

FRONT AIRBAGS

The front airbags are fitted in the centre of the steering wheel for the driver and in the dashboard for the front passenger.

Deployment

They are deployed simultaneously, unless the passenger's front airbag has been deactivated, in the event of a serious front impact.

The front airbag inflates between the front occupant of the vehicle and the dashboard to cushion their forward movement.

Deactivation

Only the passenger's front airbag can be deactivated. The airbag is deactivated from the trip computer.

➕ Refer to the "MENU" section of chapter 3, then select **OFF** on the "Passenger airbag" menu.

The airbag warning lamp in the instrument panel is on while the airbag is deactivated.

⚠ To assure the safety of your child, you must deactivate the passenger airbag when you install a rear-facing child seat on the front passenger seat. Otherwise, the child would risk being killed or seriously injured if the airbag were to inflate.

Operating fault

If this warning lamp comes on in the instrument panel, accompanied by an audible signal and a message in the screen, contact a CITROËN dealer or a qualified workshop without delay to have the system checked. The airbags may no longer be deployed in the event of a serious impact.

⚠ If the two airbag warning lamps are on continuously, do not install a rear-facing child seat. Have it checked by a CITROËN dealer or a qualified workshop.
