paradox It describes the methodology of SETI and how many disciplines feed into the debate from physics and biology to philosophy and anthropology The presented solutions are organised into three key groups rare Earth solutions suggesting planetary habitability life and intelligence are uncommon catastrophist solutions arguing civilisations do not survive long enough to make contact and non empirical solutions those that take theoretical approaches such as that our methodology is flawed This comprehensive introduction to SETI concludes by looking at the future of the field and speculating on humanity's potential fate

Friendly Interfaces Between Humans and Machines P. V. S Rao, Sunil Kumar Kopparapu, 2018-08-16 This book discusses human machine interactions specifically focusing on making them as natural as human human interaction It is based on the premise that to get the right connect between human and machines it is essential to understand not only the behavior of the person interacting with the machine but also the limitations of the technology Firstly the authors review the evolution of language as a spontaneous natural phenomenon in the overall scheme of the evolutionary development of living beings They then go on to examine the possible approaches to understanding and representing the meaning and the common aspects of human human and human machine interactions and introduce the key concept keyword also called minimal parsing approach as a convenient and realistic way to implement usable human machine interface HMI systems For researchers looking for practical approaches way beyond the realms of theory this book is a must read

Living with Animals Erin McKenna, 2020-11-15 Living with Animals brings a pragmatist ecofeminist perspective to discussions around animal rights animal welfare and animal ethics to move the conversation beyond simple use or non use decisions Erin McKenna uses a case study approach with select species to question how humans should live and interact with various animal beings through specific instances of such relationships Addressing standard topics such as the use of animals for food use for biomedical research use in entertainment use as companions use as captive specimens in zoos and use in hunting and ecotourism through a revolutionary pluralist and experimental approach McKenna provides an uncommonly nuanced accounts for complex relationships and changing circumstances Rather than seek absolute moral stands regarding human relationships with other animal beings and rather than trying to end such relationships altogether the books urges us to make existing relations better

Bots and Beasts Paul Thagard, 2021-10-19 An expert on mind considers how animals and smart machines measure up to human intelligence Octopuses can open jars to get food and chimpanzees can plan for the future An IBM computer named Watson won on Jeopardy and Alexa knows our favorite songs But do animals and smart machines really have intelligence comparable to that of humans In Bots and Beasts Paul Thagard looks at how computers bots and animals measure up to the minds of people offering the first systematic comparison of intelligence across machines animals and humans Thagard explains that human intelligence is more than IQ and encompasses such features as problem solving decision making and creativity He uses a checklist of twenty characteristics of human intelligence to evaluate the smartest machines including Watson AlphaZero virtual assistants and self driving cars and the most intelligent animals including octopuses dogs dolphins bees and chimpanzees Neither a romantic enthusiast for nonhuman intelligence nor a skeptical killjoy Thagard offers a clear assessment He discusses hotly debated issues about

animal intelligence concerning bacterial consciousness fish pain and dog jealousy He evaluates the plausibility of achieving human level artificial intelligence and considers ethical and policy issues A full appreciation of human minds reveals that current bots and beasts fall far short of human capabilities Integrative Contemporary Art and Science Practices J.D.
