Citizenship A Very Short Introduction:

Citizenship: A Very Short Introduction Richard Bellamy, 2008-09-25 Interest in citizenship has never been higher But what does it mean to be a citizen of a modern complex community Why is citizenship important Can we create citizenship and can we test for it In this fascinating Very Short Introduction Richard Bellamy explores the answers to these questions and more in a clear and accessible way He approaches the subject from a political perspective to address the complexities behind the major topical issues Discussing the main models of citizenship exploring how ideas of citizenship have changed through time from ancient Greece to the present and examining notions of rights and democracy he reveals the irreducibly political nature of citizenship today ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable Citizenship Richard Paul Bellamy, 2008 Interest in citizenship has never been higher But what does it mean to be a citizen in a modern complex community Richard Bellamy approaches the subject of citizenship from a political perspective and in clear and accessible language addresses the complexities behind this highly topical issue

Citizenship Dimitry Kochenov, 2019-11-12 The story of citizenship as a tale not of liberation dignity and nationhood but of complacency hypocrisy and domination The glorification of citizenship is a given in today's world part of a civic narrative that invokes liberation dignity and nationhood In reality explains Dimitry Kochenov citizenship is a story of complacency hypocrisy and domination flattering to citizens and demeaning for noncitizens In this volume in the MIT Press Essential Knowledge series Kochenov explains the state of citizenship in the modern world Kochenov offers a critical introduction to a subject most often regarded uncritically describing what citizenship is what it entails how it came about and how its role in the world has been changing He examines four key elements of the concept status considering how and why the status of citizenship is extended what function it serves and who is left behind rights particularly the right to live and work in a state duties and what it means to be a good citizen and politics as enacted in the granting and enjoyment of citizenship Citizenship promises to apply the attractive ideas of dignity equality and human worth but to strictly separated groups of individuals Those outside the separation aren't citizens as currently understood and they do not belong Citizenship Kochenov warns is too often a legal tool that justifies violence humiliation and exclusion **Citizenship** Richard Yarwood, 2013-12-17 The idea of citizenship is widely used in daily life Citizenship tests are used to determine who can inhabit a country citizen charters have been used to prescribe levels of service provision citizens juries are used in planning or policy enquiries citizenship lessons are taught in schools youth organisations attempt often aim to instil good citizenship active citizens are encouraged to contribute voluntary effort to their local communities and campaigners may use citizens rights to achieve their goals What is meant by citizenship is never static and the subject of debate by academics politicians and activists These ideas are

manifest and contested at a range of different scales This book therefore argues geography is crucial to understanding citizenship The text is organised around a number of spatial themes to examine how spatialities of citizenship are played out at a range of scales Ideas about locality boundaries mobility networks rurality and globalisation are used to reveal the importance of space and place in the constitution contestation and performance of citizenship In doing so the book reveals how different ideas of citizenship can include or exclude people from society and space Consideration is given to ways in which different groups have sought to empower themselves through various actions associated with and beyond conventional notions of citizenship Written in an accessible way with detailed case studies to illustrate conceptual ideas and approaches this book offers social scientists new spatial perspectives on citizenship while also bridging together strands of social cultural and political geography in ways that deepen understandings of people and place

Universal Citizenship

R. Andrés Guzmán, 2019-01-15 Recently many critics have questioned the idea of universal citizenship by pointing to the racial class and gendered exclusions on which the notion of universality rests Rather than jettison the idea of universal citizenship however R Andr s Guzm n builds on these critiques to reaffirm it especially within the fields of Latina o and ethnic studies Beyond conceptualizing citizenship as an outcome of recognition and admittance by the nation state in a negotiation for the right to have rights he asserts that insofar as universal citizenship entails a forceful entrance into the political from the latter s foundational exclusions it emerges at the limits of legality and illegality via a process that exceeds identitarian capture Drawing on Lacanian psychoanalysis and philosopher Alain Badiou s notion of generic politics Guzm n advances his argument through close analyses of various literary cultural and legal texts that foreground contention over the limits of political belonging These include the French Revolution responses to Arizona s H B 2281 the 2006 immigrant rights protests in the United States the writings of Oscar Zeta Acosta Frantz Fanon s account of Algeria s anticolonial struggle and more In each case Guzm n traces the advent of the citizen as a collective subject made up of anyone who seeks to radically transform the organizational coordinates of the place in which she or he lives

Citizenship, Belonging, and Nation-States in the Twenty-First Century

Nicole Stokes-DuPass, Ramona Fruja, 2017-07-15 Citizenship Belonging and Nation States in the Twenty First Century contributes to the scholarship on citizenship and integration by examining belonging in an array of national settings and by demonstrating how nation states continue to matter in citizenship analysis Citizenship policies are positioned as state mechanisms that actively shape the integration outcomes and experiences of belonging for all who reside within the nation state This edited volume contributes an alternative to the promotion of post national models of membership and emphasizes that the most fundamental facet of citizenship a status of recognition in relationship to a nation state need not be left in the relic galleries of an allegedly

outdated political past This collection offers a timely contribution both theoretical and empirical to understanding citizenship nationalism and belonging in contexts that feature not only rapid change but also levels of entrenchment in ideological and historical legacies

Citizenship as Foundation of Rights Richard Sobel, 2016-10-26 Citizenship as Foundation of Rights explains what it means to have citizen rights and how national identification requirements undermine them

The Human Right to Citizenship Barbara von Rütte, 2022-12-28 The open access publication of this book has been published with the support of the Swiss National Science Foundation This book offers a comprehensive analysis of the right to citizenship in international and regional human rights law It critically reflects on the limitations of state sovereignty in nationality matters and situates the right to citizenship within the existing human rights framework It identifies the scope and content of the right to citizenship by looking not only at statelessness deprivation of citizenship or dual citizenship but more broadly at acquisition loss and enjoyment of citizenship in a migration context Exploring the intersection of international migration human rights law and belonging the book provides a timely argument for recognizing a right to the citizenship of a specific state on the basis of one's effective connections to that state according to the principle of *jus nexi*

The Dying Citizen Victor Davis Hanson, 2021-10-05 The New York Times bestselling author of *The Case for Trump* explains the decline and fall of the once cherished idea of American citizenship Human history is full of the stories of peasants subjects and tribes Yet the concept of the citizen is historically rare and was among America's most valued ideals for over two centuries But without shock treatment warns historian Victor Davis Hanson American citizenship as we have known it may soon vanish In *The Dying Citizen* Hanson outlines the historical forces that led to this crisis The evisceration of the middle class over the last fifty years has made many Americans dependent on the federal government Open borders have undermined the idea of allegiance to a particular place Identity politics have eradicated our collective civic sense of self And a top heavy administrative state has endangered personal liberty along with formal efforts to weaken the Constitution As in the revolutionary years of 1848 1917 and 1968 2020 ripped away our complacency about the future But in the aftermath we as Americans can rebuild and recover what we have lost The choice is ours

Routledge International Handbook of Contemporary Social and Political Theory Gerard Delanty, Stephen P. Turner, 2011-03-23 The Handbook will address a range of issues that have emerged out of recent social and political theory It will focus on key themes as opposed to schools of thought or major theorists Each chapter is an emerging cutting edge topic that is of interest both to social theory and to political theory Most topics will have a clear and substantive focus on social or political problems

The Citizenship Experiment René Koekoek, 2020-01-23 The Citizenship Experiment explores the fate of citizenship ideals in the Age of Revolutions While in the early 1790s citizenship ideals in the Atlantic world converged the twin shocks of the Haitian Revolution and the French Revolutionary Terror led the American French and Dutch publics to abandon the notion of a shared Atlantic revolutionary vision of citizenship Instead they forged conceptions of citizenship that were limited to national

contexts restricted categories of voters and advanced stages of civilization Weaving together the convergence and divergence of an Atlantic revolutionary discourse debates on citizenship and the intellectual repercussions of the Terror and the Haitian Revolution Koekkoek offers a fresh perspective on the revolutionary 1790s as a turning point in the history of citizenship **The Oxford Handbook of the History of Political Philosophy** George Klosko, 2011-05-26 Fifty

distinguished contributors survey the entire history of political philosophy They consider questions about how the subject should best be studied they examine historical periods and great theorists in their intellectual contexts and they discuss aspects of the subject that transcend periods such as democracy the state and imperialism **Handbook on Border**

Criminology Mary Bosworth, Katja Franko, Maggy Lee, Rimple Mehta, 2024-12-09 This topical Handbook investigates the nature and impact of intersections between border control and criminal justice Using comparative and decolonial perspectives it demonstrates the corrosive effect of harsh border practices not just on those subject to them but to many of the key principles of liberal democracy Citizenship, Nationalism and Refugeehood of Rohingyas in Southern Asia Nasreen Chowdhury, Biswajit Mohanty, 2020-05-19 This book provides an in depth investigation of citizenship and nationalism in connection with the Rohingya community It analyses the processes of production of statelessness in South Asia in general and with regard to the Rohingyas in particular Following the persecution of the Rohingya community in Myanmar Burma by the military and the Buddhist militia a host of texts mostly descriptive have examined the historical political and cultural roots of the genocidal massacre and the flight of its victims to South Asia and South East Asian countries The UNHCR reports describe the plight of Rohingyas during and after their journey while other works focus on the political economic roots of this ethnic conflict and its consequences for the Rohingyas To date very few theoretical insights have been provided on the Rohingya issue This book seeks to fill that gap and explores a dialogue between the state and its citizens and non citizens that results in the production of statelessness In theoretical terms the book addresses the construction of citizens and non citizens on the part of the state and the process of symbolic othering achieved through various state practices couched in terms of nationalism Extensive case studies from India Myanmar and Bangladesh provide the foundation for a robust theoretical argument Given its scope the book will be of interest to students academics and researchers with a focus on political economy in South Asia in general and or refugee studies in particular **A Republican Europe of States** Richard

Bellamy, 2019-01-31 Combining international political theory and EU studies Richard Bellamy provides an original account of the democratic legitimacy of international organisations He proposes a new interpretation of the EU's democratic failings and how they might be addressed Drawing on the republican theory of freedom as non domination Bellamy proposes a way to combine national popular sovereignty with the pursuit of fair and equitable relations of non domination among states and their citizens Applying this approach to the EU Bellamy shows that its democratic failings lie not with the democratic deficit at the EU level but with a democratic disconnect at the member state level Rather than shifting democratic authority to the

European Parliament this book argues that the EU needs to reconnect with the different *demoi* of the member states by empowering national parliaments in the EU policy making process *Tax Justice and Tax Law* Dominic de Cogan, Peter Harris, 2020-11-12 Most people would agree that tax systems ought to be just and perhaps a great deal more just than they are at present What is more difficult is to agree on what tax justice is This book considers a range of different approaches to and ideas about the nature of tax justice and covers areas such as imbalances in international tax arrangements that deprive developing countries of revenues from natural resources and allow wealthy taxpayers to use tax havens protests against governments and large business attempts to influence policy through more technical means such as the OECD's Base Erosion and Profits Shifting project interpersonal matters such as the ways in which tax systems disadvantage women and minorities the application of wider philosophical or economic theories to tax systems The purpose of the book is not to iron out these underlying differences into a grand theory but rather to gain a more precise understanding of how and why we disagree about tax justice In doing so the editors are assisted by a stellar cast of contributors from four continents with a wide variety of views and experiences but a common interest in this central question of how to agree and disagree about tax justice This is of course not only an intellectual exercise but also a necessary precursor to achieving real world change *Political Church* Jonathan Leeman, 2016-03-02 What is the nature of the church as an institution What are the limits of the church's political reach Drawing on covenant theology and the new institutionalism in political science Jonathan Leeman critiques political liberalism and explores how the biblical canon informs an account of the local church as an embassy of Christ's kingdom
