1. Make sure the positive and negative connections from the battery or battery's deck have been removed.
2. Raise the front of the car and set it securely on safety-jack stands. Make sure the car's safety brake lock is "ON" and the rear wheels are blocked.
3. Remove the push/pull switch from the wiring harness.
4. Starting in the battery/engine compartment on the driver side, position the wiring harness with the two tailight wires going toward the rear of the car.
5. Following the car frame, thread the harness with front headlight connectors and ignition switch connectors towards the front and up under the center of the hood.
6. Connect the harness to the headlights.
7. Thread the wires for the push/pull switch along the left wire harness leading to the key switch and fasten securely.
8. Remove the block, retaining nut and washer from the switch and connect it to the harness, insert the shaft of the switch into the hole previously drilled and secure using the washer and nut to reattach the block.
9. Make sure the switch wires are free from obstruction and sharp edges and secure to the grill and main wire harness with zip ties.
10. Run the remaining wire looms toward the rear of the car, following the frame. Connect the short loom to the driver side tailight and the long loom follows the rear frame cross tube and connects to the passenger side.
11. Make sure the wires and push/pull switch are not touching the frame or any metal parts on the car.
12. Connect the positive wire of the loom to the positive terminal of the battery or power supply.
13. Pull the push/pull switch to the "on" position.
14. Briefly touch the negative wire to the negative terminal. Light sparks are normal, but a bright, long flash indicates a short in the system. If the lights illuminate correctly, push the push/pull switch to the "off" position and connect the wire to the terminal.
15. Inspect the wiring installation to make sure nothing is pinched or rubbing and that no portion of the harness is below the frame. Secure harness as needed with zip ties.
16. Lower the car from the jack stands.
