From Research To Manuscript A Guide To Scientific Writing:

From Research to Manuscript Michael Jay Katz, 2009-08-29 Observations Plus Recipes It has been said that science is the orderly collection of facts about the natural world Scientists however are wary of using the word fact Fact has the feeling of absoluteness and universality whereas scientific observations are neither absolute nor universal For example children have 20 deciduous baby teeth is an observation about the real world but scientists would not call it a fact Some children have fewer deciduous teeth and some have more Even those children who have exactly 20 deciduous teeth use the full set during only a part of their childhood When they are babies and toddlers children have less than 20 visible teeth and as they grow older children begin to lose their deciduous teeth which are then replaced by permanent teeth Children have 20 deciduous baby teeth is not even a complete scientific statement For one thing the statement children have 20 deciduous teeth does not tell us what we mean by teeth When we say teeth do we mean only those that can be seen with the unaided eye or do we also include the hidden unerupted teeth An observation such as children have 20 deciduous teeth is not a fact and by itself it is not acceptable as a scientific statement until its terms are explained scientifically children have 20 deciduous teeth must be accompanied by definitions and qualifiers

From Research to Manuscript Michael J. Katz, 2006-07-10 From Research to Manuscript written in simple straightforward language explains how to understand and summarize a research project It is a writing guide that goes beyond grammar and bibliographic formats by demonstrating in detail how to compose the sections of a scientific paper This book takes you from the data on your desk and leads you through the drafts and rewrites needed to build a thorough clear science article At each step the book describes not only what to do but why and how It discusses why each section of a science paper requires its particular form of information and it shows how to put your data and your arguments into that form Importantly this writing manual recognizes that experiments in different disciplines need different presentations and it is illustrated with examples from well written papers on a wide variety of scientific subjects As a textbook or as an individual tutorial From Research to Manuscript belongs in the library of every serious science writer and editor
