*The Loeb Classical Library. No. 174, James Loeb, 1925*      Fight, Flight, Mimic Diego Gambetta, Thomas Hegghammer, 2024-07-12 Fight Flight Mimic is the first systematic study of deceptive mimicry in the context of wars Deceptive mimicry the manipulation of individual or group identity includes passing off as a different individual as a member of a group to which one does not belong or for a group to sign its action as another group Mimicry exploits the reputation of the model it mimics to avoid capture flight to strike undetected at the enemy fight or to hide behind or besmirch the reputation of the model group false flag operations These tactics have previously been described anecdotally mixed in with other ruses de guerre but the authors show that mimicry is a distinct form of deception with its own logic and particularly consequential effects on those involved The book offers a theory and game theoretic model of mimicry an overview of its use through history and a deep empirical exploration of its modern manifestations through several case studies by leading social scientists The chapters cover mimicry in the context of the Northern Ireland conflict terrorism campaigns in 1970s Italy the height of the Iraq insurgency the Rwandan genocide the Naxalite rebellion in India and jihadi discussion forums on the Internet      **Science** Philippa Lang, 2015-10-13 Ancient science is a subject that commands extensive general interest This is the first non technical survey of the interface between ancient and modern science It is aimed at crossover student sales in classics the history of ideas and the history and philosophy of science Modern science and its technology are the children of the seventeenth century But the bold investigative experimentation and scientific systems of thought that this era spawned were in turn thoroughly influenced by Greek and Roman authors and ideas Xenophanes ideas about fossils informed the science of geology Copernicus and his novel notion that the earth revolved around the sun and not vice versa were arguably influenced by the Samian philosopher and mathematician Aristarchus And the anatomists of Alexandria still even today have valuable insights to bring to current ethical discussions of vivisection and animal welfare Shedding fresh light on topics such as Euclid's geometry Aristotelian physics and the proto Darwinism of pre Socratic thinkers like Empedocles Philippa Lang addresses the fascinating differences and similarities between ancient and modern conceptions of science She discusses the origins of the cosmos natural laws in mathematics and physics conceptions and philosophies of biology and disease ideas about mechanistic science and technology as they have been used to control the societies of human beings and the important nexus between science morality and ethics Greek and Roman parallels illuminate and clarify the meaning of science itself

*The Age of the Catholic Monarchs, 1474-1516* A. D. Deyermond, Ian Richard Macpherson, 1989-01-01 Keith Whinnom Professor of Spanish and Deputy Vice Chancellor in the University of Exeter died on March 6 1986 He was one of the leading hispanists of his generation and a world authority on the literature of the reign of the Catholic Monarchs and in a quite different area on pidgin and creole languages The contributors to this memorial volume are all specialists in the literature of Keith Whinnom's chosen period and all had close links with him through personal friendship research collaboration and

correspondence They include his most admired teacher two young scholars whom he helped at the outset of their careers and representatives of the academic generations in between they come from Britain Spain the United States Argentina and France Most of the articles deal with the favorite Whinnom subjects of cancionero poetry sentimental romance and Celestina and there are others on historiography humanistic prose chivalric romance sermons drama and the interaction of history and literature A bibliography of Keith Whinnom's scholarly writings is included *Monastic Archaeology* Graham Keevill, Mick Aston, Teresa Hall, 2017-01-31 The study of monasteries has come a long way since late the late 19th century The emphasis has shifted away from reconstructing the layouts of monastic buildings to a better understanding of the wider monastic environment The papers in this volume partly based on a conference held in Oxford in 1994 are written by some of today's foremost scholars and reflect the diversity of research now being carried out *Water Technology in the Middle Ages* Roberta J. Magnusson, 2003-04-01 Focusing attention on gravity fed water flow systems in medieval cities and monasteries *Water Technology in the Middle Ages Cities Monasteries and Waterworks* after the Roman Empire challenges the view that hydraulic engineering died with the Romans and remained moribund until the Renaissance Roberta Magnusson explores the systems technologies how they worked what uses the water served and also the social rifts that created struggles over access to this basic necessity Mindful of theoretical questions about what hastens technological change and how society and technology mutually influence one another the author supplies a thoughtful and instructive study Archeological historical and literary evidence vividly depicts those who designed constructed and used medieval water systems and demonstrates a shift from a public administrative to a private innovative framework one that argues for the importance of local initiatives The following chapters attempt to chart a course between the Scylla and Charybdis of technological and social determinism While writing them I have tried to strike a balance between the technical and human aspects of medieval hydraulic systems and to remember that beneath the welter of documents and diffusion patterns configurations and components ordinances and expenditures lie the perceptions the choices and often the plain hard work of individual men and women from the Preface

**The Spartan Scytale and Developments in Ancient and Modern Cryptography** Martine Diepenbroek, 2023-11-16 This book offers a comprehensive review and reassessment of the classical sources describing the cryptographic Spartan device known as the scytale Challenging the view promoted by modern historians of cryptography which look at the scytale as a simple and impractical stick Diepenbroek argues for the scytale's deserved status as a vehicle for secret communication in the ancient world By way of comparison Diepenbroek demonstrates that the cryptographic principles employed in the Spartan scytale show an encryption and coding system that is no less complex than some 20th century transposition ciphers The result is that contrary to the accepted point of view scytale encryption is as complex and secure as other known ancient ciphers Drawing on salient comparisons with a selection of modern transposition ciphers and their historical predecessors the reader is provided with a detailed overview and analysis of the surviving classical sources that similarly reveal the

potential of the scytale as an actual cryptographic and steganographic tool in ancient Sparta in order to illustrate the relative sophistication of the Spartan scytale as a practical device for secret communication This helps to establish the conceptual basis that the scytale would in theory have offered its ancient users a secure method for secret communication over long distances

**Birds in Roman Life and Myth** Ashleigh Green,2023-03-03 This book explores the place of birds in Roman myth and everyday life focusing primarily on the transitional period of 100 BCE to 100 CE within the Italian peninsula A diverse range of topics is considered in order to build a broad overview of the subject Beginning with an appraisal of omens augury and auspices including the sacred chickens consulted by generals before battle it goes on to examine how Romans farmed birds hunted them and kept them as pets It demonstrates how the ownership and consumption of birds were used to communicate status and prestige and how bird consumption mirrored wider economic and social trends Each topic adopts an interdisciplinary approach considering literary evidence alongside art material culture zooarchaeology and modern ornithological knowledge The inclusion of zooarchaeology adds another dimension to the work and highlights the value of using animals and faunal remains to interpret the past Studying the Roman view of birds offers great insight into how they conceived of their relationship with the gods and how they stratified and organised their society This book is a valuable resource for bird lovers and researchers alike particularly those studying animals in the ancient world

Henry Lloyd and the Military Enlightenment of Eighteenth- Century Europe Patrick Speelman,2002-09-30 Intellectual historians generally view the Enlightenment as a pacifist or anti war movement Military historians typically consider 18th century military thinkers as backward looking and inept Speelman challenges the views of both groups through a consideration of the writings of Henry Lloyd a soldier and Welsh philosophe who combined enlightened thought and military experience to distill a distinct theory of war Based on previously unused or underutilized primary materials this is the first biography of this key enlightenment thinker who advanced the general understanding of war as it existed in his day Lloyd wrote a multivolume history of the Seven Years War from which he derived the Principles of War a treatise on economics that prefigured the liberal theories of Adam Smith a rhapsody on the invasion and defense of Great Britain and finally an anonymous critique of the English constitution that he used to demand political and electoral reform Overall he argued for the reform of military institutions and practices through breaking from custom and traditional norms In his works Lloyd examined warfare within the larger context of secular philosophy and human society and thus he personified the link between the military society and the Enlightenment that historians often ignore or discount
