**Confessions of an Rx Drug Pusher** Gwen Olsen, 2009-04-24 Winner of the IPPY Award gold medal for Most Progressive Health Book On December 2 2004 Gwen Olsen's niece Megan committed suicide by setting herself on fire and ended her tortured life as a victim of the adverse effects of prescription drugs Olsen's poignant autobiographical journey through the darkness of mental illness and the catastrophic consequences that lurk in medicine cabinets around the country offers an honest glimpse into alarming statistics and a health care system ranked last among nineteen industrialized nations worldwide As a former sales representative in the pharmaceutical industry for several years Olsen learned firsthand how an unprecedented number of lethal drugs are unleashed in the United States market but her most heartrending education into the dangers of antidepressants would come as a victim and ultimately as a survivor Rigorously researched and documented **Confessions of an Rx Drug Pusher** is a moving human drama that shares one woman's unforgettable journey of faith forgiveness and healing

**Confessions of an Rx Drug Pusher** Gwen Olsen, 2005      **Saving Talk Therapy** Enrico Gnaulati, 2018-01-09 A hard hitting critique of how managed care and the selective use of science to privilege quick fix therapies have undermined in depth psychotherapy to the detriment of patients and practitioners In recent decades there has been a decline in the quality and availability of psychotherapy in America that has gone largely unnoticed even though rates of anxiety depression and suicide are on the rise In **Saving Talk Therapy** master therapist Dr Enrico Gnaulati presents powerful case studies from his practice to remind patients and therapists alike how and why traditional talk therapy works and using cutting edge research findings unpacks the problematic incentives in our health care system and in academic psychology that explain its decline Beginning with a discussion of the historical development of talk therapy Dr Gnaulati goes on to dissect the factors that have undermined it Psychotropic drugs if no longer thought of as a magical cure are still over prescribed and shunt health care dollars to drug corporations Managed care companies and mental health carve outs send health care dollars to administrators drive many practitioners away and over burden those who remain And drawing back the curtains on CBT cognitive behavior therapy Dr Gnaulati shows that while it might be effective in the research lab its findings are of limited use for the people's complex real world emotional problems **Saving Talk Therapy** is a passionate and deeply researched case for in depth personally transformative psychotherapy that incorporates the benefits of an evidence based approach and psychotropic drugs without over relying on them

Gwen Olsen, 2005-08-01 The United States health care system is killing Americans at an alarming rate even though we spend over fifteen percent of the Gross National Product GNP on health care According to the Journal of the American Medical Association our health care outcomes ranked only fifteenth among twenty five industrialized nations worldwide Adverse effects from prescription drugs have become the third leading killer of Americans Only heart disease and cancer claim more lives We trust our doctors to inform us and our government to protect us from medical malfeasance that may put profits ahead of consumer health and safety But the fine

line walked by the FDA between the interests of the pharmaceutical manufacturers and the American public has continually been crossed The result is the unleashing of an unprecedented number of lethal drugs on the U S market Gwen Olsen learned firsthand the danger that lurks in every American s medicine cabinet working in the pharmaceutical industry But her most poignant education would come as a victim and ultimately as a survivor Rigorously researched and documented Confessions of an Rx Drug Pusher God s Call to Loving Arms is a moving human drama that illustrates the catastrophic consequences of a health care system run amuck

**The Pill That Steals Lives - One Woman's Terrifying Journey to Discover the Truth About Antidepressants** Katinka Newman, 2016-07-07 While going through a divorce documentary filmmaker Katinka Blackford Newman took an antidepressant Not unusual except that things didn t turn out quite as she expected She went into a four day toxic psychosis with violent hallucinations imagining she had killed her children and in fact attacking herself with a knife Caught up in a real life nightmare when doctors didn t realise she was suffering side effects of more pills she went into a year long decline Soon she was wandering around in an old dressing gown unable to care for herself and dribbling She nearly lost everything but luck stepped in treated at another hospital she was taken off all the medication and made a miraculous recovery within weeks By publicising her story Katinka went on to make some startling discoveries Could there really be thousands around the world who kill themselves and others from these drugs What of the billions of dollars in settlements

paid out by drug companies Could they really be the cause of world mass killings such as the Germanwings pilot who took an airliner down killing 150 while on exactly the same medication as the author when she became psychotic And how come so many people are taking these drugs when experts say they are no more effective than a sugarcoated pill for people like her who are distressed rather than depressed Moving frightening and at times funny this is the story of how a single mum in Harlesden North West London juggles life and her quest for love in order to investigate Big Pharma For more information visit [www.thepillthatsteals.com](http://www.thepillthatsteals.com)
