succeed in college and become stronger academic writers Progress Monitoring and Data-Based Decision-Making in Inclusive Schools Markus Gebhardt, Stefan Blumenthal, David Scheer, Yvonne Blumenthal, Sarah Powell, Erica Lembke, 2023-05-18 Empowering Students Through Multilingual and Content Discourse Finley, Stacie Lynn, Correll, Pamela, Pearman, Cathy, Huffman, Stephanie, 2023-07-25

Empowering Students Through Multilingual and Content Discourse is a peer reviewed research book that challenges the traditional monolingual classroom approach where the teacher's voice dominates and only the dominant culture's language is considered the path to success. The book aims to empower students by creating classroom spaces where all voices are heard, valued, and empowered. It draws on research from scholars who study discourse and offers insights into how discourse can be used to promote language and literacy development, honor all students' voices, and empower them. This book also provides guidance on culturally and linguistically sustaining discourse practices and encourages educators to incorporate students' home languages and discourse practices in classroom instruction. It challenges educators to move away from centering White English and represent language more responsibly within the classroom. This research is a valuable resource for academic scholars and a useful tool for teachers looking to cultivate student-centered classroom practices. By encouraging discourse among students, educators can create a space where human life holds meaning and students feel empowered to act and use their voices.

Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01. The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards. Teaching to standards is not a new concept; teachers have adapted to new standards every few years for quite some time. And teachers are adaptable, as can be seen in this book. We are writing this book to demonstrate how teachers use research-based strategies to meet Common Core Standards while still focusing on students. Our goal is to help teachers visualize students in action as other teachers describe the implementation of research-based strategies in their own classrooms, show student work samples, and provide reflections of student success in achieving the standards. Many Common Core Standards books focus on the standards, but our approach focuses on strategies that engage the students in the classroom, showing how different teachers at varying grade levels have used the strategies to meet the standards. With this focus, we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas. We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms. We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools, one of the current stressors being unpacking the Common Core Standards. This book actually focuses on practice. We begin by laying out a rationale in our first chapter, The Core Values of Education. Then each chapter focuses on a strategy, including 1) a brief description about the research supporting each strategy and 2) several examples from different grade levels which include a description of how the strategy was used, student

work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
