**Last Chance Tourism** Harvey Lemelin, Jackie Dawson, Emma J. Stewart, 2013-03-01 Concerns over vanishing destinations such as the Great Barrier Reef Antarctica and the ice cap on Mt Kilimanjaro have prompted some travel operators and tour agencies to recommend these destinations to consumers before they disappear This travel trend has been reported as disappearing tourism doom tourism and most commonly last chance tourism where tourists explicitly seek vanishing landscapes or seascapes and or disappearing natural and or social heritage However despite this increasing form of travel there has been little examination in the academic literature of last chance tourism phenomenon This is the first book to empirically examine and evaluate this contemporary tourism development providing a new angle on the effects of global change and pressures of visitation on tourism destinations It aims to develop the conceptual definition of last chance tourism examine the ethics surrounding this type of travel and provide case studies highlighting this form of tourism in different regions and in different contexts In particular it critically reviews the advantages of publicizing vulnerable destinations to raise awareness and promote conservation efforts Conversely the book draws attention to the issue of attracting more tourists seeking to undergo such experiences before they are gone forever accelerating the negative impacts It further examines current trends discusses escalating challenges provides management strategies and highlights future research opportunities Last Chance Tourism is a timely and multi disciplinary volume featuring contributions from leading scholars in the fields of leisure tourism anthropology geography and sociology It draws on a range of international case studies and will be of interest to students researchers and academics interested in Tourism Environmental Studies and Development Studies

**Ancient Advanced Technology in South America** Norah Romney, 2021-02-13 There are a host of ancient ruins in South America claimed by the Inca inherited by the Inca conquered by the Inca and built by the Inca Although one label has stuck on each monument or ancient site it is clear there are many layers of construction physically and conceptually Academics and Scholars still debate who built these monuments did they inherit them Was there a Pre Inca culture but everyone can appreciate how advanced the Inca Ancient Ruins found in the highlands of South America The Inca were largest empire ever seen in the Americas and the largest in the world at that time yet doubt is cast on their monuments

and origins Tiahuanaco a region of Bolivia that holds many remnants of ancient civilizations demonstrates some of the most unique and amazingly precise examples of stonework in the world The ancient people who created these walls and buildings used such a high degree of mathematical expertise that the workmanship is astounding even to modern day people They marvel at how the stone cutters from long ago created all of it with simple hand tools The high plains of Peru and Bolivia in the Andes Mountains holds a wealth of historical sites each one more amazing than the next Scholars and archaeologists had only seen the same type of masonry in ancient Egypt before this Although some historians call this Inca architecture this later time period civilization had little to do with creating these fantastic structures The Incas dominated this area from approximately the 13th to 14th centuries AD up until the time of the Spanish explorers conquest of the region Indeed they built some magnificent structures but the ones most interesting for their precision and longevity came from even older groups Some of these empires were called the Wari and the Tiahuanaco They existed hundreds or even thousands of years before the Inca came to power Multiple historians who specialize in architectural studies have dedicated a lot of their time and knowledge to figuring out how ancient groups of people who did not use advanced tools or even the wheel could create such structures The most advanced chisels and hammers of the time would have been created from copper stone and wood With these simple hand tools people dug granite andesite and porphyry out of quarries After transporting them to the final locations they then carved them with smooth precision so they would fit together almost seamlessly What techniques could these ancient experts use to make such flat and smooth surfaces exact angles and joints that would not allow a single blade of grass to squeeze between Historians can only guess about some of the methods that allowed for such unique stone cutting and building styles *Книжное обозрение (с приложением PRO) No14/2013 ,2020-12-05 PRO*
