How to Apply

To optimize product performance apply this product within a few days after mowing and delay mowing again for a few days after the application. Most effective weed control will be obtained when GreenView Crabgrass Control plus Lawn Food is activated by rainfall or irrigation. Performance is improved if application is followed by ½ inch of rainfall or irrigation. Erratic weed control may result if not activated by rainfall or irrigation within 30 days after application.

Spreader Directions:

Broadcast Spreader: Apply in a single pass by starting on the outside border and apply in a circular path working toward the center.

Drop Spreader: First make two passes along the top of the area you'll be covering. Then make two passes along the bottom area. Then move back and forth along the long part of the lawn. On each pass, as you reach the strips at the top and bottom of the area to be covered, shut off the spreader. It's also important to shut off the spreader when you are stopped.
