Death In Tomorrow's Shadow

H. Melvin James,2024-12-24 There is only one speck of land in the entire world where activities literally take place in the shadow of tomorrow It is a remote island in the Arctic Circle beyond the northwestern tip of the Aleutian Island chain and located just east of the international date line Beyond the west shore of the Bering Strait on the other side of the date line stands the mountains of the Kamchatka Peninsula When the sun sets on a rare clear day that mountain range towering in the domain of tomorrow casts a shadow over the small and remote island of today With less than thirty working days before retirement FBI Special Agent Rhet Bradley is abruptly assigned to investigate a mysterious and bizarre death on that isolated island His investigation is stymied by the secrecy of the multiple and disparate clandestine operations being conducted there by various contingents of the US military and government agencies Early in his investigation Agent Bradley is confronted with powerful Washington DC politicians and bureaucrats who insist that his official reports should be contrived to serve their particular agendas Distrust among the secretive agencies military units bureaucrats and politicians complicates Bradley s case Concurrently intense blizzard conditions and a petty illicit drug dealer threaten Rhet s life While contending with the myriad of hazards and obstacles Rhet Bradley must set aside his personal concerns including the untimely death of his lifelong best friend his son s pending return from the war in Vietnam and his lack of preparations for his looming retirement Throughout his investigation Rhet remains uncertain of who he can trust whether a mysterious stranger is yet another foil to mislead his investigation if the victim was a traitor or a double agent if he will be removed from the assignment or if he will be fired discredited and lose his pension

arrest the brother she's been looking for Includes the bonus novella A Wedding on Honeysuckle Ridge for the first time in print **Back to Tomorrow** Deirdre O'Dare, 2022-03-05 Librarian Emily Dennison has always loved history but catapulted into 1889 Tombstone she finds life far from the idyll she imagined Meeting Zach Tremaine a newspaperman from Philadelphia she gets involved in his quest to rescue his younger sister from her abusive paramour gambler Jake McEuen This leads to more adventure than Emily ever thought possible Eventually she has to confess to Zach that she is from far away not in distance but in time Fearful of being torn back to 2000 but missing her modern conveniences she hardly dares to love him though she aches to Zach isn't quite sure what to make of Emily so different from any woman he has ever known but so sweet and spunky she wins his admiration and soon his heart Just when he thinks he has convinced her they belong together a bolt of lightning tears her away Or was it Joker Jake McEuen seeking revenge Can Zach live long enough to search until he finds her Can she get back to tomorrow in time to save him from McEuen's murderous rage **Coal: Its Role in Tomorrow's Technology** Charles Simeons, 2013-10-22 Coal Its Role in Tomorrow's Technology A Sourcebook on Global Coal Resources focuses on the increasing consideration of coal as an alternative energy source taking into consideration the mining production and research and development programs of various countries on this mineral The book first offers information on energy demand particularly noting the increasing consumption of energy around the world The experience of the United States in meeting its energy demand through importation of oil and natural gas is discussed The manuscript then examines the sources of coal and other resources including types and properties of coal and disturbances in coal seams The publication takes a look at the state of industries and coal production capabilities of various countries such as the USSR China India Poland Australia South Africa and Canada The text also considers the national research and development programs of the USSR United States China India Poland France and other countries on coal preparation monitoring and production The manuscript discusses modern exploration programs on coal mining plants and equipment gasification of coal and conversion of chemicals from coal The text is a primary reference for readers interested in studying coal as an alternative energy source *Don't Send Him in Tomorrow* Jarlath O'Brien, 2016-08-04 In *Don't Send Him in Tomorrow* Jarlath O'Brien shines a light on the marginalised disenfranchised and forgotten children of today's schools The percentage of children achieving the government's expected standard in benchmark tests is national news every year The progress that children with learning difficulties and SEN make is never discussed because it is not understood That is a problem The bone crushing infrastructure which professionals have to negotiate is a problem The fact that so many parents have to fight tooth and nail so that the needs of their children are met something the rest of us would consider a basic entitlement is a problem This book describes how the system can be improved if and when these marginalised children are given higher priority by the powers that be There is a widespread lack of understanding about special schools the work they do and the children they educate the sector is largely invisible Jarlath O'Brien has become increasingly frustrated by this and the varying quality

of provision for children with learning difficulties and SEN in mainstream schools The successes of special schools and pupil referral units in Ofsted inspections are just not celebrated or analysed in the same way that mainstream schools are While mainstream schools have their hands tied by fears over progress measures There is a human cost to the accountability culture that reduces schooling to data and judgements this is felt most profoundly by children with SEN and their families Jarlath shares some of the problems he s witnessed with inclusion and exclusion mainstream schools actively encouraging children with SEN to look elsewhere parents reporting their children have been formally or informally excluded from school and socially excluded by the parents of other children children asked to leave their mainstream schools because of their behaviour usually behaviour that is caused by their needs not being adequately addressed children who are in school but isolated from their peers If a child can t participate in activities or trips with the rest of the class or spends much of the day working one to one with a teaching assistant is this really inclusion The Pupil Premium has been established to ensure that children in receipt of free school meals are not disadvantaged why does something similar not exist for children with SEN Every health and wealth indicator that you could use to measure people with learning difficulties and special educational needs SEN reveals something alarming They die younger They work less They are more likely to live in poverty or end up in prison or face mental health difficulties They are much more likely to be excluded from school They are more likely to be bullied at school This has to end We all have to choose to commit to recognising that society as it is today is a difficult place for young people to thrive When you have autism or Down syndrome or any physical or learning difference it s even harder and the system as it stands isn t helping We need to acknowledge that this is not right that such a state of affairs must change and that we all have a part to play in making that change happen Jarlath offers suggestions for politicians Ofsted local authorities head teachers SENCOs teachers and teaching assistants about what they can do to make a difference For all politicians head teachers SENCOs teachers and parents
