Exploring Art for Perspective Transformation Alexis Kokkos,2021-05-12 We live in a socio cultural reality which is dominated by an entrepreneurial and instrumental rationality as well as by a discriminative and populist mentality Questioning the validity of taken for granted sovereign perspectives is thus of vital importance Our contact with art can serve as a pathway through which we might be empowered to identify false life values and develop the disposition and ability to challenge them The learning potential of aesthetic experience is however barely exploited within educational systems In addition although major scholars have contributed to a deeper understanding of the liberating dimension of processing important artworks there has been surprisingly little discussion in the relevant literature focusing on educational practice Exploring Art for Perspective Transformation provides a comprehensive analysis and synthesis of theoretical views pertaining to the emancipatory process of exploring art Moreover it presents the educational method Transformative Learning through Aesthetic Experience TLAE with reference to particular examples of implementation TLAE is addressed to adult educators and school teachers regardless of the subject they teach and their theoretical background on aesthetics It involves engaging learners in exploring works from fine arts literature theatre cinema and music with a view to promoting critical reflection on one s potentially problematic perspectives

Art and Entertainment Andy Hamilton, 2024-02-29. Philosophers have discussed art or artistic practices such as poetry since ancient times. But systems of art and entertainment appeared only in the modern era in the West during the 18th and 19th centuries. And philosophers have largely neglected the concept of entertainment. In this book, Andy Hamilton explores art and entertainment from a philosophical standpoint. He argues against modernist theory that art and entertainment are not opposites but form a loosely connected conceptual system. Against postmodernism, however, he insists on their vital differences. Hamilton begins by questioning the received modernist view, examining artist-entertainers including Jane Austen, Charles Dickens, Louis Armstrong and Billie Holiday. Entertainment, he argues, is by nature audience-centred but so is art in a different way. Thus while art should pass the test of time, entertainment must pass the test of its own time; it has to entertain at the time it is produced. Art and entertainment are interdependent concepts and must be understood together with other aesthetic concepts including criticism, genius, canons and design. These concepts form the subject of later chapters of this book where Hamilton develops a meritocratic position that is neither elitist nor populist. He also addresses the contemporary charge of cultural appropriation and qualifies it. An innovative feature of the book is the inclusion of dialogues with artists, critics and academics that help to recast or reformulate the debate.

Art and Entertainment: A Philosophical Exploration is essential reading for those working in art and aesthetics and will also be of interest to those in related disciplines such as cultural studies, music and film studies with an interest in entertainment.
