**Food Chemistry in Small Bites** Patricia B. O'Hara, 2025-04-15

*Food Chemistry in Small Bites* takes readers on an up-close scientific journey through the transformation of food when meals are prepared. Organized in bite-size digestible units, this innovative text introduces students to food's molecular makeup as well as the perception of food by the five senses. Using familiar foods as examples, it explores what happens to ingredients when heated, cooled, or treated, and also considers what happens when materials that don't naturally mix are forced to do so. With informative full-color renderings and a hands-on lab section, the book encourages students to think like scientists while preparing delicious dishes. Readers will formulate hypotheses as to why certain foods taste hot despite being at room temperature, why milk separates into curds and whey when lemon is added, and other ordinary but chemically complex phenomena. This book also importantly challenges readers to think critically about the future of food in the face of a warming planet.

**The 15th International Conference on Biomedical Engineering** James Goh, 2013-11-18

This volume presents the processing of the 15th ICMBE held from 4th to 7th December 2013 in Singapore. Biomedical engineering is applied in most aspects of our healthcare ecosystem. From electronic health records to diagnostic tools to therapeutic, rehabilitative, and regenerative treatments, the work of biomedical engineers is evident. Biomedical engineers work at the intersection of engineering, life sciences, and healthcare. The engineers would use principles from applied science, including mechanical, electrical, chemical, and computer engineering, together with physical sciences, including physics, chemistry, and mathematics, to apply them to biology and medicine. Applying such concepts to the human body is very

much the same concepts that go into building and programming a machine The goal is to better understand replace or fix a target system to ultimately improve the quality of healthcare With this understanding the conference proceedings offer a single platform for individuals and organizations working in the biomedical engineering related field to gather and network with each other in so doing create the catalyst for future development of biomedical engineering in Asia Experiences and Research on Enhanced Professional Development Through Faculty Learning Communities Blankenship, Rebecca J., Wiltsher, Cheree Y., Moton, Brandon A., 2022-06-24 Faculty learning communities are a fairly new ideology that is gaining traction among educators and institutions These communities have numerous benefits on professional development such as enhancing educator preparedness and learning The possibilities of these communities are endless however further study is required to understand how these learning communities work and the best practices and challenges they face Experiences and Research on Enhanced Professional Development Through Faculty Learning Communities shares the experiences and research related to the enhanced professional development received by university faculty and staff participating in a series of collaborative faculty learning communities The book using qualitative quantitative and mixed methodologies considers educator experiences as participants in the faculty learning communities what they learned and how they applied and implemented best practices in their courses Covering topics such as curricula course design and rubrics this reference book is ideal for administrators higher education professionals program developers program directors researchers academicians scholars practitioners instructors and students Understanding Chemistry through Cars Geoffrey M. Bowers, Ruth A. Bowers, 2014-11-03 As the car anticipates its dance around the racetrack the engine growls and pops and all senses become immersed in the smell of exhaust vapors and the sounds of raw speed and excitement As it turns out these also are the sights sounds and smells of chemistry The car is a great example of an everyday device with an abundance of chemistry hidden
