Connecting Worlds and People Dagmar Freist, Susanne Lachenicht, 2016-12-01 In recent decades historians have emphasized just how dynamic and varied early modern Europe was Previously held notions of monolithic and static societies have now been replaced with a model in which new ideas different cultures and communities jostle for attention and influence Building upon the concept of interaction the essays in this volume develop and explore the idea with specific reference to the ways in which diasporas could act as translocal societies connecting worlds and peoples that may not otherwise have been linked The volume looks at the ways in which diasporas or diasporic groups such as the Herrnhuters the Huguenots the Quakers Jews the Mennonites the Moriscos and others could function as intermediaries to connect otherwise separated communities and societies All contributors analyse the respective groups internal and external networks social relations and the settings of social interactions looking at the entangled networks of diaspora communities and their effects upon the societies and regions they linked through those networks The collection takes a fresh look at early modern diasporas combining religious cultural social and economic history to better understand how early modern communication patterns and markets evolved how consumption patterns changed and what this meant for social economic and cultural change how this impacted on what we understand as early developments towards globalization and how early developments towards globalization in turn were constitutive of these

Connecting a City to the Sea David Conwell, 2008-01-31 The Long Walls joining Athens with its harbors are universally recognized as symbols of naval imperialism and the lynchpin of a radical departure from traditional Greek military strategy during the later fifth century B C Nevertheless many important questions about the structures remain disputed or simply neglected As the first comprehensive history of the Long Walls the present study dates each construction phase examines the function of the structures from beginning to end and chronicles their fluctuating viability The analysis is driven by the proposition that the Athenians would not have relied on the walls to the sea when their navy did not control the sea lanes effectively This full consideration of the Long Walls development and strategic prominence over time will enable accurate assessment of their position in Greek military and political history from classical through early Hellenistic times

Sheridan, 2016-04-08 Jim Wallis well known justice advocate and author has stated that the two great hungers in the world today are for spirituality and social justice Although social work and related fields have increasingly recognized the importance of addressing spirituality within clinical practice less attention has been paid to the role of spirituality in promoting social justice or supporting social change within macropractice The contributions in this edited collection highlight current developments in this area including emerging conceptual frameworks practice applications and research findings Theoretical approaches to understanding the link between spirituality and justice are explored in analyses of

alternative models of social justice and justice orientations of major faith traditions The critical role of spirituality in larger system change is illustrated through exemplars of research on vulnerable populations community practice legislative advocacy development of social movements and ecological social work The importance of including content on religion and spirituality in professional curricula is explored through research on students attitudes toward spirituality and social advocacy Noting the resonating themes within all of these contributions the volume concludes with an overview of emerging principles for spiritual activism This book aims to stimulate further development in the vital connection between spirituality and social justice It was originally published as a special issue of the Journal of Religion Spirituality in Social Work

Election, Barth, and the French Connection, 2nd Edition Pierre Maury, 2019-11-11 Karl Barth's famous account of the doctrine of election in his mammoth *Dogmatics* has been described as the heart of his theology a great hymn to the grace of God in Christ Discover the person who initially stimulated Barth's mammoth reworking of the classical view of the doctrine pastor theologian Pierre Maury 1890-1956 Their close friendship and especially a seminal paper Maury gave in 1936 entitled *Election and Faith* helped stimulate Barth's reflection Discover some never before translated works of Maury as well as a revision of a previously published piece on predestination In this revised and expanded second edition seven theologians reflect on the significance of these works for us today from historical textual pastoral and theological standpoints and seek to draw conclusions for us in our contemporary setting *Carolingian Connections* Joanna Story, 2017-05-15 The Anglo Saxon influence on the Carolingian world has long been recognised by historians of the early medieval period Wilhelm Levison in particular has drawn attention to the importance of the Anglo Saxon contribution to the cultural and ecclesiastical development of Carolingian Francia in the central decades of the eighth century What is much less familiar is the reverse process by which Francia and Carolingian concepts came to influence contemporary Anglo Saxon culture In this book Dr Story offers a major contribution to the subject of medieval cultural exchanges focusing on the degree to which Frankish ideas and concepts were adopted by Anglo Saxon rulers Furthermore by concentrating on the secular context and concepts of secular government as opposed to the more familiar ecclesiastical and missionary focus of Levison's work this book offers a counterweight to the prevailing scholarship providing a much more balanced overview of the subject Through this reassessment based on a close analysis of contemporary manuscripts particularly the Northumbrian sources Dr Story offers a fresh insight into the world of early medieval Europe *The Literature of Connection* David Trotter, 2020-06-10 This book is about some of the ways in which the world got ready to be connected long before the advent of the technologies and the concentrations of capital necessary to implement a global network society It investigates the prehistory not of the communications revolution brought about by advances in electronic digital computing from 1950 onwards but of the principle of connectivity which was to provide that revolution with its justification and rallying cry Connectivity's core principle is that what matters most in any act of telecommunication and sometimes all that matters is the fact of its having

happened During the nineteenth century the principle gained steadily increasing traction by means not only of formal systems such as the telegraph but of an array of improvised methods and signalling devices These methods and devices fulfilled not just an ever more urgent need but a fundamental recurring desire for near instantaneous real time communication at a distance Connectivity became an end in itself a complex vivid unpredictable romance woven through the enduring human desire and need for remote intimacy Its magical enhancements are the stuff of tragedy comedy satire elegy lyric melodrama and plain description of literature in short The book develops the concepts of signal medium and interface to offer in its first part an alternative view of writing in Britain from George Eliot and Thomas Hardy to D H Lawrence Hope Mirrlees and Katherine Mansfield and in its second case studies of European and African American fiction and of interwar British cinema designed to open the topic up for further enquiry

Rockingham Connection and the Second Founding of the Whig Party Warren M. Elofson, 1996-02-08 Elofson reveals that the Rockinghams far more than previously recognized were governed by a coherent set of constitutional ideals and argues that they saw party not primarily as a means to office but as a vehicle for public spirited men to secure the predominance of right and uniform principles in the operation of the state He examines the ideological writings of Edmund Burke the Party s noted and prolific publicist placing them in their political context and providing a new analysis of Burke s renowned pamphlet *Thoughts on the Cause of the Present Discontents* 1770 Throughout Elofson illustrates the ways in which the Rockinghams altered and redefined the Whig Party and its principles as they took the first halting steps toward a program of constitutional amendment establishing their place not only in Whig but in British constitutional development

The Crisis of Connection Niobe Way, Alisha Ali, Carol Gilligan, Pedro Noguera, 2020-01-07 A collection of essays that examine the causes of and provide solutions to the widespread alienation and disconnection that beset modern society Since the beginning of the 21st century people have become increasingly disconnected from themselves each other and the world around them A crisis of connection stemming from growing alienation social isolation and fragmentation characterizes modern society The signs of this crisis of connection are everywhere from decreasing levels of empathy and trust to burgeoning cases of suicide depression and loneliness The astronomical rise in inequality around the world has contributed to the critical nature of this moment To delve into the heart of the crisis leading researchers and practitioners draw from the science of human connection to tell a five part story about

its roots consequences and solutions In doing so they reveal how we in modern society have been captive to a false narrative that takes individualism as a universal truth The new story now emerging from across the human sciences underscores our social and emotional capacities and needs The science also reveals the ways in which the privileging of the self over relationships and of individual success over the common good as well as the perpetuation of dehumanizing stereotypes have led to a crisis of connection that is now widespread Finally the practitioners in the volume present concrete solutions that show ways we can create a more just and humane world This profoundly important book suggests that our innate human determination to bridge differences and live in vulnerable loving relationships is the antidote to rising fear and anxiety Lyn Mikel Brown author of *Powered by Girl* **The Connected Iron Age** Jonathan M. Hall, James F. Osborne, 2022-12-09 An interdisciplinary consideration of how eastern Mediterranean cultures in the first millennium BCE were meaningfully connected The early first millennium BCE marks one of the most culturally diverse periods in the history of the eastern Mediterranean Surveying the region from Greece to Iraq one finds a host of cultures and political formations all distinct yet all visibly connected in meaningful ways These include the early polities of Geometric period Greece the Phrygian kingdom of central Anatolia the Syro Anatolian city states the seafaring Phoenicians and the biblical Israelites of the southern Levant Egypt's Twenty first through Twenty fifth Dynasties the Urartian kingdom of the eastern Anatolian highlands and the expansionary Neo Assyrian Empire of northern Mesopotamia This volume adopts an interdisciplinary approach to understanding the social and political significance of how interregional networks operated within and between Mediterranean cultures during that era *(Dis)connected Empires* Zoltán Biedermann, 2018-10-25 *Dis connected Empires* takes the reader on a global journey to explore the triangle formed during the sixteenth century between the Portuguese empire the empire of Kotte in Sri Lanka and the Catholic Monarchy of the Spanish Habsburgs It explores nine decades of connections cross cultural diplomacy and dialogue to answer one troubling question why in the end did one side decide to conquer the other To find the answer Biedermann explores the imperial ideas that shaped the politics of Renaissance Iberia and sixteenth century Sri Lanka *Dis connected Empires* argues that whilst some of these ideas and the political idioms built around them were perceived as commensurate by the various parties involved differences also emerged early on This prepared the ground for a new kind of conquest politics which changed the inter imperial game at the end of the sixteenth century The transition from suzerainty driven to sovereignty fixated empire building changed the face of Lankan and Iberian politics forever and is of relevance to global historians at large Through its scrutiny of diplomacy political letter writing translation practices warfare cartography and art *Dis connected Empires* paints a troubling panorama of connections breeding divergence and leading to communicational collapse It examines a key chapter in the pre history of British imperialism in Asia highlighting how diplomacy and mutual understandings can under certain conditions produce conquest
