Migration, Work and Citizenship in the New Global Order Ronaldo Munck, Carl Schierup, Raúl Wise, 2013-09-13 Any consideration of global migration in relation to work and citizenship must necessarily be situated in the context of the Great Recession A whole historical chapter that of neoliberalism has now closed and the future can only be deemed uncertain Migrant workers were key players during this phase of the global system supplying cheap and flexible labour inputs when required in the rich countries Now with the further sustainability of the neoliberal political and economic world order in question what will be the role of migration in terms of work patterns and what modalities of political citizenship will develop While informalization of the relations of production and the precarization of work were once assumed to be the exception that is no longer the case As for citizenship this book posits a parallel development of precarious citizenship for migrants made increasingly vulnerable by the global economic crisis But we are also in an era of profound social transformation in the context of which social counter movements emerge which may halt the disembedding of the market from social control and its corrosive impact This book was published as a special issue of Globalizations

Leadership for Inclusive Education G. Mac Ruairc,E. Ottesen,R. Precey,2013-02-11 Inclusion is increasingly becoming one of the policy drivers shaping educational discourse and practice What constitutes the term inclusion itself and how ideas derived from the different perspectives on inclusion impact school leadership practice point to a highly contested field of enquiry Originally embedded in discourse relating to special education ideas relating to inclusion are attracting much broader appeal within system reforms in many jurisdictions This book seeks to keep the consideration of inclusion firmly in its broader context and to decouple it from the discourse relating to students with special educational additional needs This allows the authors to position their contributions more explicitly within discourses that draw on difference and diversity as unavoidable features of schools Within this collection we address the current political dogmas in many countries that take a purely rational managerial approach to leadership arguing that this is not contributing to inclusion in schools In doing this the book seeks to shape current discourses on leadership by exploring perspectives which are likely to enhance our understanding of inclusion Tolerance respect listening clarifying language being comfortable with differences and ambiguity and articulating and challenging the rationale behind the way we do things around here are key aspects of inclusive leadership and also fundamental imperatives for writing this book It will be useful to those in education who are engaged in further academic study in education or in reflective practice and to anyone taking advanced programmes in educational leadership and management The international perspectives on the issue of inclusion informing this book ensure that this book will be essential for those engaged in a comparative analysis of leadership practice in different contexts or those concerned with the complexity of ensuring inclusive models of education
