## **Exploring Affect Exploring Affect:**

*Exploring Affect* Silvan S. Tomkins, 1995-01-27 Silvan Tomkins was one of the most influential theorists on emotion and emotional expression. Over a period of 40 some years until his death in 1991 he developed a set of original important ideas about the nature of affect and its relationship to cognition and personality. Tomkins dealt with fundamental questions in a fresh and provocative way establishing affect as a separate biological system and providing compelling data on discrete affect expressions. Several years before his death Professor Tomkins agreed to bring his papers unpublished and published together into *Exploring Affect* for Cambridge Studies in Emotion and Social Interaction. He worked with Paul Ekman and Klaus Scherer to develop a structure for the book that would synthesize his theory of emotion. Unfortunately he died before he was able to complete the process. Virginia Demos who knew Professor Tomkins well took on the enormous task of compiling the papers and writing connective material for the book. This volume of Tomkins selected writings on affect brings together his works of four decades and makes them available at a more receptive time in the field. It is a treasure trove of provocative insightful and relevant ideas.

**Theory, Shame, and Christian Formation** Stephanie N. Arel, 2016-11-08 This book addresses the eclipse of shame in Christian theology by showing how shame emerges in Christian texts and practice in ways that can be neither assimilated into a discourses of guilt nor dissociated from embodiment. Stephanie N. Arel argues that the traditional focus on guilt obscures shame by perpetuating the image of the lonely sinner in guilt. Drawing on recent studies in affect and attachment theories to frame the theological analysis the text examines the theological anthropological writings of Augustine and Reinhold Niebuhr the interpretation of empathy by Edith Stein and moments of touch in Christian praxis. Bringing the affective dynamics of shame to the forefront enables theologians and religious leaders to identify where shame emerges in language and human behavior. The text expands work in trauma theory providing a multi layered theological lens for engaging shame and accompanying suffering *Affect Theory, Genre, and the Example of Tragedy* Duncan A.

Lucas, 2018-09-08 *Affect Theory Genre and the Example of Tragedy* employs Silvan Tomkins Affect Script theory of human psychology to explore the largely unacknowledged emotions of disgust and shame in tragedy. The book begins with an overview of Tomkins relationship to both traditional psychoanalysis and theories of human motivation and emotion before considering tragedy via case studies of Oedipus Hamlet and Death of a Salesman. Aligning Affect Script theory with literary genre studies this text explores what motivates fictional characters within the closed conditions of their imagined worlds and how we as an audience relate to and understand fictional characters as motivated humans *The Affect Lab* Grant

Bollmer, 2023-09-29 Examines how our understanding of emotion is shaped by the devices we use to measure it. Since the late nineteenth century psychologists have used technological forms of media to measure and analyze emotion. In *The Affect Lab*

Grant Bollmer examines the use of measurement tools such as electrical shocks photography video and the electroencephalograph to argue that research on emotions has confused the physiology of emotion with the tools that define its inscription Bollmer shows that the psychological definitions of emotion have long been directly shaped by the physical qualities of the devices used in laboratory research To investigate these devices The Affect Lab examines four technologies related to the history of psychology in North America spiritualist toys at Harvard University serial photography in early American psychological laboratories experiments on psychopaths performed with an instrument called an Offner Dynograph and the development of the electropsychometer or E Meter by Volney Mathison and L Ron Hubbard Challenging the large body of humanities research surrounding affect theory The Affect Lab identifies an understudied problem in formulations of affect how affect is a construction inseparable from the techniques and devices used to identify and measure it Ultimately Bollmer offers a new critique of affect and affect theory demonstrating how deferrals to psychology and neuroscience in contemporary theory and philosophy neglect the material of experimental scientific research Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions

**Michael Ondaatje: Haptic Aesthetics and Micropolitical Writing** Milena Marinkova,2011-07-14 This study of selected literary and cinematic works by Michael Ondaatje investigates the political potential of the Canadian author s aesthetics Contributing to current debates about affect and representation ideology critique and the artwork trauma and testimony this book uses the concept of the haptic to demonstrate how Ondaatje s multisensory fluid and historically inflected writing can forge an enabling relationship between audience author and text This is where Ondaatje s micropolitics often misconstrued as ideologically suspect aestheticism emerges a praxis that intimates how one can write and read politically with a difference

**The Palgrave Handbook of Affect Studies and Textual Criticism** Donald R. Wehrs,Thomas Blake,2017-12-01 This volume provides a comprehensive account of how scholarship on affect and scholarship on texts have come to inform one another over the past few decades The result has been that explorations of how texts address elicit shape and dramatize affect have become central to contemporary work in literary film and art criticism as well as in critical theory rhetoric performance studies and aesthetics Guiding readers to the variety of topics themes interdisciplinary dialogues and sub disciplinary specialties that the study of interplay between affect and texts has either inaugurated or revitalized the handbook showcases and engages the diversity of scholarly topics approaches and projects that thinking of affect in relation to texts and related media open up or enable These include but are not limited to investigations of what attention to affect brings to established methods of studying texts in terms of period genre cultural contexts rhetoric and individual authorship

**Religious Affects** Donovan O. Schaefer,2015-11-13 In Religious Affects Donovan O Schaefer challenges the notion that religion is inextricably linked to language and belief proposing instead that it is primarily driven by affects Drawing on affect theory evolutionary biology and poststructuralist theory Schaefer builds on the recent materialist shift in religious studies to

relocate religious practices in the affective realm an insight that helps us better understand how religion is lived in conjunction with systems of power To demonstrate religion s animality and how it works affectively Schaefer turns to a series of case studies including the documentary Jesus Camp and contemporary American Islamophobia Placing affect theory in conversation with post Darwinian evolutionary theory Schaefer explores the extent to which nonhuman animals have the capacity to practice religion linking human forms of religion and power through a new analysis of the chimpanzee waterfall dance as observed by Jane Goodall In this compelling case for the use of affect theory in religious studies Schaefer provides a new model for mapping relations between religion politics species globalization secularism race and ethics

*Intensive Psychotherapy for Persistent Dissociative Processes: The Fear of Feeling Real (Norton Series on Interpersonal Neurobiology)*

Richard A. Chefetz, 2015-04-06 Winner of the International Society for the Study of Trauma and Dissociation s ISSTD Pierre Janet Writing Award 2015 What really happens in dissociation Dissociative processes have long burdened trauma survivors with the dilemma of longing to feel real at the same time as they desperately want to avoid the pain that comes with that healing a dilemma that often presents particularly acute difficulties for healing professionals Recent clinical and neurobiological research sheds some light into the dark corners of a mind undergoing persistent dissociation but its integration into the practice of talking therapy has never until now been fully realized Intensive Psychotherapy for Persistent Dissociative Processes brings readers into the consultation room and into the minds of both patient and therapist like no other work on the treatment of trauma and dissociation Richard A Chefetz marries neuroscientific sophistication with a wealth of extended case histories following patients over several years and offering several verbatim session transcripts His unpacking of the emotionally impactful experience of psychodynamic talking therapy is masterfully written clearly accessible and singularly thorough From neurobiological foundations he builds a working understanding of dissociation and its clinical manifestations Drawing on theories of self states and their involvement in dissociative experiences he demonstrates how to identify persistent dissociation and its related psychodynamic processes including repetition compulsion and enactment He then guides readers through the beginning stages of a treatment with particular attention to the psychodynamics of emotion in both patient and therapist The second half of the book immerses readers in emotionally challenging clinical processes offering insight into the neurobiology of fear and depersonalization as well as case examples detailing struggles with histories of incest sexual addiction severe negativity negative therapeutic reactions enactment and object coercive doubting The narrative style of Chefetz s casework is nearly novelistic bringing to life the clinical setting and the struggles in both patient and therapist The only mystery in this clinical exposition as it explores several cases over a number of years is what will happen next In the depth of his examples and in continual self reflexive analysis of flaws in past treatments Chefetz is both a generous guide and an expert storyteller Intensive Psychotherapy for Persistent Dissociative Processes is unique in its ability to place readers in the consultation room of psychodynamic therapy With an evidence focused approach based in

neurobiology and a bold clinical scope it will be indispensable to new and experienced therapists alike as they grapple with the most intractable clinical obstacles Religion and Political Tolerance in America Paul Djupe, 2015-06-30 Religious institutions are often engaged in influencing the beliefs and values that individuals hold But religious groups can also challenge how people think about democracy including the extension of equal rights and liberties regardless of viewpoint or what is commonly called political tolerance The essays in Religion and Political Tolerance in America seek to understand how these elements interrelate The editor and contributors to this important volume present new and innovative research that wrestles with the fundamental question of the place of religion in democratic society They address topics ranging from religious contributions to social identity to the political tolerance that religious elites clergy hold and advocate to others and how religion shapes responses to intolerance The conclusion by Ted Jelen emphasizes that religion's take on political tolerance is nuanced and that they are not incompatible religion can sometimes enhance the tolerance of ordinary citizens

**Dire Emotions and Lethal Behaviours** Charles T. Stewart, 2008 **The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy** E. Virginia Demos, 2019-03-04 The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy explores central issues in current clinical work using the theories put forward by Silvan Tomkins and presenting them in detail as well as integrating them with the most up to date neuroscience findings and infancy research all based on a biopsychosocial dynamic systems approach Part I describes the essentials of life based on our evolutionary and biological heritage namely a need for a coherent understanding of one's world and the capacity to act in that world the infant's capacities are described in detail as embodying both Longitudinal data is provided beginning at birth into the third year of life Part II reviews current debates in psychoanalysis relating to motivation and the lack of an internally consistent theory Recent neuroscience findings are presented which both negate drive theory and support Tomkins theory His theory is then described in detail In Part III two case histories are presented one is a clinical case illustrating one of Tomkins affect powered scripts The second case is drawn from a longitudinal study extending from birth into early adulthood which is made sense of with the help of Tomkins theory Demos concludes with a look at competing approaches to theory and responds to recent cognitive based attempts to disprove both Tomkins work and the latest findings from neuroscience The Affect Theory of Silvan Tomkins for Psychoanalysis and Psychotherapy will appeal to psychoanalysts and psychoanalytic psychotherapists as well as psychiatrists psychologists social workers and psychiatric nurses *Capturing the Senses* Giacomo Landeschi, Eleanor Betts, 2023-06-12 This open access book surveys how digital technology can contribute effectively to improving our understanding of the past through a sensory engagement based on the evidence of material culture In particular it encourages specialists to consider senses and human agency as important factors in studying ancient space while recognising the role played by digital tools in enhancing a human centred form of analysis Significant advances in archaeological computing digital methods and sensory approaches have led archaeologists to rethink strategies and methods

for creating narratives of the past Recent progress in data visualisation and implementation as well as other nascent digital sensory methods means that it is now easier to explore and experience ancient space from a multiscale perspective from the individual body or single building to the wider landscape The chapters in *Capturing the Senses Digital Methods for Sensory Archaeologies* present innovative methods for representing an embodied experience of ancient space simulating but not recreating ancient behaviours and social interaction Chapters cover topics including the potentials and pitfalls of visualising recreating and re enacting experiencing the senses in Virtual Reality environments and also digital reconstructions and auralisations of ancient spaces to study sound sensory perception Overall the book demonstrates that multisensory approaches can give a new perspective on how ancient spaces were intended to be used by inhabitants to fulfil a series of purposes including conveying messages and regulating movement This is an open access book [Psychotherapy Research](#)

Omar C.G. Gelo, Alfred Pritz, Bernd Rieken, 2014-12-24 This book provides readers with essential information on the foundations of psychotherapy research and on its applications to the study of both psychotherapy process and outcome The aim is to stimulate a reflection on these issues in a way that will benefit researchers and clinicians as well as undergraduate and graduate students at different levels and from different perspectives Accordingly the book presents a balanced mix of chapters summarizing the state of the art in the field from different viewpoints and covering innovative topics and perspectives reflecting some of the most established traditions and at the same time emerging approaches in the field in several countries The contributors who were invited from among the experts in our national and international professional networks also represent a healthy mix of leading figures and young researchers The first part of the book addresses a number of fundamental issues in psychotherapy research at a historical philosophical and theoretical level The second part of the book is concerned with research on psychotherapy processes in this regard both quantitative and qualitative approaches are given equal consideration in order to reflect the growing relevance of the latter The book's third and last part examines research on psychotherapy outcomes primarily focusing on quantitative approaches Offering a balanced mix of perspectives approaches and topics the book represents a valuable tool for anyone interested in psychotherapy research **New Ideas about Eating Disorders**
