*Write Here: Developing Writing Skills in a Media-Driven World* Randi Brummett de Leon, Brooke Hughes, 2020-04-30. *Write Here* is designed to teach students essential reading and writing skills using media examples to help explain academic concepts and provide opportunities for practice. It is adaptable because it covers the basics of reading, writing and the modes of writing; it is appropriate to use in developmental composition classrooms. However, it also covers such topics as logical fallacies, rhetoric, timed writing, academic writing, source integration and MLA/APA documentation, making it appropriate for a first year or stretch composition course. Many beginning writing students are underprepared and feel that writing just isn't for them. The authors hope to dispel that myth by using media examples and a conversational tone to introduce and teach the material. *Write Here* provides examples that are interesting to students while allowing them to connect to the subject matter on a more personal level. Additionally, the process of analyzing the media helps students sharpen their reading, writing and critical thinking skills.

Carillo, 2015-01-15 *Securing a Place for Reading in Composition* addresses the dissonance between the need to prepare students to read not just write complex texts and the lack of recent scholarship on reading writing connections Author Ellen C Carillo argues that including attention to reading practices is crucial for developing more comprehensive literacy pedagogies Students who can read actively and reflectively will be able to work successfully with the range of complex texts they will encounter throughout their post secondary academic careers and beyond Considering the role of reading within composition from both historical and contemporary perspectives Carillo makes recommendations for the productive integration of reading instruction into first year writing courses She details a mindful reading framework wherein instructors help students cultivate a repertoire of approaches upon which they consistently reflect as they apply them to various texts This metacognitive frame allows students to become knowledgeable and deliberate about how they read and gives them the opportunity to develop the skills useful for moving among reading approaches in mindful ways thus preparing them to actively and productively read in courses and contexts outside first year composition *Securing a Place for Reading in Composition* also explores how the field of composition might begin to effectively address reading including conducting research on reading revising outcome statements and revisiting the core courses in graduate programs It will be of great interest to writing program administrators and other compositionists and their graduate students *From Reading to Math*
