The Dog Trainer's Bible Mark Telford,2021-03-09 WARNING THIS IS UNLIKE ANY OTHER TRAINING BOOK It will show you how to train any dog irrespective of age breed or past experiences very quickly and with methods that work using the dog s natural instincts The training is balanced using both positive and negative reinforcement that not only trains superbly but also increases the bond between dog and owner Many people have now come to realise that purely positive training methods rarely work for problem behaviours You can t stop aggression or fix a poor recall with treats or a word of praise The author has years of experience not only training dogs but specifically in stopping problem behaviours that many books do not care to mention Problems such

as chasing cars cyclists animals etc aggression digging shyness pulling barking recall house training jumping up on people are tackled head on and easily fixed quickly and effectively The author has successfully rehabilitated dozens of dogs that were in the last chance saloon and would have been put to sleep if his training was ineffective He has a unique perspective that cuts to the chase in dealing with any problem Take problem recall for example Most owners will see this as the dog running off Whilst this is true the author sees it primarily that the dog doesn't know or care where her owner is This is the reason for the problem If you train the dog to be attentive to your movements then she will not run away Do you see the distinction You will also be shown how to effectively train a new range of useful behaviours such as Leave Take Fetch walk without pulling watchdog training Recall easy house training and much more These things can be taught easily and in a very quick time unlike traditional methods that are typically time consuming Reinforcement training is not new but the way Mark uses it and teaches it is completely different from anything you'll have experienced before The dog learns very quickly and remembers each exercise He/she will also display an enthusiasm for training that needs to be seen to be believed Mark Telford tells and shows you that problem behaviour is actually easier to stop and takes less time than training new behaviours If this seems alien to your thinking and experience thus far this book is definitely for you The psychology behind each exercise is easily explained and also the reason why the methodology works At first glance it may seem that this is a book for beginners That couldn't be farther from the truth The book is written so that anyone even those with very limited training experience can use it It is written both simply and comprehensively Many people will read this book and become trainers themselves if they apply themselves to the teaching and the exercises The book reveals the secrets of dog training that professional dog trainers do not want you to know Whatever your level of experience there is something for everybody in this book Possibly 90% of pet owners fail to understand adequately how a dog thinks This book whilst primarily a training book explains why people so often go wrong when training by failing to understand how the dog thinks You will develop the right mindset necessary to train quickly and effectively Over the past twenty years or so there has been a huge movement towards purely positive methods of dog training It would be fantastic if all problem behaviours could be fixed with treats and praise but the brutal truth is that this is not the case and millions of people that have bought purely positive books expecting this to fix their problems have been left disillusioned disheartened and cheated when these books either ignore real problems or fail to deliver solutions that work This book uses positive variable reinforcement for training new behaviours balancing that with negative reinforcement for problem behaviours THE BEST TRAINING BOOK IN YEARS BAR NONE Dog Training Weekly [Ultimate Smart Dog Training Bible](#) Jack W F Kingston, 2025-07-09 Ultimate Smart Dog Training Bible A Modern Marker Based Guide to Canine Behavior By Jack W F Kingston Are you constantly wondering why your dog doesn't listen no matter how many times you say sit or come Do you feel overwhelmed by all the conflicting advice out there about dog training What if you could learn a method that actually makes sense to your dog and turns training into a game you both

The Wolf Tamers: How They Made the Strong Weak David Sinclair, 2023-02-21 In the war of the wolves and the sheep what if the sheep started winning Are human wolves a keystone species of the human race If they were hunted to extinction leaving no one to winnow the mediocre mob what would happen to humanity The narrator in the movie Idiocracy was on point when he said Evolution does not necessarily reward intelligence With no natural predators to thin the herd it began to simply reward those who reproduced the most and left the intelligent to become an endangered species The same is true of strength Without the strong the weak will reproduce more and more and eventually there will only be weakness mediocrity an inability an impossibility to achieve anything great and glorious The strangest war is being fought It's a war to destroy human intelligence and human strength This war says that wolves must be exterminated or made into non wolves by taming them And then they can become pets You know just like dogs You put a collar on them You put a leash on them You take them for walks You tickle their tummy You make them perform tricks You make them roll over and play dead They are wholly dependent on you They have separation anxiety when you're not there They have to make the intelligent stupid They have to make the strong weak But they don't know what they're doing The task is not to tame wolves It's to make them smarter and stronger It's to sublimate them Without the wolves there is only decadence and degeneration Without the wolves to control mediocrity mediocrity grows exponentially Why did the Roman Empire fall It was because all the Roman wolves had gone Only mediocrities were left They could do nothing to hold back the barbarian tide Civilizations always end when the wolves vanish New cultures begin when new wolves start a

new lupine era full of strength and vigor Are you a lone wolf Are you one of the wolf pack Or are you part of the gang trying to tame all wolves Do you want to see the empire fall When it no longer has any strength left when mediocrities are in charge of everything then the end is certain As Wilfred Owen said What passing bells for these who die as cattle Was it for this the clay grew tall
