*Exquisite Corpse* Michael Sorkin, 1991 *Exquisite Corpse* was a game played by the surrealists in which someone drew on a piece of paper folded it and passed it to the next person to draw on until finally the sheet was opened to reveal a calculated yet random composition In this entertaining and provocative book Michael Sorkin suggests that cities are similarly assembled by many players acting with varying autonomy in a complicit framework An unfolding terrain of invention the city is also a means of accommodating disparity of contextualizing sometimes startling juxtapositions Sorkin's aim is to widen the debate about the creation of buildings beyond the immediate issues of technology and design He discusses the politics and culture of architecture with daring often devastating observations about the institutions and personalities who have dominated the profession over the past decade Their preoccupation with the empty style of beach houses and Disneyland has consistently trivialized the full constructive scope of contemporary architecture's possibilities Sorkin's interventions range from the development scandals of New York where skyscrapers stand at the intersection between grid and greed through the deconstructivist architectural culture of Los Angeles to the work and ideas of architects developers and critics such as Alvar Aalto Norman Foster Paul Goldberger Michael Graves Coop Himmelblau Philip Johnson Leon Krier Frank Lloyd Wright Richard Rogers Carlo Scarpa James Stirling Donald Trump Tom Wolfe and Lebbeus Woods Throughout Sorkin combines stinging polemic with a powerful call for a rebirth of architecture that is visionary and experimental a recuperated dreamy science

From the invention of skyscrapers and airplanes to the development of the nuclear bomb ideas about the modern increasingly revolved around vertiginous images of elevation and decline and new technologies of mobility and terror from above In *The Vertical Imagination and the Crisis of Transatlantic Modernism* Paul Haacke examines this turn by focusing on discourses of aspiration catastrophe and power in major works of European and American literature as well as film architecture and intellectual and cultural history This wide ranging and pointed study begins with canonical fiction by Franz Kafka Virginia Woolf James Joyce and John Dos Passos as well as poetry by Guillaume Apollinaire Hart Crane and Aim C saire before moving to critical reflections on the rise of New York City by architects and writers from Le Corbusier to Simone de Beauvoir the films of Alfred Hitchcock and theories of cinematic space and time and postwar novels by Kurt Vonnegut Thomas Pynchon and Leslie Marmon Silko among many other examples In tracing the rise and fall of modernist discourse over the course of the long twentieth century this book shows how visions of vertical ascension turned from established ideas about nature the body and religion to growing anxieties about aesthetic distinction technological advancement and American capitalism and empire It argues that spectacles of height and flight became symbols and icons of ambition as well as direct indexes of power and thus that the vertical transformation of modernity was both material and imagined taking place at the same time through the rapidly expanding built environment and shifting ideological constructions of high and low Concrete and Clay

Matthew Gandy, 2003-08-29 An interdisciplinary account of the environmental history and changing landscape of New York City In this innovative account of the urbanization of nature in New York City Matthew Gandy explores how the raw materials of nature have been reworked to produce a metropolitan nature distinct from the forms of nature experienced by early settlers The book traces five broad developments the expansion and redefinition of public space the construction of landscaped highways the creation of a modern water supply system the radical environmental politics of the barrio in the late 1960s and early 1970s and the contemporary politics of the environmental justice movement Drawing on political economy environmental studies social theory cultural theory and architecture Gandy shows how New York s environmental history is bound up not only with the upstate landscapes that stretch beyond the city s political boundaries but also with more distant places that reflect the nation s colonial and imperial legacies Using the shifting meaning of nature under urbanization as a

framework he looks at how modern nature has been produced through interrelated transformations ranging from new water technologies to changing fashions in landscape design Throughout he considers the economic and ideological forces that underlie phenomena as diverse as the location of parks and the social stigma of dirty neighborhoods

the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to international notoriety for advocating the disappearance of architecture **White City, Black City** Sharon
