National Economic Development Program, Part 1, Hearings Before the Subcommittee on Economic Development ...
United States. Congress. Senate. Committee on Public Works, 1971 Obligations of Citizenship and Demands of Faith
Nancy L. Rosenblum, 2021-04-13 Of the many challenges facing liberal democracy none is as powerful and pervasive today as those posed by religion These are the challenges taken up in *Obligations of Citizenship and Demands of Faith* an exploration of the place of religion in contemporary public life The essays in this volume suggest that two important shifts have altered the balance between the competing obligations of citizenship and faith the growth of religious pluralism and the escalating calls of religious groups for some measure of autonomy or recognition from democratic majorities The authors political theorists philosophers legal scholars and social scientists collectively argue that more room should be made for religion in today's democratic societies Though they advocate different ways of carving out and justifying the proper bounds of church and state in pluralist democracies they all write from within democratic theory and share the aim of democratic accommodation of religion Alert to national differences in political circumstances and the particularities of constitutional and legal systems these contributors consider the question of religious accommodation from the standpoint of institutional practices and law as well as that of normative theory Unique in its interdisciplinary approach and comparative focus this volume makes a timely and much needed intervention in current debates about religion and politics The contributors are Nancy L. Rosenblum Alan Wolfe Ronald Thiemann Michael McConnell Graham Walker Amy Gutmann Kent Greenawalt Aviam Soifer Harry Hirsch Gary Jacobsohn Yael Tamir Martha Nussbaum and Carol Weisbrod **Young Citizens of the World**

art around the study of CAs and opens novel perspectives informed by multidisciplinary research and renewed thinking about deliberative participatory processes It discusses the latest theoretical empirical and methodological scientific developments on CAs and offers a unique resource for scholars decision makers practitioners and curious citizens to better understand the qualities purposes promises but also pitfalls of CAs

Consensus Planning: The Relevance of Communicative Planning Theory in Dutch Infrastructure Development Johan Woltjer, 2017-11-22 This title was published in 2000 This text offers a standpoint on communicative participatory planning called consensus planning The discussion takes place in the Netherlands where consensus based decision making is part of the national heritage The book explores recent Dutch infrastructure development experiences and concludes that communicative planning theory does not offer uniform relevance for the challenges that planning practitioners face Building on these experiences it proposes the concept of consensus planning as valuable in a complementary normalized and contingent way Consensus planning in other words has diverse practical appearances and sometimes may not exist or be desirable

A Theory Of Citizenship Herman R. Van Gunsteren, 2018-10-08 Does vital citizenship require moral consensus Or is it the ability to organize their differences that allows people to live together as citizens in a republic Whereas liberal republican and communitarian theories of citizenship analyzed the conditions of citizenship the central message of this book is that the practical exercise of citizenship under conditions that are far from ideal is the main source of its vitality Instead of arguing for more participation it focuses on the citizenship of those who for whatever reason are already active in the public sphere Herman van Gunsteren develops a theory of citizenship well suited to the era of political reform that was inaugurated by the revolutions of 1989

Citizen Employers Jeffrey Haydu, 2019-06-30 The exceptional weakness of the American labor movement has often been attributed to the successful resistance of American employers to unionization and collective bargaining However the ideology deployed against labor's efforts to organize at the grassroots level has received less attention In *Citizen Employers* Jeffrey Haydu

compares the very different employer attitudes and experiences that guided labor capital relations in two American cities Cincinnati and San Francisco in the period between the Civil War and World War I His account puts these attitudes and experiences into the larger framework of capitalist class formation and businessmen s collective identities Cincinnati and San Francisco saw dramatically different developments in businessmen s class alignments civic identities and approach to unions In Cincinnati manufacturing and commercial interests joined together in a variety of civic organizations and business clubs These organizations helped members overcome their conflicts and identify their interests with the good of the municipal community That pervasive ideology of business citizenship provided much of the rationale for opposing unions In sharp contrast San Francisco s businessmen remained divided among themselves opted to side with white labor against the Chinese and advocated treating both unions and business organizations as legitimate units of economic and municipal governance Citizen Employers closely examines the reasons why these two bourgeoisies located in comparable cities in the same country at the same time differed so radically in their degree of unity and in their attitudes toward labor unions and how their views would ultimately converge and harden against labor by the 1920s With its nuanced depiction of civic ideology and class formation and its application of social movement theory to economic elites this book offers a new way to look at employer attitudes toward unions and collective bargaining That new approach Haydu argues is equally applicable to understanding challenges facing the American labor movement today Alternatives for Environmental Valuation Michael Getzner,Clive Spash,Sigrid Stagl,2004-10-21 How can we value the environment this is the crucial issue that this book debates The critical analyses carried out within the book by such figures as Nick Hanley and Jonathan Aldred are vital to ensuring that future economic growth is not achieved at the expense of our environment Religious Voices in Public Places Nigel Biggar,Linda Hogan,2009-09-03 Drawing on political philosophy and theology theory and practice this essay collection tackles the complex questions arising from the interface of religion and public life Includes critical analyses of theorists Rawls Stout and Habermas and discussion of key issues such as religious education and human rights Absent Citizens Michael J. Prince,2009-04-22 Disability exists in the shadows of public awareness and at the periphery of policy making People with disabilities are in many respects missing from the theories and practices of social rights political participation employment and civic membership Absent Citizens brings to light these chronic deficiencies in Canadian society and emphasizes the effects that these omissions have on the lives of citizens with disabilities Drawing together elements from feminist studies political science public administration sociology and urban studies Michael J Prince examines mechanisms of exclusion and inclusion public attitudes on disability and policy making processes in the context of disability Absent Citizens also considers social activism and civic engagements by people with disabilities and disability community organizations highlighting presence rather than absence and advocating both inquiry and action to ameliorate the marginalization of an often overlooked segment of the Canadian population **A Companion to Rawls** Jon Mandle,David A. Reidy,2015-11-23
