suggest a means of cost savings when benefits cease upon recovery This book considers recovery from multiple angles Traditionally Nora Jacobson notes recovery was defined as symptom abatement or a return to a normal state of health but as activists mental health professionals and policymakers sought to develop recovery oriented systems other meanings emerged Jacobson s analysis describes the complexes of ideas that have defined recovery in various contexts over time The first meaning recovery as evidence involves the theories statistics therapies legislation and myriad other factors that constituted the first one hundred years of mental health services provision in the United States Recovery as experience brought the voices of patients into the conversation while recovery as ideology drew on both recovery as evidence and recovery as experience to rally support for specific approaches and service delivery models This in turn became the basis for recovery as policy which developed as assorted representative bodies such as commissions and task forces planned reforms of the mental health system Finally recovery as politics emerged as reformers confronted harsh economic realities and entrenched ideas about evidence experience and ideology Throughout Jacobson draws on her research in Wisconsin a state with a long history of innovation in mental health services Her study there included several years of fieldwork and interviews with the government appointed groups charged with making recovery policy Thus *In Recovery* also provides an inside account of the process of policy development and implementation

Al-Anon Narratives Grazyna Zajdow,2002-08-30 According to the author in Australia men drink alcohol as a mark of masculinity and women take care of drinking men as a part of normative femininity And while research on alcoholics and alcoholism is common very few studies consider the lives of the women who are married to alcoholics Here Zajdow details and explores the lives of such women who belong to Al Anon where they may share their experiences and offer their stories in a nonthreatening and supportive environment The author presents the narratives of these women in the context of her analysis of the self help group to demonstrate how people construct and reconstruct their lives as coherent stories about themselves and to show how these self stories can be changed and reconceptualized within the context of the group Unique in its examination of self stories offered within a self help group this book challenges sociological knowledge about the way these mutual aid groups operate as communities of interest and help Zajdow begins by laying the groundwork through a discussion of the professional and lay discourses on women s relationships to alcoholic men She then provides the basis for using self stories to examine a group of people the individuals in the group and the behavior of the group in general A history of Al Anon as a self help group is also detailed and the author compares the Australian meetings to meetings in other parts of the world The stories themselves are then examined and discussed in terms of how they relate to group processes and individual change through Al Anon Tracing the way that these women move from a place of despair to one of hope and meaningful change this also represents a sociological exploration of gender families and communities **Courage to**
