Exploring Humanity Intercultural Perspectives On Humanism Reflections On Inhumanity:

Exploring Humanity Mihai Spariosu, Jörn Rüsen, Sorin Antohi, Chun-Chieh Huang, 2012 *Exploring Humanity* Mihai I. Spariosu, Jörn Rüsen, 2012-09-11 The old humanistic model aiming at universalism ecumenism and the globalization of various Western systems of values and beliefs is no longer adequate even if it pleads for an ever wider inclusion of other cultural perspectives and for intercultural dialogue In contrast it would be wise to retain a number of its assumptions and practices which it incidentally shares with humanistic models outside the Western world We must now reconsider and remap it in terms of a larger global reference frame This anthology does just that thus contributing to a new field of study and practice that could be called intercultural humanism *Humanism in Intercultural Perspective* Henner Laass, Univ. Prof. Dr. Dr.h.c.mult., 2015-07-15 This book is a breakthrough in illuminating humanism For the first time it is presented in an intercultural perspective It introduces Chinese Indian African Islamic and Western traditions into the intercultural discussion about basic issues of understanding the human world By this means it recognizes different disciplinary perspectives history philosophy as well as religious literary and gender studies Special emphasis is put on the controversial relationship between humanism and religion This complex network of argumentations is an answer to the challenge of cultural orientation at the age of globalization Humanism is brought to life as a synthesis of transcultural values and a mutual and critical recognition of cultural differences **Approaching Humankind** Jörn Rüsen, 2013 Approaching Humankind Jörn Rüsen, 2013-06-19 Every human life form encapsulates an idea of humankind and humanity Today this very idea is challenged by the various and diverging needs for cultural orientation in the age of globalization One of the recent attempts to meet these challenges is provided by a new humanism with an intercultural intent Such humanism can be conceptualized only by the collaborative efforts of different academic disciplines at exploring the human being as the gist of what is meant by humanity Thus this volume explores the pertinent fields of knowledge from the perspectives of philosophy theology anthropology sociology economy psychology neurobiology history and gender studies Focusing on the guiding question of what is meant by being a human the contributions of this volume encompass a fascinating spectrum of insights which will orientate future discussions on humanity and humanism **Humanism: Foundations, Diversities, Developments** Jörn Rüsen, 2021-04-25 The book describes humanism in a systematic and historical perspective It analyzes its manifestation and function in cultural studies and its role in the present Within the book special attention is given to the intention of contemporary humanism to overcome ethno centric elements in the cultural orientation of contemporary living conditions and to develop humane dimensions of this orientation This is linked to a fundamental critique of the current post human self understanding of the humanities Furthermore the intercultural aspect in the understanding of humanism is emphasized for non Western cultures also have their own humanistic traditions Two further aspects are also addressed the Holocaust as the most radical challenge to humanistic thinking and the relationship of humanism to nature Sitting at the intersection of history and philosophy the book

is perfect for those exploring humanism from an historical perspective

The Concept of Humanity in an Age of

Globalization Longxi Zhang, 2011-12-07 Rethinking humanity as a concept in our age of globalization and its relevance to the social and political reality of our times are the topic of this book. It calls for the reclaiming of humanism as an effective response to the conflict, turmoil, and violence we witness in the world today. Concepts of humanity and humanism have become suspect of naiveté at best and guilty of bad faith and repressive ideologies at worst. Yet hope for improvement is incorrigibly human: the concept of humanity still holds enormous attraction to intellectuals and humanistic scholars. At the same time, it is important to realize that the critique of humanism is very much based on and limited to Western social and historical experience. To reconceptualize humanity and humanism from a truly global perspective will help reclaiming a more inclusive kind of humanism. In this sense, a cross-cultural perspective is important for reclaiming humanism in our age of globalization. The present volume is the result of such an effort. The diversity of the authors' views speaks eloquently of the complexity of the concept of humanity or what constitutes the distinctly human and therefore the necessity to have an in-depth dialogue on the fate of humanity.

Inclusive Humanism Christoph Antweiler, 2012 The diversity of interconnected cultures on a bounded planet requires more shared orientations The humanities and politics have to face fundamental questions What does a humanism look like that does not move too rapidly to universalize the views and historical experiences of the European or American world How can we conceive of globality as a new entity without playing unity and diversity off against one another Does a world culture that is becoming ever closely related in fact need common values or only rules of human exchange How can we succeed at civilizing an ever present ethnocentrism How do we keep the terms culture and humanity from being misused as weapons in identity wars Any realistic cosmopolitanism must proceed from an understanding of humankind as one entity without requiring us to re design cultures to fit on with some sort of global template Answers can be gained by deploying shared characteristics of humans as well as pan cultural commonalities This book offers an anthropologically informed foundation for addressing pertinent questions of intercultural exchange

Becoming Human Paul Sheehan, 2003-07-30 The postmodern condition has delivered us into a world where our humanity can no longer be taken for granted Whether his place is ceded to nature or technology man is no longer the measure of all things rather he is locked into processes in which the only permanence is change Becoming Human offers a sustained engagement with these and other paradoxes about human being and its nature in the 21st century world Beginning with the notion that the human is not an immutable given but rather an ever changing entity this collection of essays considers our multifarious condition through the perspective of a variety of fields including philosophy sociology literature and film studies In this book the authors make coherent and accessible a sprawling field The diversity of writers and approaches challenges current thinking about humanity providing material for future scholars and researchers and prompting us to ponder these questions more deeply while at the same time offering the reader a comprehensive intelligible survey of recent inquiries into a potentially bewildering field

What It Means to be Human Joanna Bourke, 2013-07-23 In 1872 a woman known only as An Earnest Englishwoman published a letter titled Are Women Animals in which she protested against the fact that women were not treated as fully human In fact their status was worse than that of animals regulations prohibiting cruelty against dogs horses and cattle were significantly more punitive than laws against cruelty to women The Earnest Englishwoman's heartfelt cry was for women to become animal in order to gain the status that they were denied on the grounds that they were not part of mankind In this fascinating account Joanna Bourke addresses the profound question of

what it means to be human rather than animal How are people excluded from political personhood How does one become entitled to rights The distinction between the two concepts is a blurred line permanently under construction If the Earnest Englishwoman had been capable of looking 100 years into the future she might have wondered about the human status of chimeras or the ethics of stem cell research Political disclosures and scientific advances have been re locating the human animal border at an alarming speed In this meticulously researched illuminating book Bourke explores the legacy of more than two centuries and looks forward into what the future might hold for humans women and animals

Humanism Carole McGranahan, 2018-11-30 Anthropology has long centered on the human taking human life as a main focus and exploring multiple ways to be human In recent years however we have also seen the rise of the idea of the Anthropocene and emerging debates on the place of the post human Can and should the human still occupy a privileged position in a universe composed of the nonhuman the other than human the inhuman and the trans human Reckoning with concepts practices and relations across these categories requires that we move beyond classical understandings of humanism to replace them with a contemporary reworking of the possibilities and limits of anthropological humanism This timely book is the product of the second Annual Debate of Anthropological Keywords a collaborative project between HAU the American Ethnological Society and L'Homme The aim of the debate is to reflect critically on keywords and terms that play a pivotal and timely role in discussions of different cultures and societies This volume brings together leading thinkers to reflect anew on humanism and the anthropological project with insightful contributions from Cl o Carastro Didier Fassin Hugh Gusterson Saba Mahmood Carole McGranahan Joel Robbins Danilyn Rutherford and Lucy Suchman

Humanism in Trans-Civilizational Perspectives Jana S. Rožker, 2024-09-29 This book introduces into the current global ethics debate models of humanism developed in classical Chinese traditions which have not yet been comprehensively presented to Western scholarship or integrated into the framework of global discourses on social ethics and morality It creates new paradigms for an understanding of humanism that meets the demands of our time It begins by presenting European descriptions and critical assessments of this discourse and then moves to an exploration of humanistic ideas shaped through historical developments in Asia with a focus on the Chinese tradition In this sense the book is written from a transcivilizational perspective The methods used in the research transcend that is surpass and overcome the rigid isolating

and essentialist concept of civilization At the same time the book points to the possibility of transformation through the exchange of knowledge and ideas between different civilizations Within this framework the book starts from the assumption that the ontology of civilizations and cultures is not based on immutable substances but on the relations between different factors that constitute them as categories The transcivilizational perspective rooted in transcultural dialogues between philosophies that originated in different cultures and civilizations is particularly valuable because of the globalized world in which we live today This means that the problems that affect people in different parts of the world and the issues that are embedded in different geopolitical and developmental frameworks also affect all of humanity This book is of particular interest to scholars and students of global ethics globalization Asian philosophy and Sinology **Universal Humanity**
