

FSUIPC – QUICK START TUTORIAL

“ Controlling A Brand New Decade of Flight Simulation Hardware ! ”

Courtesy of : www.SimSamurai.net

V1.1 January 15, 2010

Credit to Pete Dowson for creating FSUIPC ... The “Holy Grail” for the world of Flight Simulation !

NOTE : This tutorial is primarily designed for the assignment and calibration of CH Products USB controller device hardware using the FSUIPC registered payware utility. However, this could also serve as a general guide for use with any USB device such as Saitek, Precision Flight Controls, or many others.

NOTE : Compatibility for this tutorial has been tested for Windows XP 32/64, Windows Vista 32/64 and Windows 7 32/64 using Flight Simulator 2004 (FS9) and Flight Simulator X (FSX).

NOTE : Use of this tutorial requires the purchase of the FSUIPC utility payware version 4.57 (FSX) or version 3.96 (FS9) which is downloaded from www.Schiratti.com and paid for at www.SimMarket.com

NOTE : This quick start guide for the FSUIPC registered edition will detail how all of your USB device controllers can be exclusively assigned and/or calibrated by FSUIPC and not FS itself, nor by the CH Control Manager software that is routinely associated with CH Product devices. Furthermore this guide contains options of how to only have your CH Throttle Quadrant controlled by FSUIPC while your Yoke and Rudder pedals can remain controlled by the Flight Simulator or you can configure these in any combination therein. Thus this tutorial will detail elements of key flexibility for your configuring desires. Finally the last pages of this guide detail how to create specific aircraft type user profiles so that you can easily fly a multitude of various aircraft without having to continually reassign control functions to match each aircraft type. If creating user profiles is of interest to you please see the last pages of this guide before you begin programming your devices. You may also want to consult pages 26 and 27 of Pete Dowson's own default User Guide. Once FSUIPC is installed its config file is located inside the Modules folder found in the root directory of your simulator.

A FEW BRIEF WORDS OF P.C. ADVICE

If you like to fly online I also highly recommend finding my “Mega-Ultimate FS-Inn Installation Tutorial for VATSIM”. This separate tutorial is included in the sim-tech “UGTAFS” manual available from www.simsamurai.net but can also be found on the AVSIM forums or elsewhere. This other 13 page tutorial I mention is a very detailed account of how to properly set up everything you will ever need to know for flying in VATSIM while using FS-Inn as a connection host.

More importantly this other tutorial also includes several “pre-configuring” pages that can come in very handy before you proceed with this FSUIPC tutorial. In many ways both of these two tutorials can and will go hand in hand. The FS-Inn set-up tutorial has some key information about how to properly set-up your PC before you install FSUIPC or FS-Inn as a connection utility. There is a lot of additional information provided on the other tutorial that will also help you to optimize your computer for flight simulation use with Windows XP, Vista, and Windows 7. So please grab it, read it, and then proceed on with this tutorial if you have purchased the payware version of FSUIPC.

Now onward and upward with the meat, potatoes, and gravy that is... FSUIPC !
