Max-Neef, 1982 Beskrivelser af to barfods konomiske udviklingsprojekter i Ecuador og Brasilien Global Challenge and Local Response Walter B. Stöhr, 1990 The volume grew out of research undertaken as a part of the UN University s European Perspectives Project It addresses the consequences of the failure of large scale industrial enterprise and the inability of central government policies to cope with the results of economic restructuring in a series of comparative case studies showing how local communities throughout Europe East and West rural and industrial have responded to economic dislocation and decline and how these local initiatives have become the basis for economic regeneration Annotation copyrighted by Book News Inc Portland OR What is Global Engineering Education For? The Making of International Educators, Part III Gary Downey, Kacey Beddoes, 2022-06-01 Global engineering offers the seductive image of engineers figuring out how to optimize work through collaboration and mobility Its biggest challenge to engineers however is more fundamental and difficult to better understand what they know and value qua engineers and why This volume reports an experimental effort to help sixteen engineering educators produce personal geographies describing what led them to make risky career commitments to international and global engineering education The contents of their diverse trajectories stand out in extending far beyond the narrower image of producing globally competent engineers Their personal geographies repeatedly highlight experiences of incongruence beyond home countries that provoked them to see themselves and understand their knowledge differently The experiences were sufficiently profound to motivate them to design educational experiences that could provoke engineering students in similar ways For nine engineers gaining new international knowledge challenged assumptions that engineering work and life are limited to purely technical practices compelling explicit attention to broader value commitments For five non engineers and two hybrids gaining new international knowledge fueled ambitions to help engineering students better recognize and critically examine the broader value commitments in their work A background chapter examines the historical emergence of international engineering education in the United States and an epilogue explores what it might take to integrate practices of critical self analysis more systematically in the education and training of engineers Two appendices and two online supplements describe the unique research process that generated these personal geographies especially the workshop at the U S National Academy of Engineering in which authors were prohibited from participating in discussions of their manuscripts Table of Contents Communicating Across Cultures Humanities in the International Education of Engineers Bernd Widdig Linking Language Proficiency and the Professions Michael Nugent Language Life and Pathways to Global Competency for Engineers and Everyone Else Phil McKnight Bridging Two worlds John M Grandin Opened Eyes From Moving Up to Helping Students See Gayle G Elliott What is Engineering for A Search for Engineering beyond Militarism and Free markets Juan Lucena Location Knowledge and Desire From Two Conservatisms to

The Good Life Beyond Growth Hartmut Rosa, Christoph Henning, 2017-08-15

Many countries have experienced a decline of economic growth for decades an effect that was only aggravated by the recent global financial crisis What if in the 21st century this is no longer an exception but the general rule Does an economy without growth necessarily bring hardship and crises as is often assumed Or could it be a chance for a better life Authors have long argued that money added to an income that already secures basic needs no longer enhances well being Also ecological constraints and a sinking global absorption capacity increasingly reduce the margin of profitability on investments Efforts to restore growth politically however often lead to reduced levels of social protection reduced ecological and health standards unfair tax burdens and rising inequalities Thus it is time to dissolve the link between economic growth and the good life This book argues that a good life beyond growth is not only possible but highly desirable It conceptualizes the good life as a fulfilled life that is embedded in social relations and at peace with nature independent of a mounting availability of resources In bringing together experts from different fields this book opens an interdisciplinary discussion that has often been restricted to separate disciplines Philosophers sociologists economists and activists come together to discuss the political and

social conditions of a good life in societies which no longer rely on economic growth and no longer call for an ever expanding circle of extraction consumption pollution waste conflict and psychological burnout Read together these essays will have a major impact on the debates about economic growth economic and ecological justice and the good life in times of crisis

The Top 50 Sustainability Books Wayne Visser, 2017-09-08 This unique title draws together in one volume some of the best thinking to date on the pressing social and environmental challenges we face as a society These are the Top 50 Sustainability Books as voted for by the University of Cambridge Programme for Sustainability Leadership's alumni network of over 3 000 senior leaders from around the world In addition to profiles of all 50 titles many of the authors share their most recent reflections on the state of the world and the ongoing attempts by business government and civil society to create a more sustainable future Many of these authors have become household names in the environmental social and economic justice movements from Rachel Carson Ralph Nader and E F Schumacher to Vandana Shiva Muhammad Yunus and Al Gore Others such as Aldo Leopold Thomas Berry and Manfred Max Neef are relatively undiscovered gems whose work should be much more widely known By featuring these and other seminal thinkers *The Top 50 Sustainability Books* distils a remarkable collective intelligence one that provides devastating evidence of the problems we face as a global society yet also inspiring examples of innovative solutions it explores our deepest fears and our highest hopes for the future It is a must read for anyone who wants to tap into the wisdom of our age *Marketing in the Climate Crisis* Carys Egan-Wyer, Jon

Bertilsson, 2025-08-07 Are marketers the proponents for continuous economic growth the ultimate climate criminals So far their job has been to create unnecessary demand and to promote the overconsumption and waste that threatens our very existence on this planet In this book however the authors explore the potential of marketing to do the opposite that is to help create a more ecologically sustainable future This book argues that marketing researchers and practitioners have a crucial role to play in reimagining and promoting alternatives to growth capitalism Existing sustainability narratives focus on sacrifice and limitation rendering potential futures uninspiring and unappealing Drawing on critical marketing scholarship and degrowth principles this book proposes an alternative way of thinking dystopian optimism which allows us to imagine degrowth as desirable The authors suggest that the transition to a post growth future can be achieved by theoretically reimagining that future and outline practical ways for critical marketers to contribute to this transition This book adds to the small but growing stream of marketing literature that concerns itself with marketing's role in the currently unfolding ecological calamity Marketers and marketing researchers will learn how marketing's role in the calamity is threatening its legitimacy but by following the chapter by chapter analysis they will also learn how marketing can transform itself by focusing on selling sustainable futures This book is essential reading for those who want to understand why it is so hard for us to imagine desirable sustainable futures and who want to be part of changing that For those who are interested in saving not just marketing's legitimacy but also the planet it is a must read for scholars and upper level students of critical marketing

Sustainable Development David Reid, 2013-11-05 Sustainable development is the catchphrase of the 1990s Governments around the world international institutions local organizations and NGOs have committed themselves to its principles and have adopted policies to promote it But sustainable development is difficult to define let alone implement and its proponents and advocates may all interpret it in very different ways This introductory guide provides a clear and accurate account of what sustainable development actually is David Reid gives an overview of the history of the concept and how it has evolved in recent years describes the obstacles to achieving sustainable development and looks at recent progress towards implementing it and at how much we have still to do **A Contribution**

to Reduce Oil Consumption Sebastian Veit, 2006-12-22 Inhaltsangabe Abstract Unlike industrialized countries the recent rise in oil prices has had a severe negative impact on the economies of oil importing developing countries Conventional strategies and models to reduce oil dependence which have been implemented in the powerful northern economies are often not feasible for developing countries due to high technological costs or unsuitability Furthermore oil reserves will deplete and consequently world market prices will climb rather than decline over the next decade Therefore I propose that cross sector strategies have to consider socio economic circumstances of developing countries The strategies I suggest do not rely on conventional methods such as coal gas nuclear or renewable energy My research further identifies variables on which national policies can be implemented in order to contribute to a reduction of global oil consumption To this end I have followed a quantitative and qualitative approach Preliminary quantitative analysis This demonstrates that some developing country economies are more vulnerable to oil price shocks than others This can be measured by the ratio of the value of net oil imports to GDP Qualitative analysis of cross sectoral strategy This polarizes methods applicable to industrialized countries on one hand and solutions that work in the socio economic circumstances of developing countries on the other Potentials to contribute to a reduction in the oil consumption are identified in the education agriculture urban planning and transportation sector In the transportation sector data for engine idling was considered scientifically for the first time The framework of policy analysis is used in the study to develop a general strategy to enter into a policy dialogue at the national level Various examples are also used to this end Baken s ESMAP study 2005 had concluded that in the near future there is little prospect for African countries to reduce their import dependence on oil My research further finds that gains in fuel savings can be 10 15 % from eco driving campaigns 2 5 % from tire inflation policy 2 5 % from idling campaigns Further reduction can be brought about by changes in the mode of transport autos instead of cars as well as increased urban walkability Education for private housing efficiency and boosting agricultural production in biomass and bio fuels are some other steps The research also reveals substantial **The History of Development** Gilbert Rist, 2002-10 With all its hopes of a more just and materially prosperous world development has fascinated societies in both North and South Looking at this collective fancy in retrospect Gilbert Rist shows the underlying similarities of its various theories and strategies and their shared inability to

transform the world He argues persuasively that development has always been a kind of collective delusion which in reality has simply promoted a widening of market relations despite the good intentions of its advocates

Environmental Management for Sustainable Development Christopher J. Barrow, 2002-01-08 Covers the full breadth of principles practice and policy issues concerned with environmental management providing a comprehensive resource and reference point for students and practitioners in this field

Diversity in Africa Kurt April, Marylou Shockley, 2006-11-24 Africa's diversity is its greatest resource and challenge In this book leaders from business government academia and the voluntary sector discuss the implications of this diversity for leadership Throughout contributors relate organisational issues to the social political and cultural contexts and focus on the role of effective leadership

A Biblical Path for a Prosperous Society Brian Baugus, 2019-06-25 This book examines what Deuteronomy has to say about human rights and the role of government culture and investment in creating a flourishing and prosperous society By exploring the political economic principles Deuteronomy lays out as well as other parts of the Bible Baugus argues that those principles are still applicable today and can be valuable in helping developing nations to become prosperous and in helping developed nations many of which seem to have lost sight of these principles stay that way Milk and Honey will be of interest to scholars and students who are curious about what the ancient foundational texts of Western civilization have to say about prosperity growth and what a flourishing political economy looks like

From Capitalistic to Humanistic Business Ulrich Steinvorth, Carlos Largacha-Martinez, Claus Dierksmeier, 2014-12-22 Transforming Capitalism addresses the challenges to shareholder capitalism It explores fair play in the market place challenges on systemic organizational and individual levels the need to refocus our economic system around community and cooperation the current challenges and transform capitalism
