Fantasies of Identification Ellen Samuels, 2014-04-25 Explores the roots of modern understandings of bodily identity In the mid nineteenth century United States as it became increasingly difficult to distinguish between bodies understood as black white or Indian able bodied or disabled and male or female intense efforts emerged to define these identities as biologically distinct and scientifically verifiable in a literally marked body Combining literary analysis legal history and visual culture Ellen Samuels traces the evolution of the fantasy of identification the powerful belief that embodied social identities are fixed verifiable and visible through modern science From birthmarks and fingerprints to blood quantum and DNA she examines how this fantasy has circulated between cultural representations law science and policy to become one of the most powerfully institutionalized ideologies of modern society Yet as Samuels demonstrates in every case the fantasy distorts its claimed scientific basis substituting subjective language for claimed objective fact From its early emergence in discourses about disability fakery and fugitive slaves in the nineteenth century to its most recent manifestation in the question of sex testing at the 2012 Olympic Games *Fantasies of Identification* explores the roots of modern understandings of bodily identity

Queering the Biopolitics of Citizenship in the Age of Obama J. Rohrer, 2014-09-21 The book from the interdisciplinary fields of queer theory critical race theory feminist political theory disability studies and indigenous studies to demonstrate that analyzing contemporary notions of citizenship requires understanding the machinations of governmentality and biopolitics in the re production of the proper citizen [Technoskepticism](#) DISCO Network, 2025-02-11 From Munchausen by Tiktok to wellness apps to online communities to AI the DISCO Network explores the possibilities that technoskepticism can create This is a book about possibility and refusal in relation to new technologies Though refusal is an especially powerful mode particularly for those who have historically not been given the option to say no people of color and

disabled people have long navigated the space between saying yes and saying no to the newest technologies Technoskepticism relates some of these stories to reveal the possibilities skepticism can create The case for technoskepticism unfolds across three sections the first focused on disability the creative use of wellness apps and the desire for diagnosis the second on digital nostalgia and home for Black and Asian users who produced communities online before home pages gave way to profiles and the third focused on the violence inherent in AI generated Black bodies and the possibilities for Black style in the age of AI Acknowledging how the urge to refuse new technologies emerges from specific racialized histories the authors also emphasize how care can look like an exuberant embrace of the new

The Life Worth Living Joel Michael Reynolds, 2022-05-17 A philosophical challenge to the ableist conflation of disability and pain More than 2 000 years ago Aristotle said let there be a law that no deformed child shall live This idea is alive and well today During the past century Supreme Court Justice Oliver Wendell Holmes Jr argued that the United States can forcibly sterilize intellectually disabled women and philosopher Peter Singer argued for the right of parents to euthanize certain cognitively disabled infants The Life Worth Living explores how and why such arguments persist by investigating the exclusion of and discrimination against disabled people across the history of Western moral philosophy Joel Michael Reynolds argues that this history demonstrates a fundamental mischaracterization of the meaning of disability thanks to the conflation of lived experiences of disability with those of pain and suffering Building on decades of activism and scholarship in the field Reynolds shows how longstanding views of disability are misguided and unjust and he lays out a vision of what an anti ableist moral future requires The Life Worth Living is the first sustained examination of disability through the lens of the history of moral philosophy and phenomenology and it demonstrates how lived experiences of disability demand a far richer account of human flourishing embodiment community and politics in philosophical inquiry and beyond Accessibility features Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions

The Disarticulate James Berger, 2014-05-23 Language is integral to our social being But what is the status of those who stand outside of language The mentally disabled wild children people with autism and other neurological disorders as well as animals infants angels and artificial intelligences have all engaged with language from a position at its borders In the intricate verbal constructions of modern literature the disarticulate those at the edges of language have paradoxically played essential defining roles Drawing on the disarticulate figures in modern fictional works such as Billy Budd The Sound and the Fury Nightwood White Noise and The Echo Maker among others James Berger shows in this intellectually bracing study how these characters mark sites at which aesthetic philosophical ethical political medical and scientific discourses converge It is also the place of the greatest ethical tension as society confronts the needs and desires of the least of its brothers Berger argues that the disarticulate is that which is unaccountable in the discourses of modernity and thus stands as an alternative to the prevailing social order Using literary history and theory as well as disability and trauma theory he examines how these

disarticulate figures reveal modernity's anxieties in terms of how it constructs its others Reproductive Labor and Innovation Jennifer Denbow, 2024-09-27 In *Reproductive Labor and Innovation* Jennifer Denbow examines how the push toward technoscientific innovation in contemporary American life often comes at the expense of the care work and reproductive labor that is necessary for society to function. Noting that the gutting of social welfare programs has shifted the burden of solving problems to individuals, Denbow argues that the aggrandizement of innovation and the degradation of reproductive labor are intertwined facets of neoliberalism. She shows that the construction of innovation as a panacea to social ills justifies the accumulation of wealth for corporate innovators and the impoverishment of those feminized and racialized people who do the bulk of reproductive labor. Moreover, even innovative technology aimed at reproduction such as digital care work platforms and noninvasive prenatal testing obscures structural injustices and further devalues reproductive labor. By drawing connections between innovation discourse, the rise of neoliberalism, financialized capitalism, and the social and political degradation of reproductive labor, Denbow illustrates what needs to be done to destabilize the overvaluation of innovation and to offer collective support for reproduction.

Deafening Modernism Rebecca Sanchez, 2015-10-02 *Deafening Modernism* tells the story of modernism from the perspective of Deaf critical insight. Working to develop a critical Deaf theory independent of identity-based discourse, Rebecca Sanchez excavates the intersections between Deaf and modernist studies. She traces the ways that Deaf culture, history, linguistics, and literature provide a vital and largely untapped resource for understanding the history of American language politics and the impact that history has had on modernist aesthetic production. Discussing Deaf and disability studies in these unexpected contexts highlights the contributions the field can make to broader discussions of the intersections between images, bodies, and text. Drawing on a range of methodological approaches including literary analysis and history, linguistics, ethics, and queer cultural and film studies, Sanchez sheds new light on texts by T. S. Eliot, Ezra Pound, Gertrude Stein, William Carlos Williams, Charlie Chaplin, and many others. By approaching modernism through the perspective of Deaf and disability studies, *Deafening Modernism* reconceptualizes deafness as a critical modality enabling us to freshly engage topics we thought we knew.

Staking Claim Judy Rohrer, 2016-05-28 In the heart of the Pacific Ocean, Hawai'i exists at a global crosscurrent of indigeneity and race, homeland and diaspora, nation and globalization, sovereignty and imperialism. In order to better understand how settler colonialism works and thus move decolonization efforts forward, *Staking Claim* analyzes competing claims of identity, belonging, and political status in Hawai'i. Author Judy Rohrer brings together an analysis of racial formation and colonization in the islands through a study of legal cases, contemporary public discourse, local media, and literature, and Hawai'i scholarship. Her analysis exposes how racialization works to obscure with the ultimate goal of eliminating native Hawaiian indigeneity, homeland, nation, and sovereignty. *Staking Claim* argues that the dual settler colonial processes of racializing native Hawaiians, erasing their indigeneity, and indigenizing non-Hawaiians enable the staking of non-Hawaiian claims to Hawai'i. It encourages us to
