**The Ottoman and Mughal Empires** Suraiya Faroqhi, 2019-08-08 For many years Ottomanist historians have been accustomed to study the Ottoman Empire and or its constituent regions as entities insulated from the outside world except when it came to campaigns and conquests on the one hand and incorporation into the European dominated world economy on the other However now many scholars have come to accept that the Ottoman Empire was one of the not very numerous long lived world empires that have emerged in history This comparative social history compares the Ottoman to another of the great world empires that of the Mughals in the Indian subcontinent exploring source criticism diversities in the linguistic and religious fields as political problems and the fates of ordinary subjects including merchants artisans women and slaves

*Image of the Modern Ottoman Sultan* Alison Terndrup, 2025-06-16 Over the course of the dynamic nineteenth century the image of the Ottoman sultan maintained a complex relationship with ideas surrounding the modernisation of the Empire This book investigates that relationship by situating the ta v r i h m y n imperial portrait within the wider program of top down modernisation movements initiated at the end of the eighteenth century under Sultan Selim III r 1789 1807 and culminating in the Tan m t Reorganization era 1839 76 The study breaks new ground by considering the use of new image making technologies and aesthetic trends including oil on canvas paintings lithographic prints and photographs primarily at the imperial court in Istanbul but also at the provincial courts of the Ottoman Balkans

*Transottoman Matters* Arkadiusz Blaszczyk, Robert Born, Florian Riedler, 2021-12-06 This volume analyzes historical processes of mobility by focusing on material objects Mobility as a shorthand for various related processes such as migration transfer entanglement and translation involves human actors immaterial elements such as ideas and knowledge but also objects in various forms and functions For example as material infrastructures they are the basis for transport and travel as goods they are the object and purpose of trade or gift exchange By focusing on the way objects determined certain processes of mobility and how their social meaning and materiality was transformed in these processes the contributors hope to gain deeper insight into the historical relations between the Ottoman Empire Eastern Europe and Persia

*Women in the Ottoman Empire* Suraiya Faroqhi, 2023-01-26 It is an often ignored but fundamental fact that in the Ottoman world as in most empires there were first class and second class subjects Among the townspeople peasants and nomads subject to the sultans who might be Muslims or non Muslims adult Muslim males were first class subjects and all others including Muslim boys and women were of the second class As for the female members of the elite while less privileged than the males in some respects their life chances might be better than those of ordinary women Even so they shared the risks of pregnancy childbirth and epidemic diseases with townswomen of the subject class and to a certain extent with village women as well Thus the study of Ottoman women is indispensable for understanding Ottoman society in general In this book the agency of women from a diverse range of class religious ethnic and geographic backgrounds is for the first time woven into the social and political

history of the Ottoman Empire from the early modern period to its dissolution in 1918 Suraiya Faroqhi charts the history of elite and non elite women in thematic chapters concentrating on urban women family life work slavery education and survival in times of war In the process the book introduces readers to the key sources primary and secondary necessary to reconstruct and understand the ways that females navigated social legal and economic constraints through the central prisms of family relations work and charity The first introductory social history of women in the Ottoman Empire and including a timeline and extended further reading section this book will be essential reading for scholars and students of Ottoman history and the history of women in the Middle East

**The Heritage of Edirne in Ottoman and Turkish Times**  
Birgit Krawietz, Florian Riedler, 2019-12-16 Modern scholarship has not given Edirne the attention it deserves regarding its significance as one of the capitals of the Ottoman Empire This edited volume offers a reinterpretation of Edirne s history from Early Ottoman times to recent periods of the Turkish Republic Presently disconnections and discontinuities introduced by the transition from empire to nation state still characterize the image of the city and the historiography about it In contrast this volume examines how the city engages in the forming deflecting and creative appropriation of its heritage a process that has turned Edirne into a UNESCO heritage hotspot A closer historical analysis demonstrates the dissonances and contradictions that these different interpretations and uses of heritage produce From the beginning Edirne was shaped by its connectivity and relationality to other places above all to Istanbul This perspective is employed at many different levels e g with regard to its population institutions architecture infrastructures and popular culture but also regarding the imaginations Edirne triggered In sum this multi disciplinary volume boosts urban history beyond Istanbul and offers new insight into Ottoman and Turkish connectivities from the vantage point of certain key moments of Edirne s history

Why Not Build the Mosque? Dimitris Antoniou, 2025-02-11 An ethnography of a long unbuilt mosque in Greece that explores government operations and contemporary democracy Why Not Build the Mosque tells the story of the Greek state s centuries long attempt to build a central mosque After the fall of Ottoman Empire Greek Orthodoxy entwined with Greek nationalism and by the twentieth century the state came to imagine Islam as incompatible with a Greek speaking Orthodox Christian identity And so as late as 2020 the contemporary Greek state did not have a mosque even as its Islamic population grew and increasingly required a place of worship Focusing on the failed effort in the early 2000s to build a mosque in a suburb of Athens and on the subsequent successful realization of the project in 2020 Dimitris Antoniou investigates the roles that the Orthodox Church politicians concerned about the political cost of supporting a mosque and the community played in the project s delays failures and its bittersweet success The mosque that was ultimately built in 2020 was itself a compromise a modest building that failed to deliver on the dreamed of and finally illusory building discussed in the 2000s As Antoniou brings readers from under the radar home mosques to the offices of polling companies politicians and media corporations he reveals that the years long debate over if how and where to build a mosque was a matter greater than religion or nationalism

alone Indeed the story of the central mosque in Athens compellingly demonstrates how productive unrealized plans can be for some stakeholders here politicians and members of media who built reputations on their support for or opposition to the unbuilt mosque while leaving other stakeholders unable to move a project forward even when the will of the majority is with them Ultimately Why Not Build the Mosque sheds light on what it takes for a government to make tangible changes to infrastructure in development for a community happen in contemporary democracies

**Politics of Pasts and Futures in (Post-)Imperial Contexts** Sebastian Fahner,Christian Feichtinger,Rogier Heijden,2024-12-02 Although empires have played a decisive role in political thinking and the orientation of political goals at all times the focus of research has so far mostly been on spatial and ideological aspects This volume on the other hand offers a multi disciplinary collection of studies that deal with the instrumentalization and ongoing impacts of perspectives on empire and their place in time Coming from archaeology history art history literary studies and social sciences the individual case studies discuss perceptions of imperial histories and imagined futures of empires both in imperial and in post imperial contexts The transcending historical significance of the imperial ideas and ideals shows the deep and long lasting effects of empire in landscapes mindscapes and social structures The diachronic cut through all epochs from antiquity to modern times is complemented by a broad global view to deepen the temporal understanding of imperial imaginaries as well as their political implications

The Greek Revolution Mark Mazower,2022-11-22 Winner of the Duff Cooper Prize Named a top history book of the year by The Economist From one of our leading historians the definitive history of the Greek War of Independence The Greek War of Independence was an unlikely cause a disorganized collection of Greek patriots up against what was still one of the most storied empires in the world the Ottomans The revolutionaries needed all the help they could get And they got it as Europeans and Americans embraced the idea that the heirs to ancient Greece the wellspring of Western civilization were fighting for their freedom against the proverbial Eastern despot the Turkish sultan Mazower does full justice to the more complicated reality on the ground as a revolutionary conspiracy triggered outright rebellion By the time the dust settled Greece was free and Europe was changed forever It was a victory for a completely new kind of politics international in its range and affiliations popular in its origins romantic in its sentiments and radical in its goals The Greek War of Independence was the first war in which a people claimed liberty for themselves and overthrew an entire empire to attain it inaugurating a new world of nation states the world in which we still live

*Comparative and Global Framing of Enslavement* Stephan Conermann,Youval Rotman,Ehud R. Toledano,Rachel Zelnick-Abramovitz,2023-09-05 The study of enslavement has become urgent over the last two decades Social scientists legal scholars human rights activists and historians who study forms of enslavement in both modern and historical societies have sought and often achieved common conceptual grounds thus forging a new perspective that comprises historical and contemporary forms of slavery What could

certainly be termed a turn in the study of slavery has also intensified awareness of enslavement as a global phenomenon inviting a comparative trans regional approach across time space divides Though different aspects of enslavement in different societies and eras are discussed each of the volume s three parts contributes to and has benefitted from a global perspective of enslavement The chapters in Part One propose to structure the global examination of the theoretical ideological and methodological aspects of the global local and glocal Part Two Regional and Trans regional Perspectives of the Global presents through analyses of historical case studies the link between connectivity and mobility as a fundamental aspect of the globalization of enslavement Finally Part Three deals with personal points of view regarding the global local and glocal Grosso modo the contributors do not only present their case studies but attempt to demonstrate what insights and added value explanations they gain from positioning their work vis vis a broader big picture

Turkish History and Culture in India ,2020-08-17 This interdisciplinary volume addresses the history literature and material culture of peoples of Turkish origins in India over the eleventh to eighteenth centuries Although many ruling dynasties and members of the elite in this period claimed Turkish descent this aspect of their identity has seldom received much scholarly attention The discussion is enriched by a focus on connections and comparisons with other parts of the broader Turko Persian world especially Anatolia Although discussions of Turkish Muslim rulers in India take account of their Central Asian origins and connections links with Anatolia stretching back to the medieval period were also important in the formation of Turkish society and culture in India and have been much less explored in the literature The volume contains contributions by some of the leading scholars in the field

*The Eloquence of Art* Andrea Olsen Lam,Rossitza Schroeder,2020-04-14 For those within the fields of art history and Byzantine studies Professor Henry Maguire needs no introduction His publications transformed the way art historians approach medieval art through his insightful integration of rhetoric poetry and non canonical objects into the study of Byzantine art His ground breaking studies of Byzantine art that consider the natural world magic and imperial imagery among other themes have redefined the ways medieval art is interpreted From notable monuments to small scale and privately used objects Maguire s work has guided a generation of scholars to new conclusions about the place of art and its function in Byzantium In this volume 23 of Henry Maguire s colleagues and friends have contributed papers in his honour resulting in studies that reflect the broad range of his scholarly interests

*Cities as Palimpsests?* Elizabeth Key Fowden,Suna Çağaptay,Edward Zychowicz-Coghill,Louise Blanke,2022-02-24 The metaphor of the palimpsest has been increasingly invoked to conceptualize cities with deep living pasts This volume seeks to think through and beyond the logic of the palimpsest asking whether this fashionable trope slyly forces us to see contradiction where local inhabitants saw and see none to impose distinctions that satisfy our own assumptions about historical periodization and cultural practice but which bear little relation to the experience of ancient medieval or early modern persons Spanning the period from Constantine s foundation of a New Rome in the fourth century to the contemporary aftermath of the Lebanese civil war this book integrates

perspectives from scholars typically separated by the disciplinary boundaries of late antique Islamic medieval Byzantine Ottoman and modern Middle Eastern studies but whose work is united by their study of a region characterized by resilience rather than rupture The volume includes an introduction and eighteen contributions from historians archaeologists and art historians who explore the historical and cultural complexity of eastern Mediterranean cities The authors highlight the effects of the multiple antiquities imagined and experienced by persons and groups who for generations made these cities home and also by travelers and other observers who passed through them The independent case studies are bound together by a shared concern to understand the many ways in which the cities pasts live on in their presents
