Doing Interpretive Research Koen P. R. Bartels, Hendrik Wagenaar, 2025-05-13 Interpretivism has an intuitive appeal to many social researchers but they often feel ill equipped to do it Other social researchers tend to believe that interpretivism is a specialized niche with little relevance to their research practice What has been lost is the awareness that interpretation is an explanatory logic and form of inquiry that is at the root of all social science research including quantitative research In this volume the authors guide social researchers and instructors in better understanding and improving the experience of doing interpretive research They explore the centrality of experience in learning and teaching interpretive research paying special attention to the role of emotions in the learning process and the way that negative emotions such as doubt and anxiety can impart learning The authors provide a novel approach to methods teaching by offering a set of heuristics open ended strategies of inquiry and discovery for improving the practice of social research Uniquely they demonstrate how emotions can be leveraged in the learning process to uncover surprising new insights about social reality and unlock researchers imagination They reveal how social researchers engaged or interested in interpretivism

in learning can turn their research into an enjoyable productive and imaginative experience      Spaces that Tell Stories  
Donna R. Braden, 2019-07-12 Historical environments delight visitors because of their ability to make them feel transported to another time and place These environments found in both museum exhibitions and historic structures are usually rich with objects that hint at deeper stories and context But these spaces often lack rigor in terms of historical and interpretive methodology along with a thoughtful and purposeful integration of storytelling principles *Spaces That Tell Stories Creating Historical Environments* offers a fresh look at historical environments providing a roadmap for applying this rigor and integrating these principles into the creation of such environments It begins by delving into the power of these environments for museum visitors drawing upon multiple cross disciplinary fields An in depth how to methodology follows which begins with the steps of framing the project by aligning it with institutional goals defining audiences involving visitor studies and inviting community engagement It continues through the steps of researching creating interpreting refining and evaluating the impact of the environment The author s methodology is applicable to environments in both historic structures and museum exhibits from different eras places and topics It is also scalable to museums varying sizes and budgets To give a sense of how the methodology laid out in this book translates into real world practice detailed case studies appear throughout along with practical tips checklists charts descriptive photographs and source lists An extensive bibliography follows *Spaces That Tell Stories Creating Historical Environments* is a unique contribution to the museum field It is a must read for museum professionals installing or upgrading historic environments while the methodology and case studies also offer practical strategies for other museum professionals working with collections exhibitions and interpretation and how these are integrated thoughtful insights into museum practice for students and a helpful toolkit for local historians      *The SAGE Encyclopedia of Quality and the Service Economy* Su Mi Dahlgaard-Park, 2015-05-29 Society globally has entered into what might be called the service economy Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries Services permeate all aspects of peoples lives and are becoming inseparable from most aspects of economic activity Quality management has been a dominating managerial practice since World War II With quality management initially associated with manufacturing industries one might assume the relevance of quality management might decrease with the emergence of the service economy To the contrary the emergence of the service economy strengthened the importance of quality issues which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors as well Today we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment Thus quality and services have emerged in parallel as closely interrelated fields *The Encyclopedia of Quality and the Service Economy* explores such relevant questions as What are the characteristics nature and definitions of quality and services How do we define quality of products quality of services or quality of life How are services distinguished from goods How do we measure

various aspects of quality and services How can products and service quality be managed most effectively and efficiently What is the role of customers in creation of values These questions and more are explored within the pages of this two volume A to Z reference work      **eLearning Theories & Designs** Awatef Bouledroua,2021-01-12 eLearning Theories Designs is a tailored book for new learners and practitioners in the field of blended education The book presents a holistic view of how to implement learning theories while you design your learning It allows the reader to swing between different theories while put into practice especially for the new learners in instructional design who can gather from the practices and case studies valuable information on how to approach their designs it also explains how communities of practice can have an impact on people s learning and how to transform such communities into schools for the enhancement of after school activities Therefore teachers can also benefit from the book as many parts of it are considering course designs and techniques on how to implement good practices in blended learning environments including feedback engagement and motivation The Chapters of the book go from simple theories and approaches put into practice for simple course designs then they expand into expertise techniques like needs assessment writing LPOs and learning modules to end up with program design and evaluation
