Exporting Press Freedom Craig LaMay, 2017-07-12 International media assistance is a small but important form of international democracy promotion aid Media assistance boomed after the 1989 transitions in Central Europe but now flows to virtually all regions of the world Today the media assistance industry is focused on the problem of sustainability How are free and independent public affairs media supposed to maintain their editorial mission while facing hostile political systems or the demands of the consumer marketplace Many media in developing countries have been or are grant dependent When grants are exhausted or withdrawn media that were funded to further democratic consolidation typically wither and die Some become mere grant chasers Others abandon public service to the demands of market competition or political patronage As a result governmental and non governmental grant makers now emphasize the need for sustainability in considering grants in the media sector Many grant recipients have grown frustrated sometimes bitter and have sought to take a much more active role in the way assistance programs are put together Just how is sustainability to be achieved while also ensuring a public service editorial

mission Exporting Press Freedom examines the history and practice of media assistance and argues that the dilemma of media independence and sustainability is best understood as an economic problem rather than one of poor editorial standards or lack of will. It includes profiles of news and public affairs media in developing and democratizing countries and also of two non governmental organizations that have pioneered the use of low interest loans in media assistance. These profiles exemplify strategic and entrepreneurial approaches to developing and supporting public service media. Such approaches may be of use not only in the developing world but in the consolidated Western democracies as well where concern has grown about poor journalistic performance and its consequences. f Arab National Media and Political Change Fatima El-Issawi, 2016-11-08 This book examines the evolution of national Arab media and its interplay with political change particularly in emerging democracies in the context of the Arab uprisings. Investigated from a journalistic perspective this research addresses the role played by traditional national media in consolidating emerging democracies or in exacerbating their fragility within new political contexts. Also analyzed are the ways journalists report about politics and transformations of these media industries drawing on the international experiences of media in transitional societies. This study builds on a field investigation led by the author and conducted within the project Arab Revolutions Media Revolutions covering Libya Tunisia and Egypt. Human Rights and African Airwaves Harri Englund, 2011-10-03 Human Rights and African Airwaves focuses on Nkhani Zam maboma a popular Chichewa news bulletin broadcast on Malawi's public radio. The program often takes authorities to task and questions much of the human rights rhetoric that comes from international organizations. Highlighting obligation and mutual dependence the program expresses in popular idioms and local narrative forms grievances and injustices that are closest to Malawi's impoverished public. Harri Englund reveals broadcasters' everyday struggles with state sponsored biases and a listening public with strong views and a critical ear. This fresh look at African language media shows how Africans effectively confront inequality exploitation and poverty. **New Media and Revolution** Billie Jeanne Brownlee, 2020-07-16 The Arab Spring did not arise out of nowhere. It was the physical manifestation of more than a decade of new media diffusion use and experimentation that empowered ordinary people during their everyday lives. In this book Billie Jeanne Brownlee offers a refreshing insight into the way new media can facilitate a culture of resistance and dissent in authoritarian states. Investigating the root causes of the Syrian uprising of 2011 New Media and Revolution shows how acts of online resistance prepared the ground for better organised street mobilisation. The book interprets the uprising not as the start of Syria's social mobilisation but as a shift from online to offline contestation and from localised and hidden practices of digital dissent to tangible mass street protests. Brownlee goes beyond the common dichotomy that frames new media as either a deus ex machina or a means of expression to demonstrate that in Syria media was a nontraditional institution that enabled resistance to digitally manifest and gestate below within and parallel to formal institutions of power. To refute the idea that the population of Syria was largely apathetic and apolitical prior to the uprising Brownlee explains that social media

and technology created camouflaged geographies and spaces where individuals could protest without being detected

Brown,2019-02-01 Journalists are actors in international relations mediating communications between governments and publics but also between the administrations of different countries American and foreign officials simultaneously consume the work of U S journalists and use it in their own thinking about how to conduct their work As such journalists play an unofficial diplomatic role However the U S news media largely amplifies American power Instead of stimulating greater understanding the U S elite mainstream press can often widen mistrust as they promote an American worldview and with the exception of some outliers reduce the world into a tight security frame in which the U S is the hegemon This has been the case in Afghanistan since 2001 particularly as emerging Afghan journalists have relied significantly on U S and other Western news outlets to report events within their government and their country Based on eight years of interviews in Kabul Washington and New York Your Country Our War demonstrates how news has intersected with international politics during the War in Afghanistan and shows the global power and reach of the U S news media especially within the context of the post 9 11 era It reviews the trajectory of the U S news narrative about Afghanistan and America s never ending war and the rise of Afghan journalism from 2001 to 2017 The book also examines the impact of the American news media inside a war theater It examines how U S journalists affected the U S Afghan relationship and chronicles their contribution to the rapid development of a community of Afghan journalists who grappled daily with how to define themselves and their country during a tumultuous and uneven
