

STOP & THINK ACTIVITY: POSITIVE AND NEGATIVE CONSEQUENCES

There are usually both positive (good) and negative (bad) consequences to every choice we make.

For example, what would happen if your parents told you not to eat any cookies before dinner, but you grabbed a couple while they weren't looking? A positive consequence would be that you got to eat yummy cookies. Some negative consequences would be getting in trouble for disobeying your parents, and ruining your appetite for dinner.

Directions: Read one of the **Choice** cards. Write the possible **positive, or good,** consequences of that choice in the "POSITIVE" box. Write the possible **negative, or bad,** consequences of that choice in the "NEGATIVE" box.

Choice Card

A classmate dares you to trip another student. What would happen if you do it?

Choice Card

You have a test tomorrow, but you get invited to play video games at a friend's house. What would happen if you choose to study?

Choice Card

A classmate wants to copy your homework. What would happen if you let him?

Choice Card

You and a friend walk into the cafeteria together, and there is only one seat left at the table where you want to sit. What would happen if you choose to sit there?

Choice Card

The teacher has a bowl of candy on her desk, and she leaves the room for a minute. What would happen if you took some?

Choice Card

Your best friend tells you that you shouldn't hang out with another friend anymore. What would happen if you choose to still hang out with that other friend anyway?

Social Competence in Developmental Perspective Barry Schneider, Grazia Attili, Jacqueline Nadel, Roger Weissberg, 1989-08-31 What determines the focus of a researcher's interest the sources of inspiration for a study or the variables scrutinized If we were to examine the antecedents of these decisions they would surely emerge as accidents of circumstance the personal experiences of the researcher the inspiration of early mentors the influence of contemporary colleagues all tempered by the intellectual currents that nurture the researcher's hypotheses Among the accidents that mold the careers of researchers is geographic location The culture in which a research program emerges helps determine both its very subject and its method The primary purpose of this book is to assist those interested in the scientific study of children's social competence in transcending the boundaries imposed both by geography and by selective exposure to the highly diverse schools of thought that have led to interest in this field Most of these ideas were presented and exchanged at an Advanced Study Institute entitled Social Competence in Developmental Perspective held in Savoie France in July 1988 This Institute was attended by scholars from France England Northern Ireland Germany Italy Norway Spain Portugal Netherlands Canada the United States and Brazil Those who participated will recognize that the metamorphosis from lecture to chapter has necessitated many changes In

order to accommodate the reader who may be unfamiliar with the field more attention has been paid here to identifying the theoretical contexts of the research described

treatment practice specifically for juveniles Provides tools for assessment case formulation and treatment Covers treatment in comorbid conditions or developmental disabilities Contains forms checklists and client exercises for use in practice A
Therapeutic Treasure Box for Working with Children and Adolescents with Developmental Trauma Karen
Treisman,2017-09-21 The essential resource for anyone working with children or teens who have experienced trauma
provides an overview of the latest theory good practice and a treasure trove of activities and handouts a valuable addition to
your bookshelf which is destined to be used again and again Emotional and Behavioral Disorders Jo Webber,Cynthia A.
Plotts,2008 This text presents diagnostic assessment and educational applications for children and youth with emotional and
behavioral disorders through five theoretical models clearly linking the theories to practice The theme of this text remains an
ecological systems perspective of emotional and behavioral disorders in children and youth reflected in the examples used
and the references cited **Changing Offending Behaviour** Clark Baim,Lydia Fransham/Guthrie,2014-08-21 Covering
must know theory and packed with photocopiable practical exercises that work this is an essential guide to rehabilitation
theory and practice for professionals to use in direct work with offenders All the exercises are culturally aware and designed
for maximum flexibility to meet different needs and learning styles *CBT Worksheets for Depression* Dr James Manning
ClinPsyD,2024-07-29 Please note This book now contains a link inside that you can use to print out your own blank CBT
worksheets If you are a CBT therapist or a CBT therapist in training you are welcome to photocopy the worksheets in this
book for your clients I have made the paper colour and size ideal for photocopying You can also photocopy any other part of
this book except for pages where there are cartoons I wrote this book because I found that many of my clients found it very
difficult to remember topics discussed in their sessions Over time I found that using specifically tailored worksheets resulted
in therapy becoming more streamlined and efficient Everything included in this book is information that Dr Ridgeway and I
use in the real world of clinical practice Chapters in the middle of this book have been written to assist you with the
development of psychological formulations The rule sheets I have included are a rapid way of finding out what rules your
clients hold Once rules are identified it is then relatively easy to isolate beliefs and behaviours connected to them This will
lead to the development of longitudinal formulations which can be very helpful to you and your clients This in turn will help
you to write case studies and process reports I have written this book to be easy to read rather than to impress you with
complex vocabulary Where possible I have included explanations for anything that could be viewed as jargon When I started
work as an assistant psychologist a psychologist in pre training I often attended clinical meetings where Clinical
Psychologists and Psychiatrists discussed clients Words such as formulation negative reinforcement sub cortical response
and such like went right over my head It was like the clinicians were speaking a different language Ideally if you are just
starting out in your clinical career this book will tell you most of the things that you need to know about depression at least
We have used a metaphor of the Black Dog in this book as we have found as it is often an appealing way in to help clients
