Eyewitness® HD ICV System

DVR / Agency-MDC Controller Configuration
with EyePortal Audio Integration

Loading/Unloading Recording Media:

Before turning on the system, confirm that a media drive is loaded in the DVR. If not, insert the drive and lock it in place. If you remove the drive at the end of the shift (as opposed to using wireless file transfer), use the key to unlock the cartridge, then pull it out of the DVR and turn it in for ingestion into the database.

System Start-up:

Your system has been configured to power on and off automatically with the vehicle's ignition, or you will control power with the small controller module pictured here. You will also need to open the EyeHD program on your laptop (usually an icon for the program is added to the desktop to make this easier). Bootup should take a couple minutes. Once live video is shown on the MDC display, the system is ready to operate.

Start and Stop Recording:

- 1) Most record activations occur automatically by activating the emergency lights. Recording can also be started by activating the Wireless Transmitter or Siren (if connected to the system), or you can manually start recording by selecting any active camera icon. You can also start a recording by double-clicking (or tapping) the primary video window.
- 2) Regardless of how the recording starts, recording is indicated by:
 - The video window outline will turn red (and flash if configured)
 - The corresponding camera icon will turn red
 - The record icon at the top of the screen will turn red
- 3) Press the STOP button to stop all cameras recording, or press the camera icon to stop just the selected camera. If configured with Stop-Hold Classifications, they will appear on screen each time a recording is stopped, allowing you to make a selection.

Toglia, J. Don Read, David F. Ross, R.C.L. Lindsay, 2017-09-25 The Handbook of Eyewitness Psychology presents a survey of research and legal opinions from international experts on the

rapidly expanding scientific literature addressing the accuracy and limitations of eyewitnesses as a source of evidence for the courts. For the first time, extensive reviews of factors influencing witnesses of all ages—children, adults, and the elderly—are compiled in a single pair of volumes. The disparate research currently being conducted in eyewitness memory in psychology, criminal justice, and legal studies is coherently presented in this work. Controversial topics such as the use of hypnosis, false and recovered memories, the impact of stress, and the accuracy of psychologically impaired witnesses are expertly examined. Leading eyewitness researchers also discuss the subjects of conversational memory, alibi evidence, witness credibility, facial memory, earwitness testimony, lineup theory, and expert testimony. The impact of witness testimony in court is considered, and each volume concludes with a legal commentary chapter. *The Handbook of Eyewitness Psychology* is an invaluable aid to researchers, legal scholars, and practicing lawyers who need access to the most recent research in the field, accompanied by the interpretations and commentary of many of the world's leading authorities on these topics.
